

# Molela - Rajasthan

## V1 — Authentic Style

### Universal Hard Prompt

Attachments needed: none.

Create an image in pure authentic source-truth Molela from Rajasthan.

Treat this as a true votive terracotta relief-plaque tradition, not as generic terracotta décor, not as freestanding sculpture, not as pottery, not as mural art, and not as painted religious wall panel.

Build the image from the true grammar of Molela:  
flat terracotta plaque identity,  
slab-based clay construction,  
hand-moulded relief rise,  
kiln-fired terracotta presence,  
shrine-readable deity and folk-devotional icon clarity,  
wall-mounted plaque logic,  
votive village-devotional force,  
and whole-surface plaque coherence.

The image must feel like it genuinely belongs inside the original Molela tradition.

Keep the whole frame inside one plaque-authored visual language.

The form itself must be source-born:

flat slab first, not statue first,  
relief rising from clay surface, not full-round modeling,  
hand-built terracotta logic, not cast or carved realism,  
shrine-readable icon clarity, not psychological realism,  
wall/shrine-facing presence, not scenic composition.

Figure logic must remain source-faithful:

deities, riders, animals, folk or village devotional figures must all feel plaque-born,  
frontal or relief-readable,  
hand-moulded,  
iconically clear,  
and structurally tied to the slab.

Material memory must remain visible:

earthy clay body,

hand-shaped terracotta surface,  
kiln-fired plaque presence,  
relief hierarchy from the slab,  
votive object character,  
not glossy or luxury finished.

Color, if used, must support shrine readability and direct votive presence,  
but relief clay form must remain stronger than paint illusion.

Do not add:

freestanding idol logic,  
full-round sculpture,  
generic rustic terracotta wall art,  
pottery-object behavior,  
ceramic luxury polish,  
realistic deity anatomy,  
or any second visual language stronger than Molela plaque-relief identity.

The final result must feel like true Molela votive terracotta plaque work from Rajasthan at source-truth level, not a modern religious clay artwork with Molela-like surface cues.

## **Reusable Variable Template**

Attachments needed: none.

Create [SUBJECT / PLAQUE / DEVOTIONAL IMAGE / WALL OBJECT] using the authentic source-truth grammar of Molela from Rajasthan.

Core style system to preserve:

flat terracotta plaque identity,  
slab-based clay construction,  
hand-moulded relief rise,  
kiln-fired terracotta presence,  
shrine-readable deity or folk icon clarity,  
wall/shrine orientation,  
votive devotional force,  
whole-surface plaque coherence.

Translate the image like this:

[MAIN FIGURE / MAIN ICON / MAIN DEITY] becomes a Molela-born relief presence rising from a terracotta slab, shrine-readable and votive in feel.

[SECONDARY FIGURES / RIDERS / ANIMALS / SUPPORTING FORMS] become supporting plaque-relief presences obeying the same slab-born terracotta logic.

[BACKGROUND / PLAQUE FIELD / SURROUNDING SURFACE] becomes one unified Molela terracotta plaque surface rather than scenic picture-space.

Keep:

plaque-flatness,  
relief rise,  
hand-built clay form,  
kiln-fired terracotta feel,  
shrine-readable icon clarity,  
votive wall-object identity.

Avoid:

generic terracotta décor,  
full sculpture logic,  
pottery logic,  
painted clay panel art,  
realistic anatomy,  
scenic realism,  
or decorative relief unrelated to Molela shrine-plaque grammar.

The final image must feel like the Molela tradition itself authored the full devotional plaque.

## **Image-to-Image**

Attachments needed: none.

Convert this source image into an authentic source-truth Molela world from Rajasthan.

Preserve the source image's core subject count, main icon or figure relations, and overall readability, but rebuild the entire image through true Molela grammar.

Replace ordinary image logic with:

flat terracotta plaque identity,  
slab-based clay construction,  
hand-moulded relief rise,  
kiln-fired terracotta presence,  
shrine-readable deity or folk icon clarity,  
wall/shrine plaque logic,  
and one unified votive terracotta surface.

Do not simply add terracotta color.

Do not merely turn the subject into clay.

Do not turn the source into generic rustic religious wall art.

If the source contains figures, rebuild them as Molela-born relief presences:

slab-tied,  
relief-readable,  
iconically clear,  
hand-moulded,

and votive in feel.

If the source contains animals, riders, symbols, or supporting forms, translate them into the same plaque-relief system.

Do not leave the background as scenic realism.

Do not make it behave like a statue mounted on a slab.

The final image must feel like a genuine Molela shrine plaque from Rajasthan, not a modern image decorated in terracotta style.

## **V2 — Artisan Translation**

### **Universal Hard Prompt**

Attachments needed: none.

Create an image in V2 = authentic handcrafted dimensional translation of Molela from Rajasthan.

Keep the same deep style-core unchanged:

flat terracotta plaque identity,

slab-based clay construction,

hand-moulded relief rise,

kiln-fired terracotta presence,

shrine-readable deity and folk icon clarity,

wall/shrine plaque logic,

votive devotional force,

and whole-surface plaque coherence.

Now translate that same source grammar into believable handcrafted dimensional form.

This is not generic 3D.

This is not freestanding sculpture.

This is not decorative terracotta wall art.

This is not pottery.

This is not realistic religious clay statuary.

The image must still feel authored by Molela plaque logic first.

Allow:

stronger clay object presence,

clearer relief hierarchy,

moderate depth in the rise from the slab,

stronger tactile terracotta material presence,

clearer separation between plaque field and raised forms,

more deployable dimensional readability,

stronger handmade clay structure,

but only within Molela plaque-relief logic.

Keep unchanged:

flat plaque identity,

slab-born relief construction,

kiln-fired earthy terracotta feel,

shrine-readable icon clarity,

votive devotional force,

wall-mounted plaque orientation.

Important version rule:

V2 for Molela must feel like a true shrine plaque entering handcrafted dimensional relief space,

not like a statue becoming attached to a wall.

If figures appear, they must remain Molela-born:

relief-built,

slab-tied,

hand-moulded,

iconically clear,

votive in presence,

not naturalistically sculpted.

If animals, riders, or supporting forms appear, they must also remain style-born:

they must belong to one plaque-relief world rather than a sculptural or scenic environment.

Do not allow:

generic relief craft panel,

freestanding deity logic,

realistic terracotta sculpture,

premium clay décor object,

ceramic polish,

or realism stronger than Molela plaque mechanics.

The final result must feel like the same Molela grammar has entered handcrafted dimensional plaque-world space without losing its votive slab identity.

## Reusable Variable Template

Attachments needed: none.

Create [SUBJECT / PLAQUE / DEVOTIONAL IMAGE / WALL OBJECT] in V2 = authentic handcrafted dimensional translation of Molela from Rajasthan.

Preserve these unchanged style-core rules:

flat terracotta plaque identity,  
slab-based clay construction,  
hand-moulded relief rise,  
kiln-fired terracotta presence,  
shrine-readable icon clarity,  
wall/shrine plaque logic,  
votive devotional force,  
whole-surface plaque coherence.

Translate the image like this:

[MAIN FIGURE / MAIN ICON / MAIN DEITY] becomes a dimensionally readable Molela relief presence with stronger clay object presence and clear slab attachment.

[SECONDARY FIGURES / RIDERS / ANIMALS / SUPPORTING FORMS] become supporting dimensional relief presences still arranged by Molela plaque logic.

[PLAQUE FIELD / SURROUNDING SURFACE / BACKGROUND] becomes a handcrafted terracotta plaque world with clear relief hierarchy, not scenic realism.

Increase:

moderate relief depth,

clay tactility,  
plaque-to-form separation,  
relief hierarchy,  
handmade terracotta presence,  
dimensional readability.

Do not lose:

flat plaque identity,  
slab-born form logic,  
votive shrine readability,  
kiln-fired terracotta feel,  
icon clarity,  
whole-plaque Molela coherence.

Avoid:

generic 3D clay art,  
statue logic,  
pottery-object behavior,  
decorative wall décor bias,  
realistic deity sculpture,  
or any realism stronger than Molela grammar.

The final image must feel like the same Molela source grammar has become a handcrafted dimensional plaque-world.

## Image-to-Image

Attachments needed: none.

Convert this source image into a V2 authentic handcrafted dimensional Molela world from Rajasthan.

Preserve the source image's main icon or figure arrangement and readable structure, but rebuild the entire image through Molela grammar translated into handcrafted dimensional form.

Replace ordinary image logic with:

flat terracotta plaque identity,

slab-based clay construction,

hand-moulded relief rise,

kiln-fired terracotta presence,

shrine-readable icon clarity,

and a dimensional but still style-born plaque world.

Allow moderate relief depth, stronger terracotta tactility, and clearer plaque-to-form separation, but do not let the image become a statue, pottery object, or generic clay wall art.

If the source contains figures, rebuild them as Molela-born relief presences rather than freestanding sculptures.

If the source contains animals, riders, symbols, or background, rebuild them inside the same plaque-relief system.

Do not leave the environment as scenic realism.

Do not make the result behave like a sculptural tableau.

The final image must feel like a handcrafted dimensional translation of the same Molela grammar.

## V3 — 3D / Realistic / Cinematic Translation

### **Universal Hard Prompt**

Attachments needed: none.

Create an image in V3 = fully resolved believable real-world 3D translation of Molela from Rajasthan while keeping the same source grammar unchanged.

This must become a fully embodied dimensional world, but it must still be ruled by Molela logic, not by generic terracotta sculpture realism, not by temple-statue logic, and not by decorative clay wall art.

Preserve the same unchanged deep style-core:

flat terracotta plaque identity,

slab-based clay construction,

hand-moulded relief rise,

kiln-fired terracotta presence,

shrine-readable deity and folk icon clarity,

wall/shrine plaque logic,

votive devotional force,

and full plaque-surface coherence.

Now push that same grammar into its most complete dimensional embodiment.

Increase:

full terracotta plaque presence,  
stronger material clarity,  
stronger relief-to-slab separation,  
stronger figure-ground readability,  
stronger clay-object coherence,  
full plaque-world completion,  
stronger shrine-object presence,  
stronger full-frame orchestration,  
but without replacing Molela with sculpture realism.

Critical rule:

V3 must still feel like the same Molela DNA fully embodied.

It must not become a freestanding statue.

It must not become realistic temple terracotta sculpture.

It must not become premium devotional clay décor.

It must not become a realistic relief mural.

It must not become a statue with a plaque behind it.

If figures appear, they must still remain Molela-born:

slab-tied,

relief-built,

hand-moulded,

votive in reading,

iconically clear,

not naturalistically sculpted.

If animals, riders, symbols, or supporting forms appear, they must also remain style-born:  
they must still belong to one unified plaque-relief world rather than a sculptural or scenic setting.

Plaque logic must remain stronger than sculpture logic.

Relief rise must remain stronger than full-round anatomy.

Kiln-fired terracotta presence must remain stronger than decorative polish.

The image must not collapse into generic devotional clay art.

Do not allow:

freestanding idol realism,

generic terracotta relief realism,

luxury clay object styling,

pottery logic,

scenic mural behavior,

or any second visual language overpowering Molela grammar.

The final result must feel like the same Molela grammar has become a fully inhabitable real-world plaque-relief reality.

## **Reusable Variable Template**

Attachments needed: none.

Create [SUBJECT / PLAQUE / DEVOTIONAL IMAGE / WALL OBJECT] in V3 = fully resolved believable real-world 3D translation of Molela from Rajasthan.

Keep these unchanged style-core rules:

flat terracotta plaque identity,  
slab-based clay construction,  
hand-moulded relief rise,  
kiln-fired terracotta presence,  
shrine-readable icon clarity,  
wall/shrine plaque logic,  
votive devotional force,  
whole-surface plaque coherence.

Translate the image like this:

[MAIN FIGURE / MAIN ICON / MAIN DEITY] becomes a fully embodied dimensional Molela relief presence with strong plaque attachment and clear votive authority.

[SECONDARY FIGURES / RIDERS / ANIMALS / SUPPORTING FORMS] become equally style-born dimensional plaque-relief presences.

[PLAQUE FIELD / BACKGROUND / SURROUNDING SURFACE] becomes a complete Molela plaque-world, not scenic realism.

Increase:

full terracotta plaque embodiment,  
material clarity,  
relief depth hierarchy,  
figure-ground readability,  
plaque-world completion,  
shrine-object presence,  
full-frame coherence.

Do not lose:

flat plaque identity,

slab-born relief logic,

kiln-fired terracotta feel,

votive shrine readability,

icon clarity,

whole-plaque Molela coherence.

Avoid:

freestanding sculpture realism,

realistic deity anatomy,

pottery logic,

decorative wall-art bias,

premium devotional clay décor,

or any realism stronger than Molela grammar.

The final image must feel like the same Molela source system has become fully embodied real-world plaque-relief reality.

## **Image-to-Image**

Convert this source image into a V3 fully resolved believable real-world Molela world from Rajasthan.

Preserve the source image's main icon or figure arrangement and readable structure, but rebuild all visible forms through fully embodied Molela grammar.

Replace ordinary image logic with:

flat terracotta plaque identity,

slab-based clay construction,  
hand-moulded relief rise,  
kiln-fired terracotta presence,  
shrine-readable icon clarity,  
wall/shrine plaque logic,  
and full-world Molela plaque coherence.

Expand the image into a complete dimensional Molela plaque-world:  
full terracotta plaque presence,  
clear relation between relief and slab,  
material clarity,  
figure-ground readability,  
plaque-world completion,  
and full-frame readability.

Do not turn the image into freestanding sculpture.  
Do not let it become realistic terracotta idol art.  
Do not let the background become scenic realism.  
Do not let only the main figure carry the style.

The final image must feel like Molela itself has become fully embodied real-world  
plaque-relief reality.
