

Nathdwara Pichhwai - Rajasthan

V1 — Authentic Style

Universal Hard Prompt

Create an image in pure authentic Nathdwara Pichhwai source-truth from Rajasthan.

This must be built from the true grammar of Nathdwara Pichhwai:

cloth-textile backdrop identity,
Shrinathji-centered devotional hierarchy,
darshan / seva logic,
seasonal and festival coding,
refined ornamental sacred-field organization,
precise contour discipline,
rich but controlled pigment behavior,
and a unified temple-backdrop image space.

Do not treat this as generic Krishna painting.

Do not treat it as miniature painting.

Do not treat it as Phad narrative scroll logic.

Do not treat it as luxury devotional decor.

Do not treat it as realistic temple scene painting.

Build the entire image as if it genuinely belongs inside the original Nathdwara temple-backdrop tradition.

The image must feel backdrop-authored:

a sacred textile-supported devotional field rather than a scenic environment.

The central sacred figure must hold absolute compositional authority.

Secondary figures, cows, peacocks, lotuses, garlands, shrines, ornaments, festival objects,
and surrounding decorative forms must all support that central darshan hierarchy.

Figure logic must remain source-born:

iconic sacred faces,
stylized devotional bodies,
calm ceremonial posture,
ritually composed gesture,
central figure dominance,
subordinate attendant/supporting forms.

Space must remain source-faithful:

no generic scenic realism,

no cinematic temple depth,
no ordinary background setting,
no narrative spread like a story scroll.
The field must feel like a sacred backdrop-space behind and around the deity.

Material memory must remain visible:
prepared painted cloth,
refined devotional surface,
ornamental finish,
textile-backed sacred image presence,
ritual darshan atmosphere.

Use Nathdwara Pichhwai color logic:
rich devotional reds, yellows, greens, blues, whites, blacks, and gold-accent logic,
festival and seasonal richness,
lotus-peacock-cow ornament handled as sacred support, not filler.

Do not add:
generic Krishna poster logic,
miniature-like court painting,
realistic pastoral cows,
luxury décor polish,
naturalistic garden or temple interior realism,
decorative cow-lotus wallpaper around a deity,
or any second visual language stronger than Nathdwara Pichhwai.

The final result must feel like a true Nathdwara Pichhwai cloth backdrop alive inside its original darshan-seva system.

Reusable Variable Template

Create [SUBJECT / DEVOTIONAL FIELD / SACRED IMAGE] using the authentic source-truth grammar of Nathdwara Pichhwai from Rajasthan.

Core style system to preserve:
cloth-textile backdrop identity,
Shrinathji-centered or deity-centered hierarchy,
darshan / seva logic,
seasonal-festival coding,
refined ornamental sacred-field organization,
precise contour structure,
devotional color hierarchy,
and one unified backdrop-authored sacred space.

Translate the image like this:

[MAIN SACRED FIGURE / CENTRAL DEVOTIONAL PRESENCE] becomes the dominant darshan anchor of the full field.

[SECONDARY FIGURES / COWS / PEACOCKS / LOTUSES / GARLANDS / OBJECTS] become supporting devotional presences arranged through Nathdwara Pichhwai hierarchy.

[ENVIRONMENT / SHRINE / BACKGROUND / DECORATIVE FIELD] becomes a sacred textile-backed backdrop-space rather than a realistic scenic setting.

Keep:

central devotional authority,
backdrop-space identity,
refined ornament,
textile memory,
festival and seasonal sacred coding,
contour-led devotional order.

Avoid:

generic Krishna art,
miniature logic,
Phad-like narrative spread,
luxury décor styling,
realistic temple space,
pastoral realism,
or decorative motif clutter without darshan structure.

The final image must feel like the Nathdwara Pichhwai tradition itself authored the full devotional field.

Image-to-Image

Convert this source image into an authentic source-truth Nathdwara Pichhwai painting from Rajasthan.

Preserve the source image's core subject count, central action or devotional relation, and overall readability, but rebuild the entire image through true Nathdwara Pichhwai grammar.

Replace ordinary image logic with:

cloth-textile backdrop identity,
central darshan hierarchy,
refined ornamental sacred field,
seasonal/festival devotional coding,
precise contour structure,
and a unified backdrop-space rather than realistic scene-space.

Do not simply add cows, lotuses, peacocks, or gold decoration.

Do not merely stylize the costume.

Do not turn the source into generic Krishna poster art.

If the source contains figures, rebuild them as Nathdwara Pichhwai-born devotional presences:

iconic faces,
stylized sacred bodies,
calm ceremonial gestures,
central hierarchy,
ornamental but controlled placement.

If the source contains animals, objects, flowers, architecture, or background, translate them into the same devotional backdrop system.

Do not leave the environment as neutral realism.

Do not collapse the result into miniature painting or scenic temple art.

The final image must feel like a genuine Nathdwara Pichhwai cloth backdrop used for darshan and seva, not a modern image decorated in devotional style.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Nathdwara Pichhwai from Rajasthan.

Keep the same deep style-core unchanged:

cloth-textile backdrop identity,
Shrinathji-centered devotional hierarchy,
darshan / seva logic,
seasonal-festival coding,
refined ornamental sacred-field organization,
precise contour behavior,
devotional color hierarchy,
and one unified backdrop-authored sacred space.

Now translate that same source grammar into handcrafted dimensional form.

This is not generic 3D.

This is not luxury devotional décor.

This is not a relief panel only.

This is not realistic temple art.

This is not a 3D Krishna poster.

The image must still feel authored by Nathdwara Pichhwai backdrop logic first.

Allow:

moderate figure and object thickness,
painted surfaces wrapping over form,
textile-backed material tactility,
shallow but readable spatial layering,
clearer separation between central figure and surrounding devotional supports,
stronger ornament depth,
more deployable visual readability,
but only within Nathdwara Pichhwai sacred-field logic.

Keep unchanged:

central darshan hierarchy,
backdrop-space rather than scenic realism,
refined contour-led devotional order,
ornamental discipline,
festival / seasonal coding,
Pichhwai-born figure logic,
and devotional field coherence.

Important version rule:

V2 for Nathdwara Pichhwai must feel like a sacred cloth backdrop and ornamental field
entering handcrafted dimensional image-space,
not like a realistic shrine scene gaining decoration.

If figures appear, they must remain Pichhwai-born:

iconic faces,
stylized sacred bodies,
calm ceremonial gesture,
center-led authority,
ornamental but controlled presence.

If cows, peacocks, lotuses, attendants, garlands, altar objects, structures, and background
appear, they must also remain style-born:

they must belong to one devotional backdrop-world, not a realistic environment.

Do not allow:

generic artisan 3D,
miniature drift,
luxury décor rendering,
realistic cows or birds,
temple interior realism,
garden realism,
normal humans with devotional styling,
or ornament stronger than darshan logic.

The final result must feel like the same Nathdwara Pichhwai grammar has entered
handcrafted dimensional devotional image-space without losing its temple-backdrop identity.

Reusable Variable Template

Create [SUBJECT / DEVOTIONAL FIELD / SACRED IMAGE] in V2 = authentic handcrafted dimensional translation of Nathdwara Pichhwai.

Preserve these unchanged style-core rules:

- cloth-textile backdrop identity,
- central darshan hierarchy,
- seva logic,
- seasonal-festival coding,
- refined ornamental sacred-field organization,
- precise contour order,
- devotional color hierarchy,
- unified backdrop-authored sacred space.

Translate the image like this:

[MAIN SACRED FIGURE / DEVOTIONAL CENTER] becomes a dimensionally readable painted devotional presence with moderate thickness and strong darshan authority.

[SECONDARY FIGURES / COWS / PEACOCKS / LOTUSES / OBJECTS / SUPPORTING FORMS] become supporting dimensional painted presences still arranged by Nathdwara Pichhwai hierarchy.

[BACKGROUND / SHRINE / ORNAMENTAL FIELD / STRUCTURES] become a handcrafted sacred backdrop-space with shallow layering and textile-backed devotional depth, not neutral realism.

Increase:

- moderate thickness,
- painted-surface tactility,
- ornamental depth,
- field readability,
- handcrafted dimensional presence,
- clearer separation of sacred center and support field.

Do not lose:

- cloth-backdrop identity,
- central sacred authority,
- darshan / seva logic,
- Pichhwai-born stylization,
- ornamental discipline,
- festival/season coding,
- devotional field coherence.

Avoid:

- generic 3D,
- miniature-like space,
- luxury decor art,

realistic shrine environment,
naturalistic cows or flowers,
poster-like Krishna centrality,
or any realism stronger than Nathdwara Pichhwai logic.

The final image must feel like the same Nathdwara Pichhwai source grammar has become a handcrafted dimensional devotional field.

Image-to-Image

Convert this source image into a V2 authentic handcrafted dimensional Nathdwara Pichhwai world.

Preserve the source image's main devotional relationship, subject count, and readable arrangement, but rebuild the entire image through Nathdwara Pichhwai grammar translated into handcrafted dimensional form.

Replace ordinary image logic with:
cloth-textile backdrop identity,
central darshan hierarchy,
refined ornamental sacred field,
seasonal/festival devotional coding,
precise contour-led organization,
and tactile painted-surface dimensionality.

Allow moderate thickness, shallow layering, ornament depth, and handcrafted spatial separation, but do not let the image become realistic temple art, generic 3D devotion, or luxury décor.

If the source contains figures, rebuild them as Nathdwara Pichhwai-born devotional presences rather than realistic bodies.

If the source contains animals, objects, flowers, shrine structures, or background, rebuild them inside the same sacred backdrop logic.

Do not leave the background as scenic realism.

Do not make the result a generic relief decoration panel.

The final image must feel like a handcrafted dimensional translation of the same Nathdwara Pichhwai devotional backdrop grammar.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of Nathdwara Pichhwai from Rajasthan while keeping the same source grammar unchanged.

This must become a fully embodied dimensional world, but it must still be ruled by Nathdwara Pichhwai logic, not by generic Krishna realism, luxury devotional décor, or cinematic temple spectacle.

Preserve the same unchanged deep style-core:
cloth-backdrop-origin logic,
Shrinathji-centered sacred hierarchy,
darshan / seva function,
seasonal-festival coding,
refined ornamental sacred-field organization,
precise contour order,
devotional color hierarchy,
and one unified backdrop-authored sacred space.

Now push that same grammar into its most complete dimensional embodiment.

Increase:
full volumetric presence,
material clarity,
textile-backed devotional material memory,
figure-ground separation,
ornamental field completion,
stronger spatial staging,
clearer sacred hierarchy,
stronger full-frame coherence,
but without replacing Nathdwara Pichhwai with realism logic.

Critical rule:
V3 must still feel like the same Nathdwara Pichhwai DNA fully embodied.
It must not become a realistic temple interior.
It must not become a realistic Krishna shrine painting.
It must not become luxury sacred concept art.
It must not become pastoral realism with Pichhwai motifs.

If figures appear, they must still remain Pichhwai-born:
iconic sacred faces,
stylized devotional bodies,
calm ceremonial gestures,
center-led hierarchy,
ornamental but controlled presence.

If cows, peacocks, lotuses, attendants, garlands, shrine forms, and background appear, they must also remain Pichhwai-born:
they must still belong to a unified darshan-oriented ornamental field rather than a neutral realistic environment.

Backdrop-space must remain stronger than scenic space.

The image must not collapse into one realistic moment.

Supporting motifs and field organization must still reinforce sacred darshan structure across the whole composition.

Do not allow:

generic cinematic Krishna realism,

miniature drift,

realistic temple or garden environment,

decorative luxury stronger than seva logic,

naturalistic cows or peacocks,

poster-devotional composition,

or any second visual language overpowering Nathdwara Pichhwai.

The final result must feel like the same Nathdwara Pichhwai grammar has become a fully inhabitable real-world devotional backdrop-world.

Reusable Variable Template

Create [SUBJECT / DEVOTIONAL FIELD / SACRED IMAGE] in V3 = fully resolved believable real-world 3D translation of Nathdwara Pichhwai.

Keep these unchanged style-core rules:

cloth-backdrop-origin logic,

central darshan hierarchy,

seva function,

seasonal-festival coding,

refined ornamental sacred-field organization,

precise contour structure,

devotional color hierarchy,

unified backdrop-authored sacred space.

Translate the image like this:

[MAIN SACRED FIGURE / DEVOTIONAL CENTER] becomes a fully embodied dimensional presence with strong darshan authority.

[SECONDARY FIGURES / COWS / PEACOCKS / LOTUSES / OBJECTS / SUPPORTING FORMS] become equally style-born dimensional devotional presences.

[BACKGROUND / SHRINE / ORNAMENTAL FIELD / STRUCTURES] become a complete inhabitable Nathdwara Pichhwai sacred backdrop-space, not neutral realism.

Increase:

full dimensional embodiment,

material clarity,

ornamental field completion,

figure-ground separation,

spatial staging,
devotional hierarchy clarity,
environmental completion under backdrop logic,
full-frame coherence.

Do not lose:

Nathdwara Pichhwai central hierarchy,
cloth-backdrop memory,
darshan / seva intelligence,
ornamental discipline,
Pichhwai-born figure logic,
festival/season coding,
devotional field coherence.

Avoid:

generic Krishna realism,
cinematic temple art,
miniature-like space,
luxury décor finish,
poster-devotional logic,
realistic temple interior or pastoral garden,
or any realism stronger than Nathdwara Pichhwai grammar.

The final image must feel like the same Nathdwara Pichhwai source system has become fully embodied real-world devotional reality.

Image-to-Image

Convert this source image into a V3 fully resolved believable real-world Nathdwara Pichhwai world.

Preserve the source image's main devotional relationship, subject count, core pose logic, and readable arrangement, but rebuild all visible forms through fully embodied Nathdwara Pichhwai grammar.

Replace ordinary realism with:

central darshan hierarchy,
cloth-backdrop devotional logic,
refined ornamental sacred-field organization,
seasonal/festival devotional coding,
precise contour-led grouping,
and full-world Nathdwara Pichhwai coherence.

Expand the image into a complete dimensional devotional field:

full volumetric presence,
clear figure-ground separation,

material clarity,
ornamental field completion,
stronger sacred hierarchy,
and full-frame readability.

Do not turn the image into realistic Krishna temple art.

Do not let it become luxury sacred décor.

Do not let the background become realistic shrine, courtyard, garden, or pastoral space.

Do not let only cows, lotuses, gold, or the central figure carry the style.

The final image must feel like Nathdwara Pichhwai itself has become fully embodied
real-world devotional backdrop reality.
