

# Saura - Odisha

## V1 — Authentic Style

### Universal Hard Prompt

Create an image in the **authentic source-faithful visual logic of Saura painting from Odisha**, treating it as a **ritual wall-painting sign system** rather than generic tribal decoration, Warli-like shorthand, decorative mural wallpaper, or realism with symbolic motifs added later.

Build the image as if it genuinely belongs inside the native Saura mural world of southern Odisha: a wall-born ritual image system made through direct symbolic line, reduced human and animal figure-signs, white or pale painted forms over an earthy red, maroon, brown, or clay wall ground, and a socially and cosmically ordered mural field. The image must feel like a real Saura ritual wall painting, not a modern illustration styled afterward.

Human figures must be built as **symbolic sign-figures**, not realistic bodies. Faces must remain reduced and role-readable, not portrait-like. Arms and legs must behave as direct action-bearing marks rather than naturalistic anatomy. Animals, birds, trees, huts, tools, Sun, Moon, and spiritual or ancestral presences must all be rebuilt through the same sign-language so the entire frame belongs to one Saura world.

The image must read as a **mural-field**, not as perspective-based scene space. Organize the frame through relation, rhythm, clustering, repetition, and symbolic placement instead of realistic foreground-background depth. Preserve the feeling of a belief-shaped wall image carrying communal, ancestral, ritual, and social-cosmic meaning. Keep the material behavior matte, earthen, direct, hand-applied, and wall-born.

Do not make this generic tribal stick-figure art. Do not drift into Warli body logic, triangle-body shorthand, circular dance cliché, or decorative ethnic patterning. Do not use glossy surface treatment, vector-clean graphic polish, posterized wall-art styling, realistic anatomy, realistic village scenery, or neutral lifestyle mural behavior. The final image must feel like **a true Saura ritual wall-painting system made the whole frame**.

### Reusable Variable Template

Create **[SUBJECT / SCENE / RITUAL MOMENT / SOCIAL MOMENT]** in the **authentic source-faithful visual logic of Saura painting from Odisha**, treating it as a ritual wall-painting sign system, not as generic tribal art.

Style system that must remain unchanged:

- wall-born ritual identity
- direct symbolic line as the primary engine
- reduced human and animal sign-figures
- white or pale painted figure language over earthy wall ground
- mural-field organization instead of realism-based space
- social-cosmic ordering through relation, rhythm, and clustering
- ancestral-devotional force
- whole-frame consistency across all elements

Translate the scene like this:

- **[MAIN FIGURES]** become Saura sign-figures built through reduced symbolic body logic
- **[SECONDARY FIGURES]** also obey the same sign-language and cannot become realistic
- **[ANIMALS / BIRDS / TREES / HUTS / TOOLS / CELESTIAL FORMS]** become part of the same symbolic mural system
- **[FIELD / BACKGROUND / SURROUNDING SPACE]** becomes a wall-born mural field organized by relation and symbolic spread, not by perspective realism
- **[RITUAL / ANCESTRAL / COSMIC PRESENCE IF NEEDED]** must feel integrated into the same visual language, not added as separate iconography

Keep:

- symbolic line clarity
- sign-based figure construction
- matte earthen wall memory
- social and ritual ordering
- mural-field rhythm
- strong white-on-earth contrast
- whole-frame Saura identity

Avoid:

- Warli-like shorthand
- generic tribal décor
- realism-based anatomy
- polished vector art
- wallpaper repetition with no field meaning
- realistic landscape or village depth
- only the figures carrying the style while the rest stays generic

The final result must feel like a true Saura mural world, not a decorative modern interpretation.

## Image-to-Image

Convert this source image into the **authentic source-faithful visual logic of Saura painting from Odisha**.

Preserve the source image's **subject count, core action, main relationships, and basic readability**, but rebuild the entire image through Saura mural grammar. Replace ordinary human bodies with reduced sign-figures. Replace realistic animals, trees, huts, tools, and surroundings with the same symbolic sign-based reduction. Replace perspective-based space with a relational mural field. Replace surface decoration with true wall-born image logic.

Use direct symbolic line, white or pale figure language over an earthy red, maroon, brown, or clay mural ground, socially ordered clustering, ritual-field readability, and an ancestral-devotional mural attitude. The result must still feel communal, sacred-social, and wall-born rather than decorative.

Do not merely place white stick-like figures onto the source image. Do not keep realistic anatomy underneath. Do not let the background remain realistic. Do not drift into generic tribal art, Warli-like body grammar, modern graphic icon design, or rustic lifestyle wall décor. The final image must feel as if the original scene was fully reauthored inside the true Saura mural system.

## V2 — Artisan Translation

### Universal Hard Prompt

Create an image in the **authentic handcrafted dimensional version of Saura painting from Odisha**. Preserve the same deep Saura source grammar, but translate it into believable handcrafted dimensional presence without losing its sign-born ritual wall logic.

This version must still feel completely Saura-born: direct symbolic line remains primary, reduced figure-sign construction remains intact, white-on-earth mural memory remains visible, and the image still behaves like a social-cosmic wall field rather than a realism-based scene. Dimensionality must emerge from Saura itself, not from ordinary realism added underneath.

Human figures must remain reduced symbolic bodies, not naturalistic anatomy. Animals, trees, huts, tools, celestial forms, and spiritual presences must remain in the same

sign-language. The image may gain handcrafted tactile depth, slight objecthood, layered mural separation, and richer relation between clusters, but it must still feel wall-born, ritual, matte, earthen, and hand-applied. Let the forms feel gently raised into handcrafted spatial presence while still clearly belonging to a sign-world rather than to sculptural realism.

The field must remain organized through relation, rhythm, repetition, and symbolic spread, not through perspective realism. Preserve the sacred-social mural attitude. Let the wall memory survive even as the forms gain a controlled dimensional body. The whole frame must still feel like one Saura system.

Do not turn this into tribal relief sculpture, rustic craft-store object art, generic 3D mural design, realistic village people with symbolic markings, or decorative earthy ambience. Do not let dimensionality erase line-based sign clarity. Do not let realism or scenic depth take over. The final result must feel like **Saura mural intelligence entering handcrafted dimensional presence while staying unmistakably Saura.**

## Reusable Variable Template

Create **[SUBJECT / SCENE / RITUAL MOMENT / SOCIAL MOMENT]** in the **authentic handcrafted dimensional version of Saura painting from Odisha.**

Unchanged style-core that must remain intact:

- wall-born ritual identity
- direct symbolic line as the main visual engine
- reduced figure-sign construction
- social-cosmic mural-field order
- white or pale figure language over earthy wall ground
- ancestral-devotional worldview
- whole-frame Saura consistency

Translate the scene like this:

- **[MAIN FIGURES]** become handcrafted dimensional Saura sign-figures with controlled tactile presence but no realism drift
- **[SECONDARY FIGURES]** remain in the same reduced body grammar
- **[ANIMALS / BIRDS / TREES / HUTS / TOOLS / CELESTIAL FORMS]** gain handcrafted dimensional presence without losing symbolic reduction
- **[FIELD / BACKGROUND / WALL SURFACE]** becomes a layered mural-field with matte earthen tactility and sign-based order, not perspective realism
- **[RITUAL / ANCESTRAL / COSMIC RELATION]** remains integrated into the full frame

Increase:

- tactile hand-applied material presence
- gentle dimensional body

- layered mural separation
- relation between figure clusters and support forms
- inhabitable handcrafted mural-world feeling

Do not lose:

- sign-based line clarity
- reduced figure logic
- wall-born identity
- social-cosmic field organization
- whole-frame Saura law

Avoid:

- sculptural realism
- tribal relief-object drift
- rustic décor aesthetics
- realistic humans or animals
- generic 3D mural styling
- decorative earthy texture without Saura structure
- environment becoming more realistic than the figures

The final result must feel like the same Saura system has entered handcrafted dimensional space.

## Image-to-Image

Convert this source image into the **authentic handcrafted dimensional version of Saura painting from Odisha**.

Preserve the source image's **subject count, primary action, pose relationships, and scene readability**, but reconstruct every visible element through Saura's ritual wall-painting grammar translated into handcrafted dimensional presence. Keep the direct symbolic line intelligence. Keep reduced sign-figure bodies. Keep the white-on-earth mural memory. Keep the mural-field order. Then let the image gain controlled tactile depth, slight object-presence, and hand-built layered field separation without losing the sign-world.

Humans, animals, trees, huts, tools, celestial forms, and surrounding space must all inherit the same Saura grammar. Do not keep realistic bodies or backgrounds and merely stylize the surface. Do not make the scene into sculptural tribal décor or an earthy craft-object illustration. Do not let the field turn into ordinary depth-based environment space.

The final result must feel as if the original scene has been fully rebuilt as a handcrafted dimensional Saura mural-world.

## V3 — 3D / Realistic / Cinematic Translation

### Universal Hard Prompt

Create an image in the **fully resolved believable real-world 3D version of Saura painting from Odisha**. Preserve the same deep Saura source grammar, but translate the entire sign-world into its most complete believable dimensional reality without changing the style-core.

Real-world here does not mean replacing Saura with generic realism. It means believable material presence, spatial separation, environmental completion, figure-ground clarity, and full world embodiment while the Saura system still controls the entire frame. The image must feel like **Saura itself became reality**, not reality decorated with Saura afterward.

Keep the same root grammar: wall-born ritual intelligence, direct symbolic line, reduced figure-sign construction, white-on-earth memory, mural-field order, ancestral-devotional worldview, and social-cosmic relation. Human bodies must still read as Saura-born rather than naturalistic anatomy. Animals, trees, huts, tools, and celestial forms must still obey Saura reduction and sign-law. The full environment must remain generated by the same grammar.

Translate the mural-field into a believable world: stronger material-light interaction, richer spatial separation, fuller environmental embodiment, stronger relation between human clusters and surrounding elements, stronger object-presence, and complete world-scale orchestration. But do not let realism become the main driver. Do not allow a realistic tribal village scene with Saura graphics pasted on top. Do not let only the wall remain stylized while everything else turns ordinary. Do not replace sign-born logic with ethnographic realism or cinematic tribal fantasy.

The final result must feel like **the entire Saura social-cosmic mural system became a believable world**, while remaining unmistakably Saura in figures, objects, environment, spacing, and worldview.

### Reusable Variable Template

Create [SUBJECT / SCENE / RITUAL MOMENT / SOCIAL MOMENT] in the **fully resolved believable real-world 3D version of Saura painting from Odisha**.

What must remain unchanged:

- Saura ritual wall-painting identity remains the driver

- direct symbolic line intelligence still shapes the world
- human bodies remain Saura-born sign-bodies, not generic realism
- animals, trees, huts, tools, celestial forms, and field relations remain under the same reduction logic
- white-on-earth mural memory still survives
- social-cosmic mural order still organizes the frame
- ancestral-devotional worldview remains intact
- the whole frame remains one Saura language

Translate the scene like this:

- **[MAIN FIGURES]** become fully embodied dimensional Saura presences while still remaining sign-born
- **[SECONDARY FIGURES]** also obey the same body and action grammar
- **[ANIMALS / TREES / HUTS / TOOLS / CELESTIAL FORMS]** become believable dimensional elements shaped by Saura reduction logic
- **[FIELD / BACKGROUND / ENVIRONMENT]** becomes a complete believable world still organized as Saura mural order rather than generic perspective realism
- **[RITUAL / ANCESTRAL / COSMIC PRESENCE]** must remain integrated into the total environment

Increase:

- full embodied dimensionality
- environmental completion
- figure-ground control
- material clarity
- spatial separation
- world-scale relation

Do not lose:

- sign-based figure construction
- direct line intelligence
- ritual-social worldview
- wall-born memory
- social-cosmic ordering
- whole-frame Saura consistency

Avoid:

- realistic tribal village illustration
- ethnographic realism
- generic cinematic fantasy
- realistic anatomy with symbolic overlay
- only the wall or markings staying stylized
- decorative tribal production design
- Warli-like shorthand
- realism with Saura graphics pasted later

The final result must feel like the full Saura grammar has become believable reality without changing its source identity.

## Image-to-Image

Convert this source image into the **fully resolved believable real-world 3D version of Saura painting from Odisha**.

Preserve the source image's **subject count, main action, key relationships, and readability**, but rebuild every visible form through Saura's ritual mural grammar translated into a believable dimensional world. Replace generic bodies with Saura-born sign-bodies. Replace realistic animals, huts, trees, tools, and landscape logic with Saura-shaped world logic. Replace ordinary environment space with a complete social-cosmic Saura world.

Allow the image to become materially believable, spatially complete, and environmentally rich, but do not let generic realism take over. Every part of the frame must still belong to the same Saura system: humans, animals, trees, huts, tools, Sun, Moon, ritual presences, ground, spacing, and environmental structure must all feel generated by one sign-world.

Do not put Saura markings on a realistic image. Do not stylize only the wall. Do not keep ordinary human anatomy. Do not turn the image into rustic realism or decorative tribal cinema. The final result must feel like the source image has been fully reauthored as a believable world built from Saura itself.
