

Usta, Thewa, Blue Pottery - Rajasthan

as conditional-primary depending on translation

V1 — Authentic Style

Universal Hard Prompt

Attachments needed: none.

Create an image in pure authentic source-truth Usta from Rajasthan.

Treat this as a true Bikaner gold-embossed ornamental surface tradition, not as miniature painting, not as flat palace ornament, not as generic gold decoration, not as metallic wallpaper, and not as luxury décor without craft-process memory.

Build the image from the true grammar of Usta:
raised embossed surface-building,
gold-led hierarchy,
Mughal-floral and geometric ornament discipline,
fine brush completion,
courtly luxury-surface logic,
object or architectural skin intelligence,
and full-surface ornamental coherence.

The image must feel like it genuinely belongs inside the original Usta tradition.

Keep the whole frame inside one surface-authored visual language.

The surface itself must be source-born:
embossed rise first, not flat painting first,
gold structurally dominant, not just present,
ornamental field built across a prepared surface,
fine detailing over raised forms,
courtly refinement, not rustic decoration,
object or architectural skin logic, not picture-panel logic.

Motif logic must remain source-faithful:
disciplined floral ornament,
geometric ornamental control,
courtly arabesque spread where relevant,
framed luxury-field order,
surface-wide richness with hierarchy,
not freehand folk floral drawing.

Material memory must remain visible:

prepared surface,
raised paste-built ornament,
gold foil authority,
fine painted detailing,
luxury craft finish,
not printed metallic effect,
not synthetic gold shine,
not machine-perfect uniformity.

Use Usta color logic:

gold must remain primary,
supporting red, green, and blue accents where needed,
jewel-like richness,
controlled hierarchy,
never open painterly atmosphere,
never textile-like palette behavior.

Do not add:

generic gold décor,
miniature painting with gold accents,
flat leather painting,
metallic wallpaper logic,
brocade-textile logic,
generic palace-luxury mood,
or any second decorative language stronger than Usta.

The final result must feel like true Usta surface work from Rajasthan at source-truth level, not a modern image decorated with golden floral ornament.

Reusable Variable Template

Attachments needed: none.

Create [SUBJECT / OBJECT / SURFACE / ARCHITECTURAL ZONE] using the authentic source-truth grammar of Usta from Rajasthan.

Core style system to preserve:

embossed surface rise,
gold-led hierarchy,
Mughal floral/geometric ornament discipline,
fine brush completion,
courtly luxury-surface identity,
object/architectural skin logic,
whole-surface Usta coherence.

Translate the image like this:

[MAIN SURFACE / MAIN OBJECT / MAIN ZONE] becomes a true Usta-authored embossed gold surface with courtly ornamental order.

[SECONDARY SURFACES / SUPPORTING ELEMENTS / ORNAMENTAL AREAS] become supporting Usta presences obeying the same raised gold hierarchy.

[BACKGROUND / SURROUNDING FIELD / ARCHITECTURAL CONTEXT] becomes a unified Usta ornamental skin rather than neutral realism or picture-space.

Keep:

embossed rise,
gold dominance,
surface-wide ornament hierarchy,
courtly refinement,
fine detail over raised structure,
Bikaner luxury-surface discipline.

Avoid:

generic gold luxury design,
flat painting with gold highlights,
miniature drift,
metallic wallpaper behavior,
textile-like ornament logic,
or a realistic world with Usta motifs pasted on top.

The final image must feel like the Usta tradition itself authored the full ornamental surface.

Image-to-Image

Attachments needed: none.

Convert this source image into an authentic source-truth Usta world from Rajasthan.

Preserve the source image's core structure, main object or surface relations, and overall readability, but rebuild the entire image through true Usta grammar.

Replace ordinary image logic with:

embossed surface-building,
gold-led hierarchy,
Mughal floral/geometric ornamental discipline,
fine brush completion,
courtly luxury-surface logic,
and full-surface Usta coherence.

Do not simply add gold.

Do not merely overlay floral motifs.

Do not turn the source into generic palace decoration.

If the source contains objects, architectural areas, borders, compartments, or surface zones, rebuild them as Usta-born presences:

raised,
gold-ordered,
refined,
surface-authored,
and ornamentally disciplined.

Do not leave the base surface generic.

Do not make it behave like a picture panel.

Do not make it flat.

The final image must feel like a genuine Usta ornamental surface from Rajasthan, not a modern image decorated in gold floral style.

V2 — Artisan Translation

Universal Hard Prompt

Attachments needed: none.

Create an image in V2 = authentic handcrafted dimensional translation of Usta from Rajasthan.

Keep the same deep style-core unchanged:
embossed surface rise,
gold-led hierarchy,
Mughal floral/geometric ornament discipline,
fine brush completion,
courtly luxury-surface logic,
object/architectural skin intelligence,
and full-surface Usta coherence.

Now translate that same source grammar into believable handcrafted dimensional form.

This is not generic 3D.

This is not palace fantasy décor.

This is not metallic interior design.

This is not miniature painting with relief.

This is not luxury object styling without Usta process memory.

The image must still feel authored by Usta surface logic first.

Allow:

stronger embossed object presence,
clearer relief hierarchy,
stronger tactile surface depth,
clearer separation between raised ornament and base surface,
more deployable dimensional readability,
more material presence,
but only within true Usta surface grammar.

Keep unchanged:

gold remains structurally dominant,
ornament remains courtly and disciplined,
surface logic remains stronger than picture logic,
fine detail remains part of the finish,
base support still feels prepared for Usta work,
not generic decorative luxury material.

Important version rule:

V2 for Usta must feel like true embossed Bikaner surface work entering handcrafted dimensional luxury-surface space,
not like a decorative gold design becoming more realistic.

If the image includes objects or architecture, they must remain Usta-born:

surface-driven,
embossed,
gold-ordered,
refined,
and fully coherent as ornamental skin.

Do not allow:

generic artisan luxury object,
flat painted ornament with depth added,
metallic wallpaper embossing,
interior-design gold styling,
textile or brocade logic,
or realism stronger than Usta embossed-surface intelligence.

The final result must feel like the same Usta grammar has entered handcrafted dimensional surface-world space without losing its raised gold courtly identity.

Reusable Variable Template

Attachments needed: none.

Create [SUBJECT / OBJECT / SURFACE / ARCHITECTURAL ZONE] in V2 = authentic handcrafted dimensional translation of Usta from Rajasthan.

Preserve these unchanged style-core rules:
embossed surface rise,
gold-led hierarchy,
Mughal floral/geometric ornament discipline,
fine brush completion,
courtly luxury-surface identity,
object/architectural skin logic,
whole-surface Usta coherence.

Translate the image like this:

[MAIN SURFACE / MAIN OBJECT / MAIN ZONE] becomes a dimensionally readable Usta surface with stronger raised ornament and clearer gold hierarchy.

[SECONDARY SURFACES / SUPPORTING ELEMENTS / ORNAMENTAL AREAS] become supporting dimensional Usta presences still arranged by the same courtly surface grammar.

[BACKGROUND / SURROUNDING FIELD / ARCHITECTURAL CONTEXT] becomes a handcrafted Usta ornamental surface-world, not neutral realism.

Increase:

embossed depth,
surface tactility,
relief-to-base separation,
gold-material interaction,
ornamental field readability,
handcrafted dimensional clarity.

Do not lose:

embossed rise,
gold dominance,
courtly motif discipline,
fine brush finish,
surface-authored logic,
Bikaner Usta identity.

Avoid:

generic 3D luxury decoration,
flat gold ornament,
miniature drift,
metallic wallpaper logic,
brocade-textile behavior,
or any realism stronger than Usta grammar.

The final image must feel like the same Usta source grammar has become a handcrafted dimensional luxury-surface world.

Image-to-Image

Attachments needed: none.

Convert this source image into a V2 authentic handcrafted dimensional Usta world from Rajasthan.

Preserve the source image's main object/surface arrangement and readable structure, but rebuild the entire image through Usta grammar translated into handcrafted dimensional form.

Replace ordinary image logic with:
embossed surface rise,
gold-led hierarchy,
Mughal floral/geometric ornament,
fine brush completion,
courtly luxury-surface logic,
and a dimensional but still style-born Usta surface-world.

Allow stronger embossed depth, tactile luxury-surface presence, and clearer relief structure, but do not let the image become generic gold décor, interior-design styling, or flat ornament with depth effects.

If the source contains objects, architecture, zones, or panels, rebuild them through Usta surface logic rather than neutral realism.

Do not leave the base generic.

Do not make the result look like premium décor with Usta-like pattern.

The final image must feel like a handcrafted dimensional translation of the same Usta grammar.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Attachments needed: none.

Create an image in V3 = fully resolved believable real-world 3D translation of Usta from Rajasthan while keeping the same source grammar unchanged.

This must become a fully embodied dimensional world, but it must still be ruled by Usta logic, not by generic luxury décor realism, not by cinematic palace spectacle, and not by metallic design language.

Preserve the same unchanged deep style-core:
embossed surface rise,
gold-led hierarchy,

Mughal floral/geometric ornament discipline,
fine brush completion,
courtly luxury-surface logic,
object/architectural skin intelligence,
and full Usta coherence.

Now push that same grammar into its most complete dimensional embodiment.

Increase:
full embossed-surface presence,
stronger material clarity,
stronger relief-to-surface separation,
stronger gold-material interaction,
full object/architectural skin completion,
stronger ornamental depth hierarchy,
stronger full-frame coherence,
but without replacing Usta with realism logic.

Critical rule:
V3 must still feel like the same Usta DNA fully embodied.
It must not become generic palace luxury art.
It must not become metallic décor realism.
It must not become interior-design fantasy.
It must not become flat ornament with rich lighting.
It must not become another decorative-luxury style.

If the image includes objects or architecture, they must still remain Usta-born:
embossed,
gold-governed,
court-disciplined,
surface-authored,
and fully coherent as ornamental skin rather than neutral material.

Surface logic must remain stronger than picture logic.
Embossed rise must remain stronger than flat decoration.
Gold hierarchy must remain stronger than atmospheric rendering.
The image must not collapse into generic high-end palace beauty.

Do not allow:
generic gold décor realism,
metallic wallpaper behavior,
luxury-brand surface polish,
cinematic palace spectacle,
miniature painting drift,
brocade/textile reinterpretation,
or any second decorative language overpowering Usta grammar.

The final result must feel like the same Usta grammar has become a fully inhabitable real-world embossed-surface reality.

Reusable Variable Template

Attachments needed: none.

Create [SUBJECT / OBJECT / SURFACE / ARCHITECTURAL ZONE] in V3 = fully resolved believable real-world 3D translation of Usta from Rajasthan.

Keep these unchanged style-core rules:

embossed surface rise,
gold-led hierarchy,
Mughal floral/geometric ornament discipline,
fine brush completion,
courtly luxury-surface identity,
object/architectural skin logic,
whole-surface Usta coherence.

Translate the image like this:

[MAIN SURFACE / MAIN OBJECT / MAIN ZONE] becomes a fully embodied Usta surface with strong embossed presence and structurally dominant gold hierarchy.

[SECONDARY SURFACES / SUPPORTING ELEMENTS / ORNAMENTAL AREAS] become equally style-born dimensional Usta presences.

[BACKGROUND / SURROUNDING FIELD / ARCHITECTURAL CONTEXT] becomes a complete Usta surface-world, not neutral realism.

Increase:

full embossed embodiment,
material clarity,
gold-surface interaction,
relief hierarchy,
surface-world completion,
object/architectural skin coherence,
full-frame orchestration.

Do not lose:

embossed rise,
gold dominance,
courtly motif discipline,
fine finish,
surface-authored logic,
Bikaner Usta identity.

Avoid:

generic luxury decoration,

metallic décor realism,
cinematic palace atmosphere,
flat gold painting,
brocade/textile logic,
or any realism stronger than Usta grammar.

The final image must feel like the same Usta source system has become fully embodied real-world embossed-surface reality.

Image-to-Image

Attachments needed: none.

Convert this source image into a V3 fully resolved believable real-world Usta world from Rajasthan.

Preserve the source image's main object/surface arrangement and readable structure, but rebuild all visible forms through fully embodied Usta grammar.

Replace ordinary image logic with:
embossed surface rise,
gold-led hierarchy,
Mughal floral/geometric ornament discipline,
fine brush completion,
courtly luxury-surface logic,
and full-world Usta coherence.

Expand the image into a complete dimensional Usta surface-world:
full embossed presence,
clear relation between raised ornament and base,
material clarity,
gold hierarchy,
surface-world completion,
and full-frame readability.

Do not turn the image into generic palace luxury art.
Do not let it become metallic décor realism.
Do not let the base remain neutral.
Do not let only the motifs carry the style.

The final image must feel like Usta itself has become fully embodied real-world embossed-surface reality.
