

# Cheriyal - Telangana

## V1 — Authentic Style

### Universal Hard Prompt

Create an image in pure authentic source-truth Cheriyal from Telangana.

Treat this as a true painted narrative cloth-scroll storytelling system, not as miniature painting, not as mythological poster art, not as generic folk illustration, and not as decorative red-background panel art.

Build the image from the true grammar of Cheriyal:

painted cloth-scroll identity,  
sequential storytelling structure,  
bold storyteller-readable figures,  
red-ground dominance,  
stylized local figure grammar,  
mythology / folklore / community-story world,  
oral-performance readability,  
and whole-scroll Cheriyal coherence.

The image must feel like it genuinely belongs inside the original Cheriyal tradition.

Keep the whole frame inside one scroll-authored visual language.

The surface itself must be source-born:

painted cloth, not print,  
scroll continuity, not framed poster logic,  
sequential narrative order, not one isolated scene,  
bold contour and direct readability, not atmospheric subtlety,  
storytelling support, not scenic image-making.

Narrative logic must remain source-faithful:

episode order,  
panel progression,  
scroll-based continuity,  
compressed storytelling clarity,  
mythological, folkloric, devotional, village-life, or community-story readability,  
all arranged for oral narration rather than cinematic scene realism.

Figure logic must remain source-faithful:

gods, heroes, villagers, animals, saints, and story characters must feel bold,  
frontally or clearly profiled,  
stylized,  
direct,

panel-compatible,  
and readable from a storyteller's point of view rather than realism-based.

Material memory must remain visible:

prepared cloth support,  
painted narrative surface,  
red-led scroll structure,  
handmade painted readability,  
not glossy,  
not printed,  
not digital-folk poster polish.

Use Cheriya color logic:

strong red-ground dominance,  
clear yellow, blue, green, white, and black support,  
bold flat-to-semi-flat color readability,  
never tonal realism,  
never cinematic lighting hierarchy,  
never poster-style gradient drama.

Do not add:

miniature detailing logic,  
generic red folk paneling,  
mythological calendar-poster art,  
comic-book simplification,  
scenic realism,  
or any second visual language stronger than Cheriya.

The final result must feel like true Cheriya storytelling-scroll work from Telangana at source-truth level, not a modern illustration decorated with Cheriya-like colors and motifs.

## **Reusable Variable Template**

Create [SUBJECT / STORY / SCENE / SCROLL WORLD] using the authentic source-truth grammar of Cheriya from Telangana.

Core style system to preserve:

painted cloth-scroll identity,  
sequential storytelling structure,  
bold storyteller-readable figures,  
red-ground dominance,  
stylized local figure grammar,  
oral-performance readability,  
whole-scroll Cheriya coherence.

Translate the image like this:

[MAIN EPISODE / MAIN FIGURE / MAIN SCROLL FIELD] becomes a Cheriya-born painted narrative presence organized for oral storytelling.

[SECONDARY FIGURES / SUPPORTING EPISODES / OBJECTS / ANIMALS] become supporting Cheriya presences obeying the same sequential scroll logic.

[BACKGROUND / WORLD / SURROUNDING AREAS] becomes a Cheriya-authored painted storytelling field rather than scenic realism or poster composition.

Keep:

cloth-scroll identity,  
episode order,  
red-ground structure,  
bold contour clarity,  
narrative compression,  
storyteller usability,  
Cheriya figure logic.

Avoid:

poster art,  
miniature drift,  
generic folk illustration,  
decorative red paneling,  
comic-strip simplification,  
or a realistic world with Cheriya styling pasted on top.

The final image must feel like the Cheriya tradition itself authored the full storytelling-scroll world.

## **Image-to-Image**

Convert this source image into an authentic source-truth Cheriya world from Telangana.

Preserve the source image's core subject count, main story relations, and overall readability, but rebuild the entire image through true Cheriya grammar.

Replace ordinary image logic with:

painted cloth-scroll identity,  
sequential storytelling structure,  
bold narrator-readable figures,  
red-ground dominance,  
stylized local figure grammar,  
oral-performance readability,  
and full Cheriya scroll coherence.

Do not simply recolor the background red.

Do not merely flatten the image into folk art.

Do not turn the source into generic mythological poster painting.

If the source contains figures, rebuild them as Cheriya-born narrative presences:  
stylized,  
direct,  
story-readable,  
panel-compatible,  
and suited to oral narration.

If the source contains supporting objects, animals, or background, translate them into the same sequential painted-scroll system.  
Do not leave the image as scenic realism.  
Do not make it a static decorative panel.

The final image must feel like a genuine Cheriya painted storytelling-scroll from Telangana, not a modern image decorated in folk-scroll style.

## **V2 — Artisan Translation**

### **Universal Hard Prompt**

Create an image in V2 = authentic handcrafted dimensional translation of Cheriya from Telangana.

This is not a literal painted-scroll mockup.  
This is not craft-surface texture added on top of a normal image.  
This is not generic folk painting made slightly more dimensional.  
This is not poster art with handmade texture.  
This is not realism-first scene styling.

Preserve the same deep Cheriya grammar unchanged:  
painted cloth-scroll identity,  
sequential storytelling structure,  
bold storyteller-readable figures,  
red-ground dominance,  
stylized local figure grammar,  
mythology / folklore / community-story world,  
oral-performance readability,  
and whole-scroll Cheriya coherence.

Now re-author that same grammar into a richer, more inventive, more dimensional 2D + 3D hybrid image-form.

The added dimensionality must come from Cheriya's own logic:  
painted-plane hierarchy,

scroll-sequence rhythm,  
panel relation,  
figure grouping,  
narrative compression,  
red-ground structuring,  
story-episode layering,  
and full-frame painted storytelling intelligence.

Do not only improve texture.  
Transform the full image logic:  
form,  
construction,  
grouping,  
silhouette,  
objects,  
environment,  
spatial organization,  
and full-frame visual language.

If figures appear, they must not remain generic painted folk figures inside a normal scene.  
They must become Cheriya-born presences:  
face logic shaped by narrative clarity,  
body logic shaped by panel-readability,  
silhouette logic shaped by stylized storytelling compression,  
grouping shaped by scroll order and episode relation,  
objects and props translated into the same painted narrative system.

If environment appears, it must not remain generic realism.  
It must already begin to feel re-authored by Cheriya:  
painted-plane spatial ordering,  
narrative field construction,  
episode-based grouping,  
red-ground controlled world logic,  
not just normal scenery with Cheriya figures placed inside it.

Believable depth must come from Cheriya itself,  
not from generic cinematic depth,  
not from default realism,  
not from standard 3D rendering habits.

Keep:  
source-rooted Cheriya identity,  
scroll-sequence logic,  
storyteller readability,  
red-ground structure,  
creative artisan translation,  
stylized narrative control,  
full-frame style authorship.

Do not allow:  
poster-art realism,  
miniature drift,  
comic-book simplification,  
generic folk painting with extra depth,  
texture-only styling,  
or a normal image underneath with Cheriya applied afterward.

The final result must feel like Cheriya itself has creatively re-authored the image into a richer, more dimensional, more inventive storytelling-scroll world while still remaining fully Cheriya-born.

## **Reusable Variable Template**

Create [SUBJECT / STORY / SCENE / SCROLL WORLD] in V2 = authentic handcrafted dimensional translation of Cheriya from Telangana.

Preserve these unchanged deep style-core rules:

painted cloth-scroll identity,  
sequential storytelling structure,  
bold storyteller-readable figures,  
red-ground dominance,  
stylized local figure grammar,  
oral-performance readability,  
whole-scroll Cheriya coherence.

Translate the image like this:

[MAIN EPISODE / MAIN FIGURE / MAIN SCROLL FIELD] becomes a Cheriya-born dimensional narrative presence built through painted-plane hierarchy, figure grouping, and sequential scroll intelligence.

[SECONDARY FIGURES / EPISODES / OBJECTS / SUPPORTING ELEMENTS] become supporting Cheriya presences governed by the same storytelling structure.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a creatively re-authored Cheriya space where grouping, depth, and spatial rhythm come from scroll and narrative logic rather than neutral realism.

Increase:

dimensional presence,  
painted-plane depth,  
episode hierarchy,  
grouped figure relation,  
scroll-based world-building,  
inventive Cheriya storytelling space.

Do not lose:

cloth-scroll identity,  
sequence logic,  
storyteller readability,  
red-ground authority,  
stylized figure grammar,  
full-frame Cheriya control.

Avoid:  
painted-scroll mockup,  
poster art,  
miniature realism,  
generic folk illustration,  
comic-strip drift,  
or a realistic world with Cheriya decoration added later.

The final image must feel like the same Cheriya grammar has been creatively translated into a richer, more dimensional, more scene-capable visual form.

## **Image-to-Image**

Convert this source image into a V2 authentic handcrafted dimensional Cheriya world from Telangana.

Preserve the source image's main action, subject count, pose relations, and overall readability, but rebuild the entire image through Cheriya grammar translated into a richer, more dimensional, more inventive hybrid image-form.

Replace ordinary image logic with:  
painted cloth-scroll identity,  
sequential storytelling structure,  
bold narrator-readable figures,  
red-ground dominance,  
stylized narrative figure grammar,  
oral-performance readability,  
and full-frame Cheriya coherence.

Do not simply add a red background.  
Do not just divide the image into panels.  
Do not make it a painted-scroll mockup.

Rebuild the image so that:  
forms are organized through Cheriya's narrative logic,  
depth comes from painted-plane relation and episode hierarchy,  
figures become Cheriya-born storytelling presences,  
objects and environment begin to behave like a Cheriya-authored world,  
not a normal realistic world with folk styling.

If the source contains figures, rebuild them as Cheriya-born presences rather than generic figures in folk treatment.

If the source contains environments, rebuild them through Cheriya visual ontology rather than neutral realism.

The final image must feel like a true creative artisan translation of Cheriya into a richer dimensional storytelling-scroll world, not a normal image with handmade folk texture.

## V3 — 3D / Realistic / Cinematic Translation

### Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of Cheriya from Telangana while keeping the same source grammar unchanged.

This is not realism replacing style.

This is not cinematic mythological illustration.

This is not poster realism with Cheriya colors.

This is not a normal world with folk motifs added afterward.

This is not generic realism with red background and stylized costumes.

Preserve the same deep Cheriya grammar unchanged:

painted cloth-scroll identity,

sequential storytelling structure,

bold storyteller-readable figures,

red-ground dominance,

stylized local figure grammar,

mythology / folklore / community-story world,

oral-performance readability,

and whole-scroll Cheriya coherence.

Now push that same grammar into its most complete, most fully embodied, most fully resolved, most fully inhabitable dimensional world state.

The entire visible world must be generated by Cheriya logic.

That means the transformation must affect everything:

faces,

bodies,

hands,

feet,

posture,

gesture,

hair logic,

props,

animals,  
objects,  
ground,  
architecture,  
trees,  
plants,  
sky treatment,  
empty space,  
environment rhythm,  
foreground,  
midground,  
background,  
and the full-frame visual language.

Nothing important may remain generic realism.

Cheriyal must control reality through its own logic:  
painted-plane hierarchy,  
scroll-sequence thinking,  
episode order,  
narrative compression,  
bold contour identity,  
red-ground structuring,  
storyteller readability,  
and full-world painted storytelling ontology.

Believable here must mean:  
believable volume,  
believable spatial relation,  
believable material embodiment,  
believable environmental completion,  
believable inhabitable world logic.

It must not mean:  
realistic anatomy takeover,  
cinematic scene takeover,  
poster-style realism,  
naturalistic foliage and architecture,  
normal village scene with Cheriyal styling,  
or realism-first image making.

If figures appear, they must be fully Cheriyal-born:  
face construction shaped by stylized narrative clarity,  
body logic shaped by painted storytelling compression,  
silhouette logic shaped by bold contour and panel-based readability,  
gesture and grouping integrated into the same Cheriyal world system.

If environment appears, it must also be fully Cheriyal-born:

ground, structures, trees, space, and atmosphere must all belong to one uninterrupted Cheriya world,  
not a normal realistic environment underneath.

If you remove decorative cues, the image should still feel Cheriya through:  
form construction,  
body logic,  
object logic,  
environment logic,  
spatial organization,  
narrative ordering,  
and full-world visual ontology.

Keep:  
same deep Cheriya grammar,  
full world embodiment,  
full environmental completion,  
stronger figure-ground hierarchy,  
stronger spatial separation,  
stronger object presence,  
stronger total-frame style control.

Do not allow:  
poster realism,  
cinematic mythology art,  
miniature drift,  
comic-book simplification,  
generic folk painting realism,  
or any second visual language stronger than Cheriya.

The final result must feel like Cheriya itself has taken over the whole visible world and fully generated reality through painted storytelling-scroll logic, not like realism with Cheriya decoration.

## **Reusable Variable Template**

Create [SUBJECT / STORY / SCENE / WORLD] in V3 = fully resolved believable real-world 3D translation of Cheriya from Telangana.

Keep these unchanged deep style-core rules:  
painted cloth-scroll identity,  
sequential storytelling structure,  
bold storyteller-readable figures,  
red-ground dominance,  
stylized local figure grammar,  
oral-performance readability,

whole-scroll Cheriya coherence.

Translate the image like this:

[MAIN EPISODE / MAIN FIGURE / MAIN FIELD] becomes a fully embodied Cheriya-born presence generated through scroll-sequence logic, painted-plane hierarchy, red-ground structuring, and full storytelling-world control.

[SECONDARY FIGURES / EPISODES / SUPPORTING ELEMENTS] become equally style-born Cheriya presences.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a complete inhabitable Cheriya world where spatial structure, narrative rhythm, and full-scene organization are all controlled by the same painted storytelling grammar.

Increase:

full world embodiment,  
full environmental translation,  
stronger spatial relation,  
stronger figure-ground separation,  
stronger material presence,  
stronger world coherence,  
stronger full-frame Cheriya control.

Do not lose:

cloth-scroll identity,  
sequence logic,  
storyteller readability,  
red-ground authority,  
stylized figure grammar,  
narrative world identity,  
whole-frame Cheriya ontology.

Avoid:

poster realism,  
cinematic mythological art,  
miniature-like scene realism,  
generic folk illustration,  
comic-book drift,  
or a normal world with Cheriya decoration added later.

The final image must feel like the same deep Cheriya grammar has fully generated an entire believable world.

## **Image-to-Image**

Convert this source image into a V3 fully resolved believable real-world Cheriya world from Telangana.

Preserve the source image's main action, subject count, pose relations, and readable structure, but rebuild all visible forms through fully embodied Cheriya grammar.

Replace ordinary realism with:  
painted cloth-scroll identity,  
sequential storytelling structure,  
bold narrator-readable figures,  
red-ground dominance,  
stylized local figure grammar,  
oral-performance readability,  
and full-world Cheriya coherence.

Do not simply recolor the image.  
Do not just stylize the figures.  
Do not leave the environment generic.

Rebuild the full image so that:  
faces, bodies, objects, props, and environment all belong to the same Cheriya painted storytelling ontology,  
depth comes from Cheriya's own scroll and painted-plane logic,  
space is organized through narrative order and red-ground structural control,  
the world becomes fully inhabitable but remains completely Cheriya-born,  
not realism-first.

If any part of the frame remains normal realism underneath, the conversion has failed.

The final image must feel like Cheriya itself has fully generated the entire visible world, not like a normal image decorated with narrative folk-scroll styling.
