

Karuppur Kalamkari - Tamil Nadu

V1 — Authentic Style

Universal Hard Prompt

Create an image in the **pure authentic source-truth visual logic of Karuppur Kalamkari from Tamil Nadu**, treating it as a **Karuppur–Thanjavur-rooted ceremonial hand-painted textile system** built through **prepared silk or cotton cloth, kalam-drawn figurative image making, layered natural-dye processing, sacred and mythological subject authority, field-and-border organization, and temple/court display function**.

Build the image as if it genuinely belongs inside the native Karuppur Kalamkari ceremonial cloth tradition itself. The image must be governed first by **ceremonial textile logic, hand-painted kalam linework, prepared-cloth surface behavior, natural-dye color structure, and field-and-border composition**, not by generic kalamkari styling, printed textile design, fashion-surface ornament, decorative ethnic fabric, or realism-first painting on cloth.

The support must feel like real painted cloth, not rigid panel, not poster, not canvas painting pretending to be textile. The surface must feel prepared, absorbent, worked into, and process-built. The line must feel hand-drawn by kalam: controlled, deliberate, cloth-aware, and figure-defining, not mechanically printed or digitally crisp. Color must feel cloth-integrated and natural-dye based: strong, earthy, absorbed, and process-rooted rather than synthetic, glossy, or airbrushed.

The image must preserve **ceremonial display authority**. It should feel suitable for temple hanging, canopy, door-frame panel, or sacred textile presentation. Figures such as Nataraja, Radha-Krishna, Tri Devi, royal processions, epic scenes, and mythological beings must feel textile-born, ceremonially posed, and compositionally integrated into a painted cloth field. Borders, framing bands, and support motifs must feel structural, not decorative filler. The main field and the border must belong to one coherent ceremonial textile system.

The full image must feel painted-cloth first, not illustration first. Even when figures and narrative appear, they must remain governed by textile order, not realism, not scenic depth, and not poster logic.

Do not make this generic kalamkari, block-printed fabric, decorative mythological textile, fashion-oriented sacred surface, or realism with kalamkari motifs pasted on top. The final result must feel like **the real Karuppur Kalamkari system itself made the whole image**.

Reusable Variable Template

Create **[SUBJECT / CEREMONIAL CLOTH IMAGE / SACRED TEXTILE PANEL / FIGURAL TEXTILE FIELD]** in the pure authentic source-truth visual logic of Karuppur Kalamkari from Tamil Nadu.

Style system that must remain unchanged:

- ceremonial cloth identity
- hand-painted kalam identity
- prepared-cloth process memory
- natural-dye color logic
- sacred and mythological image authority
- field-and-border composition logic
- temple/court display dignity
- whole-frame Karuppur Kalamkari consistency

Translate the image like this:

- **[MAIN FIGURE / MAIN SCENE / MAIN SACRED SUBJECT]** becomes a Karuppur Kalamkari-built painted-textile presence governed by cloth-field order
- **[CLOTH SURFACE / SUPPORT FIELD]** must feel prepared, absorbent, process-built, and textile-borne
- **[LINE / CONTOUR / FIGURE DRAWING / ORNAMENTAL EDGES]** must feel kalam-drawn, hand-made, and cloth-aware
- **[COLOR / DYE FIELDS / TONAL REGIONS]** must feel natural-dye based, absorbed into the cloth, and structurally placed
- **[BORDERS / SIDE PANELS / FRAMING / SUPPORT MOTIFS]** must feel compositionally necessary and ceremonial, not decorative filler
- **[IF FIGURES / ARCHITECTURE / OBJECTS APPEAR]** faces, bodies, posture, object logic, and environment logic must all be reorganized through Karuppur Kalamkari textile order, not realism

Keep:

- ceremonial display function
- painted cloth authority
- kalam line clarity
- natural-dye surface behavior
- border-and-field discipline
- sacred textile narration
- temple/court dignity
- whole-frame consistency

Avoid:

- generic kalamkari look
- printed textile feel
- fashion-surface styling

- poster-like mythology
- realism-first painting on cloth
- synthetic glossy color
- decorative border without structural role
- realism with Karuppur accents added later

The final result must feel like a true Tamil ceremonial painted-cloth system, not a decorative sacred fabric wearing Karuppur cues.

Image-to-Image

Convert this source image into the **pure authentic source-truth visual logic of Karuppur Kalamkari from Tamil Nadu**.

Preserve the source image's **subject count, core action, main relationships, and readability**, but rebuild the full image through Karuppur Kalamkari grammar. Replace generic image support with prepared ceremonial cloth. Replace mechanical or realism-first drawing with hand-painted kalam linework. Replace synthetic or atmospheric color with natural-dye cloth absorption. Replace free pictorial composition with field-and-border textile order. Replace decorative fabric feeling with temple-display ceremonial dignity.

If the image includes sacred figures, royal processions, epic material, floral support motifs, or narrative elements, make them feel textile-born, ceremonially placed, and border-aware. If the image includes environment or objects, they too must be reorganized through painted-cloth logic rather than remain generic.

Do not simply add a kalamkari texture or mythological motifs to the source image. Do not keep realism underneath. Do not let the image behave like poster art printed on fabric. The final result must feel as if the original image has been fully reauthored inside the true source-truth Karuppur Kalamkari system.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in the **creative artisan translation of Karuppur Kalamkari from Tamil Nadu**, preserving the same deep source grammar as the authentic source-truth version, but translating it into a **richer, more imaginative, more dimensional 2D + 3D hybrid visual system**.

Keep the core Karuppur Kalamkari grammar fully unchanged: ceremonial cloth identity, hand-painted kalam line authority, prepared-cloth process memory, natural-dye color behavior, sacred and mythological subject logic, field-and-border organization, and temple/court display dignity. Do not turn this into decorative fabric concept art, fashion-textile reinterpretation, kalamkari-inspired print design, heritage décor styling, or realism with painted-cloth motifs layered on top.

Translate that same grammar into a more alive and dimensional visual language. The image must no longer behave only as literal textile documentation, but it must also not become full realistic scene-world depth. It should become a **creative hybrid textile-image system** where Karuppur Kalamkari's own painted-cloth intelligence generates richer form, stronger visual invention, and more dimensional presence.

The transformation must affect the whole frame. If figures appear, faces, bodies, silhouettes, posture, grouping, and figure relations must all be rebuilt through Karuppur Kalamkari textile logic. If objects appear, they must be shaped through cloth-field hierarchy, painted border intelligence, and ceremonial display order. If environment appears, it must grow from textile-field and hanging-panel logic rather than remain generic. The painted-cloth system must become the larger organizing intelligence, not just an ornamental surface.

Dimensionality must come from Karuppur Kalamkari itself: from prepared-cloth behavior, kalam-drawn contour, natural-dye layering, field-and-border structure, sacred textile narration, hanging/canopy logic, and temple/court ceremonial order. Do not solve dimensionality through generic rendering habits, fashion-surface styling, printed-pattern logic, or a normal realistic image with painted-cloth accents.

Do not create:

textile-design mockup, décor fabric concept render, generic kalamkari reinterpretation, fashion print world, or a generic dimensional image decorated later by Karuppur Kalamkari.

The final result must feel like **the same Karuppur Kalamkari grammar has entered a richer, more imaginative, more dimensional artisan translation without losing itself.**

Reusable Variable Template

Create **[SUBJECT / IMAGE / CEREMONIAL TEXTILE WORLD / FIGURAL PAINTED-CLOTH SYSTEM]** in the **creative artisan translation of Karuppur Kalamkari from Tamil Nadu.**

Keep unchanged:

- ceremonial cloth identity
- hand-painted kalam line authority
- prepared-cloth process memory
- natural-dye color logic
- sacred and mythological image authority

- field-and-border structure
- temple/court display dignity
- Karuppur compositional DNA
- whole-frame style consistency

Translate it into a richer dimensional hybrid visual system like this:

- **[MAIN FIGURE / MAIN FIELD / MAIN SACRED CENTER / MAIN NARRATIVE PANEL]** becomes a Karuppur-built painted-textile presence with more dimensional life, but still controlled by ceremonial cloth logic
- **[SECONDARY FIGURES / BORDER SYSTEMS / SUPPORT MOTIFS / SIDE FIELDS]** also transform through the same Karuppur grammar rather than generic styling
- **[LINE / BORDER / DYE FIELD / ORNAMENTAL TEXTILE ORDER]** become more spatially alive and structurally expressive while remaining cloth-born and hand-painted
- **[IF FIGURES APPEAR]** faces, bodies, posture, grouping, object logic, and environment logic must all be rebuilt through Karuppur Kalamkari textile order
- **[IF ENVIRONMENT APPEARS]** it must grow from hanging-panel, cloth-field, and ceremonial-display intelligence rather than realism

Increase:

- dimensional presence
- visual richness
- artisan-like reinterpretation
- hybrid 2D + 3D form
- structural clarity
- whole-frame transformation
- imaginative textile spatial layering

Do not use:

- generic kalamkari design logic
- print or fashion-surface logic
- décor fabric mockup logic
- realism with one painted-cloth zone
- synthetic color treatment
- generic environment with Karuppur overlay
- only border or motif carrying the style

Success condition:

the result feels like the same Karuppur Kalamkari style has been artistically translated into a richer dimensional hybrid system.

Failure condition:

the result feels like a generic dimensional image decorated later by Karuppur Kalamkari.

Image-to-Image

Convert this source image into the **creative artisan translation of Karuppur Kalamkari from Tamil Nadu**.

Preserve the source image's core subject logic, action logic, grouping logic, and readability, but rebuild the full image through Karuppur Kalamkari's internal grammar translated into a richer, more dimensional 2D + 3D hybrid visual system.

Replace generic image support with ceremonial cloth-field logic. Replace ordinary drawing with kalam-made contour intelligence. Replace synthetic or painterly surface treatment with natural-dye textile behavior. Replace scenic composition with border-and-field structure. If figures are present, transform faces, bodies, silhouettes, posture, grouping, object logic, and surrounding structure through Karuppur painted-cloth logic, not realism. If objects or environment are present, they must also be rebuilt through cloth-based ceremonial order instead of remaining generic.

Let the image gain more dimensional life, richer textile form, more imaginative layering, and stronger whole-frame coherence. But do not turn it into fabric concept art, fashion-kalamkari styling, or realism with Karuppur decoration added afterward.

Do not style only the cloth texture or border. Do not leave the rest of the frame generic. The final result must feel like **the source image has been fully reauthored through a creative artisan translation of Karuppur Kalamkari**.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in the **fully resolved believable real-world 3D translation of Karuppur Kalamkari from Tamil Nadu**, preserving the same authentic source grammar but pushing it into its **most complete, most embodied, most scene-capable volumetric world**.

Keep the same deep Karuppur Kalamkari visual intelligence fully unchanged: ceremonial cloth identity, hand-painted kalam logic, prepared-cloth process memory, natural-dye color behavior, sacred and mythological image authority, field-and-border organization, and temple/court display dignity. Do not turn this into generic textile realism, decorative fabric-world realism, fashion-kalamkari realism, or a normal world with one painted hanging added on top.

Now convert that same grammar into a believable volumetric world. The result must have believable material behavior, believable spatial separation, believable object presence,

believable environmental completion, and believable three-dimensional world logic. But every visible part of the image must still be generated by Karuppur Kalamkari grammar.

If figures are present, they must be rebuilt through Karuppur Kalamkari-born painted-textile structure, not normal realism standing on or near ceremonial cloth. If objects appear, they must be shaped through textile-field hierarchy, border logic, natural-dye surface order, and hanging-panel authority. If environment appears, it must be generated by cloth-born ceremonial order, painted textile structure, and temple/court display intelligence. The world must not become ordinary reality with one Karuppur-style cloth inserted into it.

Depth must now become full scene-world depth, but it must remain style-controlled. The source grammar must still govern figure design, shape logic, composition logic, material identity, environment logic, and total scene organization.

Do not let realism replace the style. Do not let the style survive only in one hanging cloth, border, motif band, or textile texture. Do not create a premium cinematic makeover stronger than the source grammar. The final image must feel like **Karuppur Kalamkari itself has become a believable full world.**

Reusable Variable Template

Create **[SUBJECT / SCENE / FIGURAL WORLD / EXPANDED KARUPPUR KALAMKARI WORLD]** in the **fully resolved believable real-world 3D translation of Karuppur Kalamkari from Tamil Nadu.**

Keep unchanged:

- ceremonial cloth identity
- hand-painted kalam logic
- prepared-cloth process memory
- natural-dye color behavior
- sacred and mythological image authority
- field-and-border structure
- temple/court display dignity
- Karuppur compositional DNA
- whole-frame style consistency

Translate it into full world-depth like this:

- **[MAIN FORM / MAIN FIGURE / MAIN CLOTH FIELD / MAIN SACRED PANEL]** becomes a fully embodied Karuppur-built presence with believable ceremonial-textile-world logic
- **[SECONDARY FORMS / SUPPORT FIGURES / BORDER FIELDS / DISPLAY ZONES]** also remain under the same Karuppur-born logic

- **[LINE / DYE / BORDER / FIELD / HANGING / PANEL / DISPLAY RELATIONS]** become volumetric world-organizing elements still governed by painted-cloth structure
- **[SURROUNDING WORLD / ENVIRONMENT / SPATIAL FIELD]** becomes a believable scene-world generated by Karuppur Kalamkari textile intelligence rather than generic realism
- **[IF FIGURES ARE PRESENT]** faces, bodies, posture, grouping, object logic, and environment logic must all remain Karuppur-born, not realism-first

Increase:

- volumetric world-building
- material-light interaction
- spatial separation
- scene completeness
- object presence
- environmental orchestration
- full-frame readability
- ceremonial-cloth-to-world transformation

Do not lose:

- ceremonial cloth function
- kalam-drawn line authority
- prepared-cloth memory
- natural-dye behavior
- border-and-field order
- sacred textile narration
- temple/court dignity
- whole-frame Karuppur Kalamkari identity

Do not use:

- realistic textile room with one hanging
- generic cinematic illustration
- style-as-border only
- style-as-cloth texture only
- style-as-sacred motif only
- style-as-surface ornament only
- premium finish overpowering source grammar
- reality with Karuppur flavor added later

Success condition:

the result feels like Karuppur Kalamkari itself has become a believable full world.

Failure condition:

the result feels like reality has been coated with Karuppur Kalamkari.

Image-to-Image

Convert this source image into the **fully resolved believable real-world 3D translation of Karuppur Kalamkari from Tamil Nadu.**

Preserve the source image's main subject logic, action logic, relationship logic, and readability, but rebuild the entire image through Karuppur Kalamkari's source grammar translated into **full world-depth.**

Replace generic forms with Karuppur-built painted-textile volumetric presences. Replace ordinary surfaces with ceremonial cloth-field construction. Replace generic decorative order with hand-painted line logic, natural-dye surface hierarchy, border-and-field structure, and sacred textile authority. Replace realism-first staging with Karuppur-born ceremonial-world order. If figures are present, transform faces, bodies, posture, grouping, silhouette, object logic, and environment logic through Karuppur Kalamkari grammar, not realism.

Allow the result to gain complete volumetric embodiment, stronger material-light interaction, spatial separation, object presence, scene completion, and environmental orchestration. But do not let the image become generic reality with Karuppur Kalamkari added later. The whole world must remain Karuppur-born.

Do not stylize only one hanging, border, or fabric surface while leaving the rest of the world generic. Do not make it a textile realism scene with a sacred cloth insert. Do not let the source grammar weaken as depth increases. The final result must feel like **the source image has been fully reauthored as a believable volumetric world generated by Karuppur Kalamkari itself.**
