

Rignai - Tripura

V1 — Authentic Style

Universal Hard Prompt

Create an image in the pure authentic source-truth visual logic of Rignai from Tripura.

Treat this as a true Tripura customary handwoven lower-garment system, not as a generic northeastern woven cloth, not as a tribal wrap skirt, not as a handloom fashion textile, not as a scarf or shawl, and not as a decorative ethnic garment with local motifs added later.

Build the image through real Rignai logic:
lower-wrap garment identity,
body-near woven cloth behavior,
handwoven loom-built structure,
named and community-legible design clarity,
Tripuri customary attire-world anchoring,
and true lower-body garment use.

The object must feel like a real Rignai:
woven,
wearable,
waist-related,
lower-body specific,
customary,
identity-bearing,
and garment-first rather than accessory-first.

The visual language must come from:
lower-wrap proportion,
woven band and motif organization,
handloom / loin-loom cloth truth,
pattern clarity,
body-use logic,
and Tripuri attire coherence.

The style must control the whole image:
garment proportion,
woven structure,
band order,
motif placement,
edge behavior,
cloth fall,
waist-wrap logic,

body relation,
and same-language Tripuri garment-world control.

Do not make it:
a generic tribal wrap,
a generic northeastern handloom cloth,
a broad shawl,
a scarf,
a printed ethnic lower garment,
or a fashion textile with local ornament.

Do not let the image become generic textile realism with Tripura pattern added later.
Do not let the style survive only in decoration.
Do not reduce Rignai to stripes or colorful woven surface alone.

The final image must feel like the original Rignai system itself generated the image.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in the pure authentic source-truth visual logic of Rignai from Tripura.

Treat the style as a customary handwoven lower-garment system built from:
lower-wrap garment identity,
body-near woven-cloth logic,
handloom / loin-loom textile truth,
named and community-legible woven design systems,
Tripuri attire-world anchoring,
and garment-first customary use.

Core style system to preserve:
lower-garment truth,
handwoven loom truth,
named design clarity,
Tripuri attire relation,
body-near usability,
and whole-frame same-language control.

Translate the image like this:
[MAIN CLOTH] must become a real Rignai lower garment, not a generic wrap
[SURFACE] must feel woven, not printed or decorated later
[PATTERN] must feel named/design-family Tripuri weaving, not generic tribal ornament
[PROPORTION] must remain lower-wrap and garment-specific, not shawl-like or scarf-like
[USE CONTEXT] must feel customary and body-related, not fashion-styled
[COLOR] must feel woven into the textile structure, not applied as a surface effect

Keep:

Rignai garment identity,
handwoven truth,
lower-wrap logic,
Tripura-rooted meaning,
pattern clarity,
and same-language garment-world control.

Avoid:

generic tribal wrap-skirt logic,
generic northeastern textile styling,
broad shawl behavior,
printed ethnic garment treatment,
fashion handloom styling,
or generic realism with one local cloth added later.

The final result must feel like true Rignai logic itself generated the whole image.

Image-to-Image

Convert this source image into the pure authentic source-truth visual logic of Rignai from Tripura.

Preserve the source image's subject count, main action, and core readability,
but rebuild the entire image through real Rignai lower-garment intelligence.

Replace generic textile logic with:

lower-wrap garment identity,
handwoven loom-built structure,
named Tripuri design clarity,
body-near customary cloth behavior,
Tripuri attire-world meaning,
and same-language Rignai garment logic.

Do not merely place a Rignai-like textile into the image.

Do not merely add northeastern-looking woven patterns.

Do not keep generic realism while only the cloth surface becomes local.

Do not turn the garment into a scarf, shawl, or broad wrap.

Rebuild:

cloth as real Rignai,
surface as woven structure,
pattern as named/design-family woven order,
proportion as lower-wrap garment logic,
body relation as true Tripuri lower-garment use,
and the whole frame as one Rignai-authored visual language.

The final result must feel like the source image has been completely re-authored by authentic Rignai logic, not decorated with it.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Rignai from Tripura.

Preserve the same deep source grammar of the style:

lower-wrap garment identity,
body-near woven cloth behavior,
handwoven loom-built structure,
named and community-legible design clarity,
Tripuri attire-world anchoring,
and customary garment use.

Now translate that same grammar into believable handcrafted woven-garment depth.

This must not become generic textile realism.

This must not become boutique ethnic wrap styling.

This must not become premium handloom fashion rendering.

This must not become a realistic garment scene with local Tripuri pattern added later.

Dimensionality must come from the style itself:

through stronger loom-built cloth presence,
clearer woven band and motif structure,
more believable lower-wrap garment behavior,
stronger body-near cloth logic,
more tactile handwoven material presence,
better garment-edge clarity,
and stronger relation between woven pattern and actual wear.

This is not realism-first garment rendering.

This is the same Rignai grammar gaining woven-garment depth.

Allow:

moderate textile tactility,
clearer woven structure,
stronger garment-cloth presence,
better body-wrap readability,
more believable lower-garment use,

and stronger customary wear identity.

If wider worlds appear, they must remain Rignai-born:

not fashion-first,

not décor-first,

not generic garment realism with local patterning.

They must inherit Rignai logic and same-language Tripuri garment-world construction.

Do not let polish fake the translation.

Do not let realism overpower lower-garment logic.

Do not let the garment become generic while only the pattern remains local.

The whole image must feel like Rignai has entered handcrafted woven-garment depth without losing itself.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V2 = authentic handcrafted dimensional translation of Rignai from Tripura.

Preserve the unchanged deep source core:

lower-wrap garment identity,

handwoven loom truth,

named/design-family Tripuri pattern clarity,

Tripuri attire-world anchoring,

body-near customary use,

and true garment-cloth behavior.

Translate the image into handcrafted dimensional form by increasing:

woven texture readability,

cloth tactility,

material presence,

band and motif structure,

garment-edge clarity,

lower-wrap readability,

and same-language garment structure.

Build the image like this:

[MAIN GARMENT] becomes handcrafted dimensional Rignai cloth, still governed by lower-wrap garment logic

[SURFACE] becomes more tactile and woven, never printed

[PATTERN] remains named/design-family Tripuri weaving, never generic tribal decoration

[PROPORTION] remains lower-body garment specific, never scarf-like or shawl-like

[USE CONTEXT] gains stronger physical credibility but stays customary and Tripuri

[COLOR] gains woven-material depth, not synthetic or graphic surface behavior

Keep:

Rignai garment identity,
handwoven truth,
lower-wrap logic,
Tripura-rooted meaning,
pattern clarity,
and same-language garment-world control.

Avoid:

generic textile realism,
boutique wrap styling,
broad shawl logic,
generic northeastern fashion textile behavior,
printed or surface-applied ethnic design,
or one Rignai-like garment inside an unstylized world.

The final image must feel like authentic Rignai grammar translated into handcrafted woven-garment depth.

Image-to-Image

Convert this source image into V2 = authentic handcrafted dimensional translation of Rignai from Tripura.

Keep the source image's subject count, core action, and main readability,
but rebuild the image through Rignai customary handwoven grammar translated into handcrafted dimensional form.

The image must no longer behave like generic textile realism.

Replace that with:

lower-wrap garment identity,
handwoven loom-built structure,
named Tripuri design logic,
body-near customary cloth behavior,
Tripuri attire-world meaning,
and same-language Rignai garment-world construction.

Add:

moderate woven depth,
clearer textile tactility,
stronger garment-cloth presence,
better lower-wrap readability,
stronger relation between woven pattern and garment body,
and clearer customary-wear presence.

But do not let dimensionality come from generic premium garment rendering.

Do not keep normal wrap or skirt behavior while only the pattern becomes local.

Rebuild all visible elements so they feel born from Rignai logic.

The result must feel like the source image has entered the branch's handcrafted woven-garment world, not that Tripuri styling has been placed into an ordinary image.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of the same source grammar of Rignai from Tripura.

Keep the authentic Rignai customary handwoven lower-garment system unchanged and push it into its most complete, most embodied, most scene-capable, most volumetric world.

This is maximum world-depth, not realism replacement.

Preserve the same unchanged deep Rignai core:

lower-wrap garment identity,
handwoven loom truth,
named and community-legible design clarity,
Tripuri attire-world anchoring,
body-near customary use,
and true lower-garment logic.

Important:

do not create generic garment realism,
do not create luxury heritage-fashion styling,
do not create generic northeastern woven-costume realism,
do not create normal realistic clothing with one local Rignai cloth added later.

The entire world must be rebuilt through Rignai logic.

Every visible category must become source-born:

garment proportion,
woven structure,
band order,
motif clarity,
edge behavior,
fold behavior,
waist relation,
lower-body movement logic,
attire relation,
customary-use logic,
foreground, midground, background world organization,

and full scene readability.

Believable real-world 3D here means:
believable lower-wrap garment presence,
believable handwoven cloth behavior,
believable band and motif clarity,
believable body relation at waist and lower body,
believable Tripuri attire-world presence,
and believable customary garment-world logic.

But the style must still control:
garment identity,
woven logic,
pattern logic,
lower-wrap behavior,
Tripuri attire relation,
customary meaning,
environment logic,
and scene organization.

Increase:
full same-style world embodiment,
full garment presence,
full environmental completion,
full use-context clarity,
stronger scene readability through Rignai logic,
and stronger whole-frame coherence through Tripura customary garment structure.

Absolute rule:
the Rignai system must not decorate the world.
the Rignai system must generate the world.

Do not keep generic realism and then add local woven flavor later.
Do not let the style survive only in one garment piece.
Do not let polish overpower source grammar.
Do not introduce a second visual language stronger than the Rignai system.

The final image must feel like:
the same Rignai style itself has become a fully embodied complete garment world.

Reusable Variable Template

Create [SUBJECT / SCENE / WORLD] in V3 = fully resolved believable real-world 3D translation of the same source grammar of Rignai from Tripura.

Keep the authentic Rignai customary handwoven lower-garment system unchanged and push it into maximum world-depth.

Preserve the same unchanged deep core:

lower-wrap garment identity,
handwoven loom truth,
named/design-family Tripuri pattern clarity,
Tripuri attire-world anchoring,
body-near customary use,
and true garment-cloth behavior.

Important:

the whole world must be rebuilt through Rignai logic.
Do not keep normal realism and then add Rignai flavor later.

Build the image like this:

[MAIN GARMENT] must become source-born Rignai cloth, not a generic wrap skirt or cloth panel

[SURFACE] must become woven structure, not print or graphic styling

[PATTERN] must become named/design-family Tripuri woven order, not decorative tribal ornament

[PROPORTION] must remain lower-body garment-specific, not shawl-like or scarf-like

[USE CONTEXT] must become true Tripuri customary wear, not generic styling

[CHARACTERS / WEARERS] must interact with the garment in ways that feel body-correct and culturally correct

[ENVIRONMENT / BACKGROUND] must become same-language Rignai world-space, not generic realism

Believable real-world 3D here means:

believable woven-garment presence,
believable handloom-built behavior,
believable lower-wrap usability,
believable Tripura customary presence,
and believable full-scene coherence.

Increase:

full world embodiment,
full garment presence,
full environmental completion,
stronger woven readability,
stronger use-context clarity,
stronger scene readability,
and stronger whole-frame orchestration.

Keep unchanged:

Rignai garment identity,
lower-wrap truth,
handwoven structure,

pattern clarity,
Tripura-rooted meaning,
and same-language world control.

Avoid:

generic textile realism,
luxury fashion drift,
generic northeastern costume styling,
shawl logic,
printed ethnic garment language,
or any second visual language overpowering the source grammar.

The final image must feel like:

the same Rignai grammar itself has become a believable full garment world.

Image-to-Image

Convert this source image into V3 = fully resolved believable real-world 3D translation of the same source grammar of Rignai from Tripura.

Preserve the source image's subject count, core action, scene purpose, and main relationships,
but rebuild every visible element through Rignai customary garment intelligence fully embodied as reality.

Keep the authentic branch unchanged and push it into maximum world-depth.

Replace ordinary realism with:

lower-wrap garment identity,
handwoven loom-built structure,
named Tripuri design logic,
body-near customary cloth behavior,
Tripuri attire-world meaning,
and same-language Rignai world construction.

Do not keep normal textile realism and add Rignai later.

Do not keep generic clothing logic and only localize one garment.

Do not let the style survive only in patterning.

Rebuild:

garment as real Rignai,
surface as woven structure,
pattern as named/design-family loom order,
body relation as true lower-wrap garment logic,
scene logic as Tripuri customary garment-world behavior,
environment as same-language Rignai world-space,

and the whole frame as one uninterrupted Rignai-authored scene-world.

Expand the source into:
full garment-world embodiment,
full use-context presence,
full environmental completion,
coherent material behavior,
clear woven readability,
and complete scene readability,
but only through Rignai grammar.

Absolute rule:
the Rignai system must generate the world, not decorate the world.

The final result must feel like:
the same Rignai style itself has become a believable fully embodied garment world.
If it feels like generic reality coated with Tripura woven flavor, it has failed.
