

Kushmandi - West Bengal

V1 — Authentic Style

Universal Hard Prompt

Create an image in the **pure authentic source-truth visual logic of Kushmandi / West Bengal wooden performance-mask tradition**.

Treat this as a true **Gomira-linked carved wooden ritual-mask system**, not as generic Indian folk-mask art, not as decorative rural craft, not as fantasy demon-face design, and not as realistic mythology illustration.

Build the image through real Kushmandi mask logic:

- wearable carved wooden face-object identity
- role-specific deity / demon / animal / mythic character embodiment
- strong frontal or performance-facing visual force
- exaggerated but controlled feature logic for distance readability
- hand-carved plane structure
- wood mass and object thickness
- paint or pigment serving carved form, not replacing it
- ritual seriousness and performance activation
- village shrine-linked and seasonal performance memory
- whole-frame same-language control

The image must feel like a mask-performance system from the beginning.

It must not feel like a normal character image that was later given folk styling.

The style must control the whole frame:

- face construction
- brow / eye / nose / mouth exaggeration
- silhouette force
- body-mask relation
- performer presence
- props and costume logic
- arena / shrine / ritual-space logic
- object material behavior
- and overall character readability

If the image includes body, costume, props, architecture, or environment, all of them must inherit the same carved ritual-mask logic.

Do not make it:

- generic folk-mask craft
- generic demon-face art
- horror styling
- realistic human face under mask decoration
- theatrical poster illustration
- myth fantasy art with “folk” cues
- color-first design with weak carved structure
- decorative wall-hanging craft without performance activation

The final image must feel like **authentic Kushmandi wooden mask intelligence itself generated the whole image-world.**

Reusable Variable Template

Create **[SUBJECT / CHARACTER / SCENE / WORLD]** in the **pure authentic source-truth visual logic of Kushmandi / West Bengal wooden performance-mask tradition.**

Treat the style as a **Gomira-linked carved ritual-mask system** built from:

- wearable carved wooden face-object logic
- role-specific character embodiment
- frontal ritual-performance force
- exaggerated distance-readable feature construction
- wood-mass and carved-plane behavior
- pigment over carved form
- village shrine and seasonal performance memory

Core style system to preserve:

- ritual carved-mask truth
- role-specific face grammar
- mask-face, not portrait-face logic
- wooden object authority
- exaggerated but controlled performance readability
- embodied ritual seriousness
- whole-frame same-language control

Translate the image like this:

- **[MAIN FIGURES / CHARACTERS]** must become true Kushmandi/Gomira-style role-bearing mask presences, not generic figures with folk accessories
- **[FACES]** must be rebuilt as carved wearable mask-faces with strong frontal force and clear being-type identity
- **[BODIES / COSTUMES / PROPS]** must inherit ritual-performance object logic, not generic realism

- **[ENVIRONMENT / BACKGROUND]** must feel like a mask-performance world, not scenic realism or pretty village backdrop
- **[MATERIALS / SURFACES]** must preserve wood mass, carved planes, and craft-applied finish

Keep:

- carve-first identity
- role-specific embodiment
- performance readability
- ritual activation
- mask wearability
- wood-object presence
- same-language world logic

Avoid:

- generic folk décor
- fantasy creature design
- horror-mask styling
- painted surface stronger than form
- portrait realism
- modern stage or poster aesthetics
- realism-first body and environment
- one source-aware mask inside a generic world

The final result must feel like **true Kushmandi/Gomira ritual-mask logic itself generated the entire image**.

Image-to-Image

Convert this source image into the **pure authentic source-truth visual logic of Kushmandi / West Bengal wooden performance-mask tradition**.

Preserve the source image's subject count, core action, role relationships, and scene readability,
but rebuild the entire image through **Gomira-linked carved wooden mask intelligence**.

Replace normal realism with:

- wearable carved wooden face-object identity
- role-specific deity / demon / animal / mythic face construction
- frontal exaggerated performance readability
- wood mass and carved plane logic
- pigment serving carved structure
- ritual activation and village performance-world memory

Do not merely add a folk mask to a normal figure.

Do not merely add bright colors, teeth, horns, or dramatic expression.

Do not turn the result into fantasy demon art or decorative craft.

Rebuild:

- faces as true carved mask-faces
- bodies as performers governed by mask logic
- props and costume as ritual-performance extensions
- environment as shrine-adjacent or performance-field world
- the whole frame as one uninterrupted Kushmandi-authored mask system

The final result must feel like the source image has been completely re-authored through **authentic Kushmandi/Gomira ritual wooden-mask grammar**.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in **V2 = authentic handcrafted dimensional translation of Kushmandi / West Bengal wooden performance-mask tradition**.

Preserve the same deep source grammar of the branch:

- wearable carved wooden face-object identity
- role-specific deity / demon / animal / mythic embodiment
- strong frontal or performance-facing character readability
- exaggerated but controlled mask-face construction
- wood mass and plane logic
- pigment serving form
- ritual-performance seriousness
- village shrine-linked seasonal activation
- whole-frame same-language control

Now translate that same grammar into believable handcrafted dimensional form.

This must not become generic 3D character design.

This must not become fantasy creature art.

This must not become a realistic performer wearing a stylized folk mask.

Dimensionality must come from the branch itself:

- stronger carved mass
- more tactile wood-object presence

- clearer plane transitions
- better mask-body integration
- stronger ritual-stage relation
- more structured props and environment through mask logic
- deeper but still controlled spatial readability
- handcrafted object-world embodiment

Figures must remain style-born:

- faces must remain mask-faces, not portrait-faces
- bodies must remain performance-mask-governed, not realism-first
- costume and props must remain ritual extensions, not generic theatre styling
- environment must remain branch-authored, not scenic realism

Do not let the world become generic village realism.

Do not let the wood become surface texture only.

Do not let the face become emotionally realistic.

Do not let only the head be Kushmandi while the rest of the frame stays generic.

The whole image must feel like **Kushmandi carved ritual-mask logic has entered handcrafted dimensional embodiment.**

Reusable Variable Template

Create **[SUBJECT / CHARACTER / SCENE / WORLD]** in **V2 = authentic handcrafted dimensional translation of Kushmandi / West Bengal wooden performance-mask tradition.**

Preserve the unchanged deep source core:

- ritual carved-mask identity
- role-specific face grammar
- mask-face rather than portrait-face logic
- wooden object presence
- exaggerated performance readability
- ritual activation
- same-language whole-frame control

Translate the image into handcrafted dimensional form by increasing:

- carved mass
- object thickness
- tactile wood presence
- mask-body coherence
- spatial layering
- prop/environment integration

- ritual-stage world readability

Build the image like this:

- **[MAIN CHARACTERS]** become dimensional ritual-mask presences still fully governed by Kushmandi/Gomira face logic
- **[FACES]** stay carved, frontal, typological, and performance-readable
- **[BODIES / COSTUMES / PROPS]** gain objecthood and structural depth without turning generic
- **[ENVIRONMENT / BACKGROUND]** gains ritual-performance field coherence rather than scenic realism
- **[MATERIALS / SURFACES]** gain tactile carved depth while preserving craft-applied finish

Keep:

- carved object authority
- role-specific embodiment
- ritual seriousness
- performance readability
- mask-body continuity
- whole-frame branch coherence

Avoid:

- generic fantasy-mask character design
- horror creature art
- realistic human emotion under a stylized mask
- decorative wood texture without structural carving
- stage-poster drama
- generic cinematic realism
- one styled head in a generic world

The final image must feel like **authentic Kushmandi mask grammar translated into handcrafted dimensional presence**.

Image-to-Image

Convert this source image into **V2 = authentic handcrafted dimensional translation of Kushmandi / West Bengal wooden performance-mask tradition**.

Keep the source image's subject count, core action, and readability, but rebuild the entire image through Kushmandi/Gomira carved-mask grammar translated into handcrafted dimensional form.

The image must no longer behave like normal realism.

Replace that with:

- carved wooden mask-face authority
- role-specific embodiment
- stronger object mass
- more tactile wood presence
- better mask-body relation
- ritual-stage and shrine-world logic
- whole-frame performance-mask coherence

Add:

- moderate dimensional presence
- clearer plane behavior
- better spatial relation between performer, mask, props, and environment
- stronger handcrafted material reality
- more integrated ritual world

But do not let dimensionality come from generic realism.

Do not keep ordinary human acting-face logic.

Do not build a generic rural scene and then place a Kushmandi mask inside it.

Do not turn the image into fantasy folk character art.

Rebuild all visible elements so they feel born from **Kushmandi carved performance-mask dimensional logic**.

The result must feel like the source image has entered the handcrafted dimensional state of the same Kushmandi/Gomira system.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in **V3 = fully resolved believable dimensional world of Kushmandi / West Bengal wooden performance-mask tradition**.

Preserve the same unchanged deep style-core:

- wearable carved wooden face-object identity
- role-specific deity / demon / animal / mythic embodiment
- mask-face rather than portrait-face construction
- exaggerated but controlled performance-readability
- wood mass and carved plane logic
- pigment serving form

- ritual seriousness and activation
- shrine-linked seasonal performance-world memory
- whole-frame same-language control

Now push that same grammar into its most believable, fully embodied dimensional world.

Believable here means:

- believable carved-object volume
- believable wood-material presence
- believable mask-body integration
- believable ritual-performance field
- believable environmental completion
- believable figure-ground separation
- believable world coherence

It does NOT mean:

- generic realism
- cinematic folk-horror
- premium fantasy concept art
- theatrical myth spectacle
- realism with folk-mask cues added later

The same style must still govern:

- face construction
- silhouette force
- body-mask relation
- costume and props
- arena / shrine / village ritual field
- object material behavior
- world organization
- and full-frame readability

Increase:

- full volumetric embodiment
- material clarity
- object presence
- ritual-stage world completion
- environmental coherence
- foreground / midground / background separation
- focal clarity
- whole-frame branch readability

But do not introduce a second style language.

Do not let realism overpower mask logic.

Do not let the environment become generic rural realism.

Do not let the face become portrait-like.

Do not let V3 become a spectacle version of the branch.

It must remain the same **Kushmandi/Gomira carved ritual-mask grammar**, fully embodied.

The final image must feel like **Kushmandi wooden performance-mask intelligence itself has become a believable dimensional world**.

Reusable Variable Template

Create **[SUBJECT / CHARACTER / SCENE / WORLD]** in **V3 = fully resolved believable dimensional world of Kushmandi / West Bengal wooden performance-mask tradition**.

Keep the same unchanged deep style-core:

- ritual carved-mask truth
- role-specific mask-face grammar
- wood-object authority
- exaggerated performance readability
- ritual activation
- shrine/performance ecology
- whole-frame same-language control

Now fully embody that style into a believable dimensional world.

Increase:

- full carved volume
- material-light interaction for form clarity
- mask-body-environment integration
- environmental completion
- figure-ground separation
- focal hierarchy
- total world coherence

Build the image like this:

- **[MAIN CHARACTERS]** must be fully style-born and fully embodied, never generic realism with folk mask styling
- **[FACES]** must remain carved wearable mask-faces with typological role-force
- **[BODIES / COSTUMES / PROPS]** must feel governed by ritual performance-mask logic
- **[ENVIRONMENT / BACKGROUND]** must become a complete Gomira-born world, not ordinary scenic realism
- **[MATERIALS / SURFACES]** must preserve carved wood and craft finish while gaining full believable presence

Keep unchanged:

- mask-face identity
- role specificity
- carved authority
- performance readability
- ritual seriousness
- whole-frame same-language control

Avoid:

- generic cinematic illustration
- folk-fantasy spectacle
- theatrical posterization
- horror styling
- generic rural realism
- mask only on the head while body/world stay generic
- realism stronger than branch grammar

The final image must feel like **the same Kushmandi/Gomira mask system has become fully embodied as a believable world.**

Image-to-Image

Convert this source image into **V3 = fully resolved believable dimensional world of Kushmandi / West Bengal wooden performance-mask tradition.**

Preserve the source image's subject count, core action, scene purpose, and main readability,

but rebuild every visible element through **Kushmandi/Gomira carved ritual-mask grammar fully embodied as a world.**

Replace ordinary realism with:

- carved wearable mask-face logic
- role-specific deity / demon / animal / mythic embodiment
- exaggerated performance readability
- wood mass and carved plane structure
- ritual-stage and shrine-linked performance ecology
- whole-frame same-language control

Expand the source into:

- fully embodied ritual-mask characters
- believable carved wood presence
- strong body-mask-environment continuity

- complete performance-field world
- clear spatial separation
- full environmental completion
- total branch coherence

But keep the same source grammar intact.

Do not let realism replace the branch.

Do not add a folk mask only as an accessory.

Do not let the background become generic rural/stage realism.

Do not let V3 turn into cinematic folk-fantasy spectacle.

Do not let the face become a premium dramatic portrait-mask hybrid.

Rebuild the entire frame so it feels like **authentic Kushmandi wooden performance-mask logic itself has become a fully resolved dimensional world.**

If the result feels like reality coated with a folk-mask theme, it has failed.

If it feels like the Kushmandi/Gomira system itself has become reality, it is correct.
