

Purulia Chau mask - West Bengal

V1 — Authentic Style

Universal Hard Prompt

Create an image in the pure authentic source-truth visual logic of Purulia Chau mask from West Bengal.

Treat this as a true Charida-rooted Purulia Chhau performance-mask system, not as generic decorative mask craft, not as a generic Indian festival mask, not as wood-carved mask art, and not as a fantasy costume prop.

Build the image through real Purulia Chau mask logic:
dance-role transformation,
frontally powerful mask-face construction,
separate face-plus-headdress system,
clay-modelled and paper-cloth layered craft logic,
bold role-coded color,
mythic and epic character readability,
and Chhau performance anchoring.

The object must feel like a real performance mask made for Purulia Chhau.
It must not feel like a wall décor mask, museum sculpture, or generic folk accessory.

The style must control the whole object:
frontal face force,
oversized and exaggerated feature logic,
role-readable eyes, teeth, moustache, brows, and facial coding,
clear separation between face and headdress,
lightweight but visually expansive construction,
and strong stage readability from a distance.

The headdress must not feel like optional decoration.
It must feel structurally attached to the role and to the mask's performance identity.

Color must do character work.
Do not use color as random decoration.
Use color as role-code, visual force, and distance readability.

Do not make it:
generic folk mask,
generic carnival or festival mask,

wooden carved mask,
portrait-like realistic face,
decorative headdress object with no performance function,
or a costume prop with Purulia flavor added later.

The final image must feel like authentic Purulia Chau mask intelligence itself generated the whole object.

Reusable Variable Template

Create [MASK / CHARACTER / OBJECT / PERFORMANCE IMAGE / WORLD] in the pure authentic source-truth visual logic of Purulia Chau mask from West Bengal.

Treat the style as a Charida-rooted performance-mask system built from:
dance-role transformation,
frontally exaggerated face design,
face-plus-headdress construction,
clay-modelled paper-and-cloth layered build,
role-coded painted surface,
and Purulia Chhau performance logic.

Core style system to preserve:
performance-mask truth,
frontality,
role readability,
face-headdress integration,
layered craft construction,
mythic/epic character coding,
and whole-frame same-language control.

Translate the image like this:

[MAIN MASK / MAIN ROLE] must feel like a true Purulia Chhau role-mask, not generic mask craft

[FACE] must be exaggerated, frontal, powerful, and instantly readable

[HEADDRESS] must be structurally integrated and performance-expanding, not optional decoration

[CONSTRUCTION] must feel clay-modelled, layered, light, handcrafted, and built-up, not carved or cast

[COLOR] must feel role-coded and high-readability, not random ornamental styling

[CHARACTER] must feel deity-, demon-, animal-, or epic-role born, not decorative fantasy

Keep:

Purulia Chhau anchoring,
Charida craft-world identity,
face-plus-headdress system,
layered performance-object truth,

role-coded color,
and same-language performance control.

Avoid:

generic decorative folk mask,
festival-mask mood,
wood-carved logic,
portrait realism,
fantasy prop design,
or ordinary costume-object styling with Purulia accents added later.

The final result must feel like true Purulia Chau mask logic itself generated the whole image.

Image-to-Image

Convert this source image into the pure authentic source-truth visual logic of Purulia Chau mask from West Bengal.

Preserve the source image's subject count, main role, and core readability,
but rebuild the entire image through real Purulia Chau performance-mask intelligence.

Replace generic mask or costume logic with:

frontally exaggerated role-mask design,
face-plus-headdress integration,
clay-modelled paper-cloth layered build,
role-coded color,
mythic/epic character readability,
and Purulia Chhau performance truth.

Do not merely add a colorful headdress.

Do not merely exaggerate the eyes.

Do not merely add folk ornament.

Do not keep ordinary mask logic while only the surface becomes Purulia-like.

Rebuild:

the face as a true Purulia Chau role-face,
the headdress as a structurally attached performance expansion,
the object as a lightweight layered stage-mask,
the color as role-code,
and the whole frame as one Purulia-Chhau-authored visual language.

The final result must feel like the source image has been completely re-authored by authentic Purulia Chau mask grammar, not decorated with it.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Purulia Chau mask from West Bengal.

Preserve the same deep source grammar of the style:
performance-mask identity,
frontally exaggerated role-face,
separate face-plus-headdress system,
clay-modelled paper-and-cloth layered construction,
role-coded color,
and Purulia Chhau anchoring.

Now translate that same grammar into stronger crafted mask embodiment.

This must not become generic sculptural realism.
This must not become fantasy mask design.
This must not become premium decorative mask art.
This must not become cinematic costume prop styling.

Dimensionality must come from the style itself:
through stronger layered mask-body presence,
clearer built-up shell logic,
stronger face-headdress relation,
clearer frontal role-force,
stronger crafted lightness,
more believable handmade construction,
and stronger performance-object authority.

This is not heavy realism.
This is not carved-object depth.
This is the same Purulia Chau grammar gaining stronger crafted embodiment.

Allow:
clearer material layering,
stronger face structure,
stronger headdress build,
clearer ornament under structural control,
and stronger full-object coherence.

But keep:
performance readability,
frontality,
role exaggeration,

lightweight stage-object truth,
and Purulia Chhau identity.

Do not let detail replace role clarity.
Do not let material richness replace performance logic.
Do not let the object become a decorative collectible.

The whole image must feel like Purulia Chau mask has gained stronger crafted-body embodiment without losing its native performance truth.

Reusable Variable Template

Create [MASK / CHARACTER / OBJECT / PERFORMANCE IMAGE / WORLD] in V2 = authentic handcrafted dimensional translation of Purulia Chau mask from West Bengal.

Preserve the unchanged deep source core:
performance-mask truth,
frontally exaggerated facial coding,
face-plus-headdress integration,
clay-paper-cloth layered build,
role-coded color,
Purulia Chhau anchoring,
and Charida craft-world identity.

Translate the image into stronger crafted-mask embodiment by increasing:
layered body presence,
construction readability,
face structure,
headdress build,
crafted lightness,
object completeness,
and same-language control.

Build the image like this:
[MAIN MASK / MAIN ROLE] becomes more physically present but remains fully performance-mask driven
[FACE] gains stronger structure without becoming portrait-realistic
[HEADDRESS] gains stronger built authority without becoming fantasy excess
[CONSTRUCTION] becomes more readable as layered craft, never carved or cast
[COLOR] becomes more fully embodied as role-coded painted surface, never random ornamental palette
[ENTIRE OBJECT] feels more complete, more handcrafted, and more stage-credible

Keep:
Purulia Chhau performance identity,
face-headdress system,

frontal role-readability,
layered craft truth,
character-coded color,
and whole-frame same-language control.

Avoid:
sculptural realism,
luxury mask-art polish,
festival-costume fantasy,
decorative object drift,
or any second visual language stronger than Purulia Chau grammar.

The final image must feel like authentic Purulia Chau mask logic translated into stronger crafted-mask embodiment.

Image-to-Image

Convert this source image into V2 = authentic handcrafted dimensional translation of Purulia Chau mask from West Bengal.

Keep the source image's subject count, core role, and main readability,
but rebuild the image through Purulia Chau mask grammar translated into stronger
crafted-mask embodiment.

The image must no longer behave like generic mask realism or costume-object design.

Replace that with:

frontally exaggerated role-face,
face-plus-headdress integration,
layered paper-cloth built form,
role-coded color logic,
mythic/epic performance readability,
and Purulia Chhau stage-object truth.

Add:

stronger layered body,
clearer construction presence,
stronger headdress relation,
stronger frontal face authority,
and stronger handcrafted object coherence.

But do not let dimensionality come from heavy sculpture, fantasy prop design, or decorative luxury finish.

Do not keep ordinary mask logic while only the surface becomes Purulia-like.

Rebuild all visible elements so they feel born from Purulia Chau grammar.

The result must feel like the source image has entered the branch's stronger crafted-mask world, not that Purulia styling has been placed onto an ordinary object.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Convert this source image into V2 = authentic handcrafted dimensional translation of Purulia Chau mask from West Bengal.

Keep the source image's subject count, core role, and main readability, but rebuild the image through Purulia Chau mask grammar translated into stronger crafted-mask embodiment.

The image must no longer behave like generic mask realism or costume-object design.

Replace that with:

frontally exaggerated role-face,
face-plus-headdress integration,
layered paper-cloth built form,
role-coded color logic,
mythic/epic performance readability,
and Purulia Chhau stage-object truth.

Add:

stronger layered body,
clearer construction presence,
stronger headdress relation,
stronger frontal face authority,
and stronger handcrafted object coherence.

But do not let dimensionality come from heavy sculpture, fantasy prop design, or decorative luxury finish.

Do not keep ordinary mask logic while only the surface becomes Purulia-like.

Rebuild all visible elements so they feel born from Purulia Chau grammar.

The result must feel like the source image has entered the branch's stronger crafted-mask world, not that Purulia styling has been placed onto an ordinary object.

Reusable Variable Template

Create [MASK / CHARACTER / OBJECT / PERFORMANCE IMAGE / WORLD] in V3 = full performance-world embodiment of the same source grammar of Purulia Chau mask from West Bengal.

Keep the authentic Purulia Chau performance-mask system unchanged and push it into full performance-world embodiment.

Preserve the same unchanged deep core:

performance-role transformation,
frontally exaggerated facial logic,
face-plus-headaddress structure,
layered clay-paper-cloth construction truth,
role-coded color,
Purulia Chhau identity,
and Charida craft continuity.

Important:

the whole image must be rebuilt through Purulia Chau logic.

Do not keep normal mask, prop, or costume logic and then add Purulia flavor later.

Build the image like this:

[MAIN MASK / MAIN ROLE] must dominate as a true Purulia Chau role-mask

[FACE] must remain frontal, exaggerated, and instantly readable

[HEADADDRESS] must remain structurally integrated and role-expanding

[CONSTRUCTION] must remain light, layered, and handcrafted, never carved or heavy

[COLOR] must remain role-coded, direct, and performance-legible

[ENTIRE OBJECT / PERFORMANCE WORLD] must feel born from Chhau transformation logic, not decorative styling

Believable full performance-world embodiment here means:

believable role authority,

believable crafted build,

believable stage-readability,

believable face-headaddress unity,

and believable same-language performance completion.

Increase:

full object embodiment,

full role force,

stronger silhouette power,

stronger performance-world logic,

stronger same-language control,

and stronger Purulia-Chhau-born identity.

Keep unchanged:

performance-mask truth,

frontality,

layered craft logic,

role-coded color,

Charida/Purulia anchoring,

and whole-frame same-language control.

Avoid:

generic decorative mask art,
festival-costume styling,
fantasy prop realism,
heavy sculptural drift,
or any second visual language overpowering the source grammar.

The final image must feel like:

the same Purulia Chau grammar itself has become a fully embodied complete performance world.

Image-to-Image

Convert this source image into V3 = full performance-world embodiment of the same source grammar of Purulia Chau mask from West Bengal.

Preserve the source image's subject count, core role, object purpose, and main relationships,

but rebuild every visible element through Purulia Chau performance-mask intelligence fully embodied as a complete performance world.

Keep the authentic branch unchanged and push it into full Purulia-Chhau-world embodiment.

Replace ordinary mask, costume, or decorative-object logic with:

role-transforming performance-mask identity,
frontally exaggerated face,
face-plus-headdress system,
layered clay-paper-cloth build,
role-coded color,
and Purulia Chhau dance-world truth.

Do not keep normal prop logic and add Purulia later.

Do not keep realistic faces and only localize ornament.

Do not let the style survive only in bright color or crown-like decoration.

Rebuild:

the face as a true Purulia Chau role-face,
the headdress as a performance-expanding structural system,
the object as a lightweight layered stage-mask,
the color as role-code,
the silhouette as dance-readable force,
and the whole frame as one uninterrupted Purulia-Chhau-authored performance world.

Expand the source into:

full role authority,
full object embodiment,

clear face-headdress integration,
clear performance-readability,
clear same-language control,
and complete Purulia Chau identity,
but only through Purulia Chau grammar.

Absolute rule:
the Purulia Chau system must generate the object and world, not decorate them.

The final result must feel like:
the same Purulia Chau style itself has become a fully embodied complete performance world.
If it feels like generic mask realism coated with Purulia flavor, it has failed.
