

walnut carving - Kashmir

V1 — Authentic Style

Universal Hard Prompt

For the style **Walnut Carving / Kashmir**, create the image in **V1 = pure authentic source-truth**.

First identify and preserve the true native image-making and craft-making system of this style:

real walnut material authority, trunk or root wood identity, chiselled relief and surface-depth carving, dense floral/geometric/calligraphic pattern intelligence, workshop-made carve-and-polish memory, and object-plus-architectural use across furniture, boxes, doors, wall surfaces, and windows.

Keep these scene invariants fixed unless explicitly changed:

[SUBJECT COUNT]

[CHARACTER ROLES]

[RELATIONSHIPS BETWEEN SUBJECTS]

[KEY PROPS]

[ENVIRONMENT FUNCTION]

[ACTION / POSE PURPOSE]

[EMOTIONAL BEAT]

[VIEWER-READ]

[BASIC STAGING LOGIC]

Now rebuild the entire image as if it genuinely existed inside the native Kashmiri walnut-carving tradition itself.

The whole image must obey true walnut-carving grammar:

solid walnut mass,
carved relief depth,
raised and recessed carving hierarchy,
cut contour logic,
ornamental field organization,
pattern-led carved surfaces,
workshop-made finish,
and Kashmiri object/interior presence.

The characters themselves, if present, must be rebuilt through the source style:

source-born face grammar,
source-born body logic,
source-born silhouette logic,
source-born posture logic,

source-born grouping logic.

They must not remain generic realistic humans standing near carved objects.

Objects and environment must also be rebuilt through the same style:

tables, chairs, boxes, doors, windows, wall panels, structural edges, room surfaces, and surrounding forms must all feel authored by walnut carving logic, not generic realism.

Important source-truth rules:

if the style is relief-like, keep it relief-like;

if the style is object-surface-centered, keep it object-surface-centered;

if the branch is materially carved first, keep carved material intelligence stronger than atmosphere.

Do not modernize the style just to make it more attractive.

Do not add generic realism.

Do not add generic cinematic depth.

Do not add generic dramatic lighting.

Do not turn it into concept art.

Do not let the style survive only in motif application, furniture ornament, props, or background panels.

Do not let polish become stronger than carving intelligence.

The final image must feel like:

this exact content truly exists inside the original Kashmiri walnut-carving tradition, not like a modern image decorated with walnut carving.

Reusable Variable Template

For the style **Walnut Carving / Kashmir**, create **[SCENE / SUBJECT / OBJECT WORLD]** in **V1 = pure authentic source-truth**.

First preserve the true native source system:

real walnut material authority,

chiselled relief and carved depth,

dense ornamental pattern intelligence,

workshop-made carving memory,

and object-plus-architectural Kashmiri use.

Keep these invariants fixed unless explicitly changed:

[SUBJECT COUNT]

[CHARACTER ROLES]

[RELATIONSHIPS]

[KEY PROPS]

[ENVIRONMENT FUNCTION]

[ACTION / POSE PURPOSE]

[EMOTIONAL BEAT]

[VIEWER-READ]
[BASIC STAGING LOGIC]

Translate the image like this:

[MAIN SUBJECT / MAIN OBJECT] becomes a source-faithful Kashmiri walnut-carved presence with real material mass and carved depth.

[SECONDARY FIGURES / OBJECTS] become supporting walnut-carved forms obeying the same cut, relief, and pattern logic.

[ARCHITECTURE / INTERIOR / BACKGROUND] becomes a carved object-world and architectural field built from the same walnut grammar.

Keep:

walnut mass first,
carved depth first,
pattern intelligence first,
workshop-made finish,
and Kashmiri object/interior identity.

Avoid:

generic carved furniture,
luxury décor wood styling,
machine-cut ornament,
flat motif application,
ordinary realism with one carved object,
or background-more-styled-than-characters failure.

The final image must feel like:

the source Kashmiri walnut-carving tradition itself authored the full frame.

Image-to-Image

Convert this source image into **V1 pure authentic source-truth Walnut Carving / Kashmir.**

Preserve the source image's:

[SUBJECT COUNT]
[CORE ACTION]
[MAIN RELATIONSHIPS]
[KEY PROPS]
[VIEWER-READ]
[BASIC STAGING]

Replace ordinary image logic with:

real walnut mass,
carved relief hierarchy,
chiselled contour behavior,

dense floral/geometric/calligraphic pattern intelligence,
workshop-made finish,
and Kashmiri furniture/architectural object logic.

If the source contains figures, rebuild them as walnut-carving-born presences rather than realistic humans.

If the source contains objects or environment, rebuild them through the same carved-world logic.

Do not simply add carving texture.

Do not simply add Kashmiri motifs.

Do not keep a realistic room and decorate one object.

Do not let polish overpower carved depth.

The final result must feel like:

the source image has been rebuilt inside the original Kashmiri walnut-carving system.

V2 — Artisan Translation

Universal Hard Prompt

For the style **Walnut Carving / Kashmir**, create the image in **V2 = authentic handcrafted dimensional translation**.

First preserve the same unchanged deep style-core:

real walnut material authority,
trunk/root wood identity,
chiselled relief and surface-depth carving,
dense pattern intelligence,
workshop-made carve-and-polish memory,
and object-plus-architectural Kashmiri use.

Keep these scene invariants fixed unless explicitly changed:

[SUBJECT COUNT]
[CHARACTER ROLES]
[RELATIONSHIPS BETWEEN SUBJECTS]
[KEY PROPS]
[ENVIRONMENT FUNCTION]
[ACTION / POSE PURPOSE]
[EMOTIONAL BEAT]
[VIEWER-READ]
[BASIC STAGING LOGIC]

Now translate that same source grammar into believable handcrafted dimensional form.

This must still feel fully style-born.
Faces must remain source-born.
Bodies must remain source-born.
Silhouettes must remain source-born.
Objects and environment must also remain source-born.

Allow:

controlled dimensional presence,
stronger object thickness,
tactile walnut surface,
clearer raised and recessed carving,
undercut and relief hierarchy,
better front / middle / back readability,
stronger relation between carved object and surrounding space,
and more deployable scene usability.

But all of this depth must come from the style's own logic:

from carved mass,
from relief structure,
from walnut thickness,
from cut planes,
from panel-face organization,
from workshop carving intelligence.

Do not allow:

generic 3D,
luxury furniture realism,
showroom polish,
random rustic handmade look,
soft fantasy sculpture,
normal humans with walnut carving decoration,
environment realism stronger than figures,
or motifs surviving only on props, borders, panels, or furniture faces.

The output should feel like:

the same Kashmiri walnut-carving style has physically entered handcrafted dimensional space without losing its identity.

Reusable Variable Template

For the style **Walnut Carving / Kashmir**, create **[SCENE / SUBJECT / OBJECT WORLD]** in **V2 = authentic handcrafted dimensional translation**.

Preserve the same unchanged source core:

real walnut mass,
carved relief hierarchy,

pattern intelligence,
workshop-made finish,
and object-plus-architectural use.

Keep these invariants fixed unless explicitly changed:

[SUBJECT COUNT]
[CHARACTER ROLES]
[RELATIONSHIPS]
[KEY PROPS]
[ENVIRONMENT FUNCTION]
[ACTION / POSE PURPOSE]
[EMOTIONAL BEAT]
[VIEWER-READ]
[BASIC STAGING LOGIC]

Translate the image like this:

[MAIN SUBJECT / MAIN OBJECT] becomes a dimensional Kashmiri walnut-carved presence with real thickness, carved planes, and readable relief depth.

[SECONDARY FIGURES / OBJECTS] become supporting carved forms obeying the same material and ornamental logic.

[ARCHITECTURE / INTERIOR / BACKGROUND] becomes a believable handcrafted carved-world field rather than neutral realism.

Increase:

object thickness,
surface tactility,
relief readability,
carved depth structure,
panel/object mass relation,
and spatial clarity.

Do not lose:

source-born carving grammar,
walnut authority,
workshop-made logic,
pattern intelligence,
and Kashmiri object/interior identity.

Avoid:

generic artisan 3D,
luxury décor rendering,
premium product polish,
machine-cut perfection,
soft sculptural fantasy,
or realism first with carving added later.

The final image must feel like:

the same source walnut-carving grammar has entered handcrafted dimensional reality.

Image-to-Image

Convert this source image into **V2 authentic handcrafted dimensional Walnut Carving / Kashmir.**

Preserve the source image's:

[SUBJECT COUNT]

[CORE ACTION]

[MAIN RELATIONSHIPS]

[KEY PROPS]

[VIEWER-READ]

[BASIC STAGING]

Replace ordinary image logic with:

real walnut thickness,
chiselled relief hierarchy,
cut planes,
surface-depth carving,
ornamental field organization,
and workshop-finished but hand-authored walnut presence.

Allow:

stronger objecthood,
clearer carved volume,
more tactile walnut surface,
better relation between carved forms and surrounding space,
and moderate spatial opening.

Do not:

turn it into premium furniture realism,
make it generic 3D carved décor,
keep realistic humans and decorate props,
let polish overpower carved intelligence,
or let the environment remain neutral while only objects are style-coded.

The final result must feel like:

a handcrafted dimensional expansion of the same Kashmiri walnut-carving style-core.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

For the style **Walnut Carving / Kashmir**, create the image in **V3 = fully resolved believable dimensional translation of the same source style**.

Preserve the same unchanged deep style-core:

real walnut material authority,
chiselled relief and surface-depth carving,
dense floral/geometric/calligraphic pattern intelligence,
workshop-made carving memory,
object-plus-architectural Kashmiri use,
and whole-frame carved-world consistency.

Keep these scene invariants fixed unless explicitly changed:

[SUBJECT COUNT]
[CHARACTER ROLES]
[RELATIONSHIPS BETWEEN SUBJECTS]
[KEY PROPS]
[ENVIRONMENT FUNCTION]
[ACTION / POSE PURPOSE]
[EMOTIONAL BEAT]
[VIEWER-READ]
[BASIC STAGING LOGIC]

Now push the same source style into its most complete and believable dimensional world.

Increase:

full volumetric embodiment,
stronger walnut material clarity,
deeper but still style-born spatial resolution,
stronger figure-ground separation,
stronger environmental completion,
clearer focal hierarchy,
clearer full-frame orchestration,
and stronger carved-world coherence.

But do not introduce:

generic realism,
generic cinematic illustration,
film-look logic,
concept-art polish,
luxury wood-interior styling,
fashion-photo finish,

a premium reskin,
or a second visual language on top of the source style.

The characters must still be made from the style itself.
The environment must still be made from the style itself.
Every visible element must still belong to the same walnut-carving language.

Critical V3 test:

if removing the “premium” finish would cause the source style to disappear, the V3 prompt is wrong.

The realism must come from walnut-carving logic itself:

real wood mass,
real carved depth,
real object presence,
real panel and furniture thickness,
real architectural carve-space,
same style-core unchanged.

The result should feel like:

the same Kashmiri walnut-carving tradition has become fully embodied, materially believable, and spatially complete without becoming a different style.

Reusable Variable Template

For the style **Walnut Carving / Kashmir**, create **[SCENE / SUBJECT / OBJECT WORLD]** in **V3 = fully resolved believable dimensional translation of the same source style.**

Keep the same unchanged core:

walnut authority,
carved relief depth,
pattern intelligence,
workshop-made finish,
object-plus-architectural use,
and Kashmiri carved-world presence.

Keep these invariants fixed unless explicitly changed:

[SUBJECT COUNT]
[CHARACTER ROLES]
[RELATIONSHIPS]
[KEY PROPS]
[ENVIRONMENT FUNCTION]
[ACTION / POSE PURPOSE]
[EMOTIONAL BEAT]

[VIEWER-READ]
[BASIC STAGING LOGIC]

Translate the image like this:

[MAIN SUBJECT / MAIN OBJECT] becomes a fully embodied walnut-carved presence with believable depth, mass, and material authority.

[SECONDARY FIGURES / OBJECTS] become equally style-born carved presences obeying the same carved grammar.

[ARCHITECTURE / INTERIOR / BACKGROUND] becomes a complete inhabitable carved-world built from the same source logic.

Increase:

material believability,
relief depth clarity,
object mass,
surface resolution,
spatial completion,
environmental coherence,
focal control,
and whole-frame unity.

Do not lose:

source-born face logic,
source-born body logic,
carved contour behavior,
pattern intelligence,
Kashmiri interior/object identity,
and workshop-made material truth.

Avoid:

luxury décor styling,
generic realism,
cinematic wood mood,
premium product polish,
background-realism drift,
or any realism stronger than the walnut-carving system.

The final image must feel like:

the same walnut-carving source grammar fully embodied into believable reality.

Image-to-Image

Convert this source image into **V3 fully resolved believable Walnut Carving / Kashmir**.

Preserve the source image's:

[SUBJECT COUNT]
[CORE ACTION]

[MAIN RELATIONSHIPS]

[KEY PROPS]

[VIEWER-READ]

[BASIC STAGING]

Replace ordinary realism with:

real walnut mass,
deep but controlled carved relief,
chiselled surface-depth hierarchy,
pattern-led carved organization,
workshop-made walnut finish,
and Kashmiri object-plus-architectural carved-world logic.

Expand the image into:

full volumetric presence,
strong figure-ground separation,
material clarity,
environmental completion,
object weight,
surface-depth resolution,
and complete whole-frame carved-world consistency.

Do not turn the image into a luxury interior makeover.

Do not let it become generic rich wooden realism.

Do not leave the background neutral while only props are style-coded.

Do not let realism replace carving grammar.

Do not let V3 become a more dramatic or more stylish cousin of V1.

The final image must feel like:

Kashmiri walnut carving itself has become fully embodied reality, not reality coated with Kashmiri carving.

Hmaram

Puanlaisen stripe-ground
