

Chamba miniature - Himachal Pradesh

V1 — Authentic Style

Universal Hard Prompt

Create the image in the authentic visual logic of Chamba miniature painting from Himachal Pradesh, a Pahari court painting tradition built as miniature painting on paper, known for mythological and literary narrative scenes, Chamba-specific figure and face handling, a courtly red–blue color logic with gold or silver enrichment, and in major mid-eighteenth-century Chamba work a strong use of staged architecture, isometric spatial construction, registers, and pictorial narrative division.

Do not treat this as generic Indian miniature painting, generic Pahari painting, Kangra softness, Mughal realism, mythological poster art, or old-paper texture styling. Rebuild the entire image as a true Chamba miniature world.

The image must read first as:

- miniature painting on paper
- court-built religious or literary narrative painting
- Chamba-specific figure and physiognomic handling
- pictorial architecture and staged built environment where relevant
- controlled painted color with strong red–blue organization
- narrative grouping stronger than realism

WHOLE-FRAME RULE:

Every visible element must belong to the same Chamba system.

- all faces must become Chamba-painted faces, not generic miniature or realistic faces
- all bodies must become painted courtly figures, not realism-built bodies
- all gestures must become narrative and iconically legible, not casual realism
- all architecture must become Chamba pictorial architecture: staged, composed, and miniature-built
- all objects, thrones, weapons, interiors, floors, and sky zones must belong to the same miniature logic
- all spacing and grouping must feel like a narrative folio, not camera-framed realism
- no important element may remain in another visual language

FACE RULE:

Use Chamba-painted physiognomy and courtly miniature face construction. Faces must feel painted, structured, and school-specific rather than soft generic devotional faces or realistic portrait heads.

FIGURE RULE:

Use miniature-built bodies, poised posture, controlled gesture, and image-led anatomy. Do not use realism anatomy, cinematic pose logic, or poster-like exaggeration.

ARCHITECTURE RULE:

Where architecture appears, use staged and compositional architecture rather than realism buildings. Allow frontal and isometric pictorial construction, architectural enclosures, pillars, platforms, and scene-dividing built forms when needed.

SPACE RULE:

Use miniature-composed space. Allow pictorial depth and narrative division, but do not use realism-first perspective as the main engine.

COLOR RULE:

Use a Chamba court-painting palette: strong red–blue organization, controlled painted color, with gold or silver enrichment where appropriate. Do not drift into Kangra greens as the dominant identity unless the scene truly requires landscape, and even then it must remain Chamba-built.

SHADOW RULE:

Use painterly tonal support only. No realism-first shadow modeling, no cinematic chiaroscuro takeover.

NARRATIVE RULE:

The image must feel like a mythological or literary folio world: Dashavatara, Bhairava, Bhagavata, divine court scenes, epic or sacred episodes, or similarly structured narrative painting logic.

NEGATIVE RULE:

- no generic miniature art
- no Kangra-like lyrical green-world by default
- no Mughal realism
- no devotional poster look
- no texture transfer only
- no costume transfer only
- no old-paper filter only
- no realism-built architecture
- no realism-first shadow
- no generic mythological fantasy

OUTPUT GOAL:

The final result must feel like a true Chamba miniature where figure, face, architecture, color, space, grouping, and narrative are all rebuilt from the base upward through Chamba logic.

Reusable Variable Template

Create [SUBJECT / SCENE / NARRATIVE MOMENT] in the authentic visual logic of Chamba miniature painting from Himachal Pradesh.

STYLE SYSTEM:

miniature painting on paper,
courtly religious-literary narrative,
Chamba-built figure and face logic,
red–blue painted palette with gold/silver enrichment,
staged pictorial architecture where relevant,
miniature-composed space,
narrative grouping stronger than realism.

WHOLE-FRAME RULE:

Rebuild everything through Chamba logic:

- [MAIN FIGURE] becomes a Chamba-painted focal figure
- [SECONDARY FIGURES] become supporting Chamba-painted figures
- [FACES] become Chamba-specific miniature faces
- [GESTURES] become narrative and image-led gestures
- [ARCHITECTURE / INTERIOR / THRONE / PLATFORM / PAVILION] becomes staged Chamba pictorial architecture
- [OBJECTS / WEAPONS / DECORATIVE ELEMENTS] become painted miniature forms
- [GROUND / SKY / BACKDROP / SCENE DIVISIONS] become Chamba folio space
- [GROUPING] becomes narrative miniature grouping, not realism staging

KEEP:

miniature-on-paper identity
Chamba face logic
Chamba figure logic
courtly narrative painting logic
red–blue palette control
painting-first composition

AVOID:

generic miniature painting
Kangra softness by default
Mughal realism
mythological poster styling
surface-only transfer
realism-built architecture

Image-to-Image

Convert this source image into the authentic visual logic of Chamba miniature painting from Himachal Pradesh.

Preserve the source image's core narrative, main subject hierarchy, key action, and symbolic center, but rebuild the full image through:

- miniature painting on paper logic
- Chamba-built faces and figures
- courtly religious-narrative grouping

- staged pictorial architecture where needed
- red–blue painted palette control with gold/silver enrichment where appropriate
- painterly miniature space instead of realism space

Translate the entire frame:

- faces into Chamba-painted faces
- bodies into Chamba-built figures
- gestures into narrative miniature gestures
- architecture into staged pictorial architecture
- objects into painted miniature objects
- backdrop and ground into folio-built space
- grouping into Chamba narrative organization
- shadow into painterly support only

Do not simply add old-paper texture.

Do not only change costume.

Do not only add red and blue.

Do not keep realism architecture underneath.

Do not turn it into generic miniature devotional art.

The final result must feel like the source image was rebuilt from scratch as a Chamba miniature folio world.

Stylescape prompt

Create a stylescape board for the authentic source-faithful Chamba miniature system.

The board must communicate the total image-making logic of Chamba miniature painting, not just decorative references.

Include visual clusters for:

- Chamba-specific face and physiognomy logic
- painted miniature body construction and gesture logic
- staged architecture, isometric building logic, pillars, platforms, and narrative enclosures
- red–blue court palette with gold/silver accents
- religious and literary folio-world atmosphere
- miniature painting-on-paper material memory
- register-based or scene-dividing composition logic
- narrative grouping and sacred scene construction
- painterly tonal support without realism shadow takeover
- courtly refinement and controlled pictorial density

The stylescape must feel like:

a Chamba narrative miniature world,

not generic Pahari painting,

not Kangra lyricism,

not Mughal realism,

not devotional poster art.

Mood board prompt

Create an analytical multi-panel mood board for the authentic source-faithful Chamba miniature system.

Include:

1. extreme close-up of painted paper surface and miniature finish
2. close-up of Chamba face and physiognomic logic
3. close-up of body, hand, and gesture construction
4. close-up of staged architecture, pillars, walls, and pictorial built-space logic
5. close-up of red–blue color behavior with gold/silver enrichment
6. medium panel showing figure-to-architecture relation
7. wide panel showing full mythological / literary scene composition
8. process-memory panel showing miniature-on-paper, pigment, and painted-folio logic
9. palette panel showing Chamba court color structure
10. narrative-context panel showing Dashavatara / Bhairava / sacred folio-world atmosphere

The board must communicate:

Chamba as a total narrative miniature system,
not texture,
not palette only,
not costume only,
but full pictorial reconstruction.

V2 — Artisan Translation

Universal Hard Prompt

Create the image in an authentic handcrafted dimensional translation of Chamba miniature painting from Himachal Pradesh, where the full Chamba grammar remains primary but the pictorial world becomes richer in depth, architectural layering, tonal support, and painted tactility.

Do not treat this as a realistic historical Indian scene with miniature styling. Do not use texture transfer. Rebuild the image so the Chamba system itself generates the dimensional world.

Keep the full source grammar active:

- miniature painting on paper logic
- Chamba-built figure and face handling

- religious and literary narrative scene construction
- staged pictorial architecture where relevant
- red–blue palette control with gold/silver accents
- miniature-composed space and grouping

WHOLE-FRAME RULE:

Everything must still belong to one Chamba-built world.

- figures must gain depth but remain Chamba-constructed, not realism-constructed
- faces must remain school-specific and painted, not softened into generic beauty
- architecture must gain tactile presence but remain pictorially staged, not realism-built
- objects and scene props must remain miniature-born
- shadow must remain painterly and subordinate
- space must gain richness while staying folio-composed
- grouping must remain narrative and image-led
- no important element may default to realism

ALLOW THESE TO BECOME RICHER:

- figure depth
- architecture layering
- tonal transitions
- material tactility
- scene coherence
- narrative readability
- courtly richness

SPACE RULE:

Use dimensional pictorial space, not realism-first cinematic space. Depth is allowed, but it must remain painting-born and composition-led.

SHADOW RULE:

Use soft tonal support that helps depth but never overtakes miniature logic.

NEGATIVE RULE:

- no realistic historical fantasy
- no generic miniature costume styling
- no texture overlay
- no realism-built architecture
- no poster-like mythological mood
- no Kangra landscape softness by default
- no realism-first light

OUTPUT GOAL:

The final result must feel like Chamba miniature painting has expanded into a richer handcrafted dimensional world while keeping full control over figure, architecture, space, grouping, and narrative logic.

Reusable Variable Template

Create [SUBJECT / SCENE / NARRATIVE MOMENT] as an authentic handcrafted dimensional translation of Chamba miniature painting.

STYLE SYSTEM:

miniature-on-paper origin,
Chamba-specific faces and figures,
courtly mythological narrative,
staged pictorial architecture,
red–blue palette with gold/silver enrichment,
miniature-composed space,
painting-first image logic.

WHOLE-FRAME RULE:

- [MAIN FIGURE] becomes a dimensional but still Chamba-built figure
- [SECONDARY FIGURES] become supporting Chamba figures in the same folio-world
- [FACES] remain Chamba-painted and school-specific
- [ARCHITECTURE / INTERIOR / PLATFORM / PAVILION] becomes deeper but still staged miniature architecture
- [OBJECTS / WEAPONS / ATTRIBUTES] become dimensional miniature forms
- [SPACE] becomes richer but still folio-composed
- [SHADOW] remains painterly and subordinate
- [GROUPING] remains narrative and image-led

ALLOW:

more depth
more architecture layering
more tonal support
more painted tactility
more narrative coherence

KEEP:

Chamba face logic
Chamba figure logic
miniature painting identity
court narrative construction
red–blue palette control
painting-first organization

AVOID:

realism underneath
texture transfer only
costume transfer only
generic Pahari softness
realism-built architecture
mythological poster aesthetics

Image-to-Image

Convert this source image into an authentic handcrafted dimensional Chamba miniature world.

Keep the source image's emotional center, subject hierarchy, key narrative action, and symbolic focus, but rebuild the full frame through:

- Chamba-built faces and figures
- staged Chamba architecture where needed
- miniature-on-paper image logic
- red–blue palette with gold/silver control
- painterly tonal support
- dimensional but folio-born space
- narrative grouping stronger than realism

Translate the entire frame so that:

- people become Chamba-painted figures, not realistic figures with miniature accents
- buildings become staged miniature architecture, not realism architecture
- props become court-painted objects
- ground and background become Chamba pictorial space
- shadows become painterly support
- composition becomes narrative and image-led

Do not simply add brush texture.

Do not just age the paper.

Do not just enrich the colors.

Do not keep the original realism under the style.

The final result must feel like the source image was rebuilt into a dimensional Chamba miniature folio world from the base structure upward.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a fully volumetric cinematic world generated by Chamba miniature painting logic from Himachal Pradesh, where the whole reality feels born from Chamba-built figures, miniature-on-paper narrative construction, staged architecture, courtly mythological scene logic, and red–blue painted image intelligence rather than merely decorated by miniature-style surface cues.

Do not assume prior knowledge of the style. The core system is this:

Chamba miniature is a Pahari court painting tradition on paper, associated with religious and literary narrative scenes, Chamba-specific figure handling, red–blue palette emphasis with

gold/silver enrichment, and in key mid-eighteenth-century Chamba work a strong use of staged architecture, isometric composition, and narrative division.

This version must not become:

- generic realistic Indian historical fantasy
- Mughal realism with Chamba details
- generic mythological cinema poster art
- realism-built architecture with miniature faces
- old-paper texture on realistic scenes

Instead, let the entire world be generated by Chamba pictorial intelligence.

WHOLE-FRAME WORLD RULE:

Every visible element must belong to the same Chamba-built world.

- figures must be Chamba-built in face, body, gesture, and narrative bearing
- architecture must be Chamba-built in pictorial logic, not realism-built
- objects must be court-painted and miniature-born in structure
- space must be generated by folio logic and staged scene division
- color must remain Chamba-controlled, not generic fantasy grading
- shadow must remain painting-subordinate, never realism-dominant
- grouping must remain narrative and constructed, not camera-naturalistic
- no important element may remain realism-first underneath

ORIGIN-SYSTEM MEMORY RULE:

Even in a fully cinematic world, the image must still visibly remember:

- miniature painting on paper
- Chamba face and figure logic
- staged pictorial architecture
- religious / literary narrative construction
- red-blue court color with metallic enrichment
- image-led composition stronger than realism

SPACE RULE:

Allow full spatial depth, cinematic immersion, and environmental layering, but keep the world generated by Chamba miniature logic rather than realism-first camera logic.

SHADOW RULE:

Use full-world shadow only insofar as it remains subordinate to miniature composition and painted hierarchy. No realism lighting takeover.

NEGATIVE RULE:

- no generic historical fantasy
- no Mughal realism drift
- no devotional poster realism
- no texture transfer
- no costume transfer
- no realism-built architecture
- no generic cinematic grading

no realism stronger than Chamba pictorial logic

OUTPUT GOAL:

The final result must feel like Chamba miniature painting became an inhabitable cinematic world, with full transformation of form, shadow, space, architecture, grouping, and narrative logic.

Reusable Variable Template

Create [SUBJECT / SCENE / NARRATIVE WORLD / SACRED MOMENT] as a fully volumetric cinematic world generated by Chamba miniature painting logic.

STYLE SYSTEM:

miniature painting on paper,
Chamba-specific face and figure construction,
courtly religious-literary narrative,
staged pictorial architecture,
red-blue palette with gold/silver enrichment,
painting-first space,
narrative grouping stronger than realism.

WHOLE-FRAME WORLD RULE:

- [MAIN FIGURE] becomes a Chamba-built volumetric focal figure
- [SECONDARY FIGURES] become supporting Chamba figures in the same world
- [FACES] remain Chamba-specific and painted in logic
- [ARCHITECTURE / INTERIORS / PLATFORMS / WALLS / PAVILIONS] become staged Chamba-built architecture
- [OBJECTS / ATTRIBUTES / THRONES / WEAPONS] become miniature-born volumetric forms
- [SPACE] becomes Chamba-generated narrative depth
- [SHADOW] remains subordinate to painting logic
- [GROUPING] becomes image-led and sacred / narrative

INCREASE:

world depth
architectural recession
figure-ground coherence
scene layering
cinematic readability
full-world continuity

DO NOT LOSE:

miniature-on-paper origin memory
Chamba face logic
Chamba figure logic
staged architecture

red–blue court palette
narrative folio intelligence

AVOID:

realism-first fantasy
generic miniature styling
texture-only transfer
Mughal realism
poster art
realism-built architecture

Image-to-Image

Convert this source image into a fully volumetric cinematic Chamba miniature world.

Preserve the source image's core narrative, main subject hierarchy, symbolic center, and readable scene structure, but rebuild the entire frame through:

- Chamba-built faces and figures
- staged pictorial architecture
- miniature-on-paper narrative construction
- red–blue court color control with gold/silver enrichment where appropriate
- painting-first space and grouping
- shadow subordinate to miniature logic

Translate the whole frame:

- faces into Chamba faces
- bodies into Chamba-built figures
- gestures into narrative miniature gestures
- buildings into Chamba pictorial architecture
- objects into court-painted forms
- ground, sky, backdrop, and scene division into Chamba folio space
- emotional reading into sacred / literary miniature atmosphere

Do not simply apply a miniature filter.

Do not just recolor the scene.

Do not just change costume.

Do not keep realism architecture underneath.

The final result must feel like the source image was rebuilt into an inhabitable Chamba cinematic world from the base structure upward.
