

Khovar - Jharkhand

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic source-faithful visual logic of **Khovar mural painting from Jharkhand**, especially the **Hazaribagh marriage-wall tradition**. Treat this as a **women-led ritual wall-painting system for the wedding chamber**, made on **mud-house walls** through a **black clay underlayer, white kaolin top layer, and etched revelation of forms using combs or fingers**. Do not treat it as generic tribal mural art, not as harvest-wall Sohrai, not as framed folk painting, and not as decorative black-and-white wall design.

Build the full image as if it is born from a real **marriage-room wall**. The wall must feel earthen, layered, absorbent, ceremonial, and domestic. The image should feel wall-led, not canvas-led. Preserve the process memory of:

- black clay base
- white clay or kaolin upper layer
- motifs revealed by scratching, comb-cutting, or finger-etching through the upper layer

The main visual energy must come from **contrast and incision**, not brush-painted illustration. The motifs should feel revealed from the wall rather than applied onto it.

Use a true Khovar color logic:

- dominant black and white or near-monochrome contrast
- clay and mineral wall tones
- no synthetic bright colors
- no Sohrai-style multicolor earth-paint abundance
- no graphic-design monochrome polish

The content should come from the Khovar marriage-wall world:

- floral patterns
- fertility-linked imagery
- birds
- animals
- anthropomorphic or symbolic life forms
- ceremonial domestic-wall rhythm

These motifs must not behave like isolated illustrations. They must behave like an etched ceremonial field spread across a marriage wall.

Marks must feel hand-cut, comb-made, finger-revealed, or scratched through a moist layered wall surface. The work should feel direct, repetitive, slightly irregular, and handmade. It must not look vector-clean, printed, or digitally graphic.

Whole-frame rule: if the image includes wall, doorway, room-edge, alcove, empty contrast fields, motif clusters, and domestic ceremonial space, all of it must belong to one Khovar wall ecology. The style must not stop at motif transfer. The wall body, contrast logic, mark logic, marriage-room meaning, and room context must all become Khovar.

Do not generate:

- generic tribal black-and-white mural
- Sohrai harvest-wall language
- framed monochrome folk painting
- decorative wallpaper pattern
- modern black-and-white mural branding
- brush-painted mural replacing etched reveal
- black-and-white décor with no marriage-wall ritual body

The final image must feel like **a true Khovar marriage-wall from Jharkhand: mud-house wall, black-under-white clay layering, comb-cut or finger-etched revelation, women-led ceremonial authorship, and fertility-floral-bird-animal mural rhythm fused into one living wall.**

Reusable Variable Template

Create **[SUBJECT / WALL TYPE / MARRIAGE-ROOM SCENE]** in the authentic source-faithful visual logic of **Khovar mural painting from Jharkhand**, treating it as a **marriage-wall ritual system on mud-house surfaces.**

Core style system to preserve:

- marriage-wall identity
- mud-wall body
- black underlayer and white top-layer contrast
- comb-cut / finger-etched reveal logic
- women-led ceremonial domestic memory
- fertility / floral / bird / animal mural rhythm
- near-monochrome clay contrast
- wall-field expansion instead of framed composition
- Khovar distinct from Sohrai

Translate the image like this:

- **[WALL / SURFACE]** becomes a real mud-house marriage wall with layered clay body
- **[MAIN MOTIFS]** become Khovar-style etched mural forms revealed from the wall
- **[COLOR SYSTEM]** becomes black-white clay contrast with earth-material realism
- **[MARK BEHAVIOR]** becomes comb-cut, finger-etched, scratched, and handmade
- **[DOMESTIC CONTEXT]** remains part of a Jharkhand marriage-room wall ecology

- **[FULL FRAME]** must read as one ceremonial etched wall-world, not motif stickers on a generic room

Keep:

- wall first
- reveal process first
- marriage-wall identity
- monochrome clay contrast
- fertility and life motifs as ceremonial field
- handmade incision rhythm
- whole-wall coherence

Avoid:

- framed-art logic
- harvest-wall Sohrai cues
- decorative pattern wallpaper
- brush-painted monochrome mural
- polished graphic linework
- generic tribal design language

Image-to-Image

Convert this source image into the authentic source-faithful visual logic of **Khovar mural painting from Jharkhand**.

Preserve the source image's main subject count, overall wall or architectural arrangement, and core readability, but rebuild the full image through **mud-house marriage-wall body, black clay underlayer, white kaolin top layer, comb-cut or finger-etched reveal logic, and fertility-floral-bird-animal ceremonial mural rhythm**. Replace any generic mural, modern black-and-white wall art, harvest-wall cues, painted folk styling, or decorative graphic logic with a true **Khovar marriage-wall system**.

If the source image contains a wall, make it a real earthen mud-house marriage wall. If it contains motifs, rebuild them as etched Khovar forms rather than generic monochrome folk shapes. If it contains black-and-white contrast, make that contrast come from layered clay and reveal logic rather than surface painting. If it contains domestic architecture, make that architecture belong to a ceremonial room-wall ecology. If it contains empty areas, let them participate in the etched field instead of acting like neutral background.

Do not simply add black-and-white motifs to the existing image. Do not keep another mural language underneath. Rebuild the full wall so **surface, layers, etched marks, motif rhythm, and marriage-room wall context all become one authentic Khovar system**.

V2 — Artisan Translation

Universal Hard Prompt

Create a **creative 2D + 3D translation** of **Khovar mural painting from Jharkhand**. This is not generic monochrome tribal styling, not texture transfer, and not simply placing black-and-white motifs on a wall. It should feel like the full **marriage-wall, layered-clay, etched-reveal grammar** of Khovar has begun to reorganize the image more powerfully while still remaining source-rooted.

Let the wall stop behaving like passive background and become the main compositional force. Let the black-and-white layered contrast become structurally dominant. Let floral, bird, animal, and fertility motifs become more deeply interwoven into one ceremonial field. Let the marriage-room wall and domestic architecture around it feel more absorbed into the mural grammar. But keep the image unmistakably **Khovar**, not Sohrai and not generic black-and-white folk design.

This version must transform more than surface. Change:

- the **wall-body logic** so the support surface becomes more compositionally active
- the **contrast-field organization** so the black/white reveal behaves like one expanded ceremonial ecology
- the **space construction** so the 2D wall plane and subtle 3D room architecture work together as one system
- the **mark logic** so comb-cut / finger-cut rhythm becomes more visually authored without becoming graphic design
- the **layer-body relation** so black underlayer and white top layer become more structurally expressive
- the **environment logic** so room edges, doorframes, niches, wall planes, and contrast fields all belong to one Khovar world

Keep the source truth intact:

- mud wall remains primary
- black-under-white layered clay remains dominant
- reveal-through-incision remains stronger than painted line
- marriage-wall identity remains central
- women-led domestic ritual memory remains implicit
- Khovar must stay distinct from Sohrai

Do not generate:

- monochrome wallpaper-like folk patterning
- vector-clean mural graphics
- decorative black-and-white ethnic wall design

- motif transfer on a generic wall
- harvest-wall Sohrai cues
- painted monochrome mural replacing etched reveal

The final result must feel like **Khovar's marriage-wall grammar has reauthored the full image through layered clay contrast, ceremonial wall-field rhythm, and etched revelation.**

Reusable Variable Template

Create **[SUBJECT / WALL TYPE / MARRIAGE-ROOM SCENE]** as a creative 2D + 3D translation of Khovar mural painting from Jharkhand.

Preserve these style-core rules:

- mud-wall support remains primary
- black underlayer and white top layer remain active
- reveal-through-incision remains stronger than painted application
- marriage-wall identity remains stronger than decoration
- floral / bird / animal / fertility field remains structurally Khovar
- women-led ceremonial wall memory remains present
- the image must be rebuilt as a layered etched wall system, not decorated after the fact

Translate the image like this:

- **[WALL / SURFACE]** becomes a stronger active layered mural body
- **[MAIN MOTIFS]** become more structurally woven into a unified ceremonial field
- **[DOMESTIC ARCHITECTURE]** becomes more integrated into the Khovar grammar
- **[MARKS / RHYTHMS / CONTRAST FIELDS]** become more compositionally decisive while staying handmade and etched
- **[BLACK / WHITE CLAY BODY]** becomes richer but still matte, earthen, and reveal-driven
- **[FULL FRAME]** must feel reauthored by Khovar wall logic, not just decorated with motifs

Mandatory transformation rule:

Do not transfer only motif, texture, or palette.

Also transform:

- wall-body behavior
- contrast-field structure
- mark rhythm
- room-space relation between wall and architecture
- environment logic
- full ceremonial field organization

Let these become richer:

- mural spread
- black/white wall integration
- incision cadence
- marriage-room architectural absorption
- layered clay body
- full-surface coherence

Keep unchanged:

- wall first
- reveal process first
- marriage-wall identity
- Khovar not Sohrai
- women-led ceremonial memory
- whole-frame coherence

Avoid:

- framed-art logic
- decorative monochrome pattern design
- generic mural graphics
- ethnic branding language
- painted-illustration finish
- harvest-wall drift

Image-to-Image

Convert this source image into a **creative 2D + 3D Khovar wall world from Jharkhand**.

Preserve the source image's main subject count, wall or architectural arrangement, and overall readability, but rebuild the full frame through **mud-house marriage-wall body, black clay underlayer, white kaolin top layer, comb-cut or finger-etched reveal logic, and fertility-floral-bird-animal ceremonial mural rhythm**. Let the image become more compositionally transformed than a literal wall reference, while staying fully rooted in Khovar.

Rebuild the wall so it actively organizes the image. Rebuild motifs so they become part of one expanded etched field. Rebuild domestic edges, niches, or openings so they participate in the same contrast grammar. Rebuild marks so they feel handmade, direct, and reveal-born. Rebuild the layer logic so black and white behave like clay strata rather than graphic colors.

Do not just apply black-and-white Khovar motifs onto the existing image. Do not keep another mural logic underneath. Rebuild the full wall-world so **wall body, contrast field,**

etched reveal, ceremonial context, and room architecture all become one Khovar system.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a **full 3D realistic dimensional world** generated from **Khovar mural painting from Jharkhand**. This is not a realistic room with Khovar motifs painted on later. It is a believable world in which **mud-house marriage-wall body, black clay underlayer, white kaolin top layer, comb-cut or finger-etched revelation, women-led ceremonial authorship, and fertility-floral-bird-animal mural rhythm** govern every visible element.

Translate the full style-system into reality. Every part of the frame must adapt:

- walls must behave like real mud-house marriage-wall surfaces
- black and white must behave like layered clay body, not graphic paint
- motifs must behave like revealed ceremonial wall fields, not isolated illustrations
- domestic architecture must behave like a living support for marriage-wall ritual painting
- shadows, wall depth, and wear must support layered clay truth rather than generic realism
- the environment must feel like a real Jharkhand domestic marriage-wall ecology

This version must not stop at realistic texture. It must rebuild:

- **wall-body logic** so support becomes physically and visually credible
- **layer-body logic** so black underlayer and white top layer remain materially believable
- **space** so the 3D room-world still feels governed by mural-surface priorities
- **mark behavior** so the wall retains comb-cut or finger-etched authorship even in realism
- **domestic environment** so doorways, alcoves, chamber edges, and adjoining surfaces all belong to the same ceremonial wall ecology
- **whole-frame coherence** so nothing looks like ordinary realism plus monochrome folk motifs

If people appear, they must belong to marriage-time domestic wall practice or the living ceremonial room-world around it. If no people appear, the environment must still feel inhabited, prepared, and ritually charged.

Do not generate:

- generic village-wall realism
- monochrome wall décor realism

- graphic black-and-white design realism
- framed-painting logic on a realistic wall
- harvest-wall Sohrai confusion
- contemporary mural branding or installation-art language

The final image must feel like **a real Jharkhand mud-house marriage-wall world in which Khovar's layered clay contrast and etched ceremonial grammar have become materially and spatially believable reality.**

Reusable Variable Template

Create **[SUBJECT / WALL TYPE / MARRIAGE-ROOM SCENE]** as a **full 3D realistic dimensional world** generated from **Khovar mural painting from Jharkhand.**

Style system that must remain unchanged:

- mud-wall body remains primary
- black underlayer and white top layer remain active
- reveal-through-incision remains stronger than painted mark logic
- marriage-wall identity remains central
- women-led domestic ceremonial memory remains present
- floral / bird / animal / fertility mural field remains structurally Khovar
- the entire frame must be rebuilt through one layered etched wall-system grammar

Translate the image like this:

- **[WALL / ROOM SURFACE]** becomes a believable prepared mud-wall body with layered clay contrast
- **[MOTIF SYSTEM]** becomes a real etched ceremonial field integrated into the architecture
- **[DOMESTIC EDGES / OPENINGS / ALCOVES]** become part of the same marriage-wall ecology
- **[LAYER / CONTRAST BODY]** becomes physically convincing black-white clay behavior
- **[SURFACE DEPTH / WEAR / SHADOW]** becomes realistic without breaking ceremonial mural primacy
- **[FULL ENVIRONMENT]** becomes a coherent marriage-wall world rather than ordinary realism

Increase:

- wall tactility
- layer-body realism
- etched-field integration
- domestic spatial completion
- mark-material truth

- ceremonial environmental coherence

Do not lose:

- marriage-wall first
- layered clay truth
- reveal process truth
- Khovar not Sohrai
- women-led ceremonial authorship
- whole-frame room ecology

Avoid:

- realistic wall décor
- synthetic monochrome mural
- poster-like motifs on a wall
- decorative ethnic branding
- harvest-wall confusion
- ordinary realism with Khovar graphics added on top

Image-to-Image

Convert this source image into a **full 3D realistic Khovar wall world from Jharkhand**.

Preserve the source image's main subject count, overall architectural arrangement, and readable action structure, but rebuild every visible element through **mud-house marriage-wall body, black clay underlayer, white kaolin top layer, comb-cut or finger-etched revelation, and fertility-floral-bird-animal ceremonial mural rhythm**. Replace generic walls, generic black-and-white paints, decorative mural language, or generic village realism with a full Khovar marriage-wall ecology.

Rebuild the wall so it becomes the true physical support of the image. Rebuild motifs so they integrate into the contrast field. Rebuild color so it behaves like layered clay, not paint. Rebuild domestic architectural elements so they belong to a living ceremonial room-wall world. Rebuild shadows and surface depth so they strengthen wall-body realism rather than making the mural float away from the support.

Do not simply add realistic texture to a monochrome folk mural. Do not keep the original base-world underneath. Rebuild the full frame so **wall, clay layers, etched marks, motif rhythm, domestic architecture, and ceremonial environment all become one believable Khovar reality**.
