

Ganjifa - Karnataka

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic visual logic of **traditional Ganjifa Cards of Mysore, Karnataka**. Build the image as if it comes from a real **hand-painted deck tradition** from Mysuru: a bounded card field, miniature symbolic painting, fine contour discipline, and imagery organized as part of a larger game-and-knowledge system based on mythology, scripture, cosmology, and courtly teaching. The image must read first as **Mysore Ganjifa**, not as generic miniature painting, not as decorative circular art, not as souvenir-style mythological illustration, and not as printed card graphics.

Use real card-system logic. The image must feel like a **card in a deck**, not an isolated illustration. Every figure, emblem, motif, border, and spatial decision must feel governed by **theme-family order, bounded field discipline, and symbolic compression**. The image should feel like it belongs to a larger painted card universe with internal rules and relationships.

Use real whole-world translation logic. Do not only make the image round or decorative. Rebuild **shape logic, contour logic, field hierarchy, value grouping, space compression, image density, symbolic order, and object-world physics** through Ganjifa grammar. The whole world must feel generated by **painted card intelligence** rather than by ordinary painting logic.

Use real support logic. The surface must feel like a **crafted painted card object**, not poster paper, not print graphic, and not digital flat art. Keep a subtle sense of built support, prepared ground, careful hand-finishing, and miniature object dignity.

Use real figure logic. Figures and scenes must be **emblematic, compressed, and theme-readable**, not realism-first. Mythological and scriptural content should feel structured, codified, and card-worthy rather than like open narrative illustration.

Use real space logic. Space must remain **bounded and self-contained**. Do not let the image open into cinematic perspective. Depth may exist, but it must remain under card-field control.

Do not make it generic round folk painting.

Do not make it open miniature illustration.

Do not make it printed mythology graphics.

Do not make it decorative card-themed art with no system-order.

Do not let any major element belong to another visual language.

Reusable Variable Template

Create **[SUBJECT / OBJECT / SCENE / WORLD]** in the authentic visual logic of **traditional Ganjifa Cards of Mysore, Karnataka**.

Treat the style as:

a hand-painted card-system tradition,
a bounded miniature symbolic painting world,
a theme/suit/deck-order language,
and a Mysore court-pedagogic image system where each image belongs to a larger structured painted universe.

Core style system to preserve:

- card-system identity
- bounded card-field logic
- miniature symbolic compression
- fine contour discipline
- theme/suit/family order
- handcrafted painted support memory
- Mysore Ganjifa knowledge-world identity
- full-frame consistency so every visible element belongs to one Ganjifa world

Translate the image like this:

- **[MAIN SUBJECT / MAIN FORM]** becomes a Mysore Ganjifa-derived symbolic image built for a bounded card field
- **[SECONDARY FORMS / SUPPORTING ELEMENTS]** also obey the same miniature card logic
- **[BORDER / FIELD / EMBLEM / SUIT-LIKE STRUCTURES]** become organized through deck-order and card-boundary discipline
- **[ENVIRONMENT / CONTEXT / SUPPORT]** must support the card-object world rather than pulling the frame into ordinary realism

Shape logic:

keep forms emblematic, compressed, and card-readable rather than realism-first

Contour logic:

keep edges fine, deliberate, and miniature-controlled

Space logic:

keep the world bounded, self-contained, and system-organized rather than open and cinematic

Meaning logic:

keep mythology, scripture, cosmology, and courtly teaching order stronger than mere decoration

Keep:

- deck-family identity
- bounded field control
- symbolic clarity
- miniature discipline
- handcrafted card-object reading
- Mysore grounding

Avoid:

- generic circular painting
- open-scene miniature art
- souvenir mythological graphics
- print-design behavior
- random one-off composition
- one Ganjifa motif inside a non-Ganjifa world

Image-to-Image

Convert this source image into the authentic visual world of **traditional Ganjifa Cards of Mysore, Karnataka**.

Preserve the source image's main subject count, hierarchy, and readable order, but rebuild the entire image through **Ganjifa card-system grammar**. Replace generic painting logic with **bounded card-field intelligence**. Replace open illustration with **miniature symbolic compression**. Replace casual decoration with **deck-family order and image-system discipline**. Replace flat graphic output with the feeling of a **crafted hand-painted card object**.

If the source image contains mythological, epic, scriptural, astrological, or cosmological imagery, convert it so it feels like a real Mysore Ganjifa card, not a normal painting forced into a round frame. If the source image contains surrounding field or border space, make it behave like true card-boundary structure rather than empty background or poster margin.

Retain source-memory:

- card-system identity
- bounded field logic
- miniature symbolic painting
- fine hand-painted contour discipline
- handcrafted support-object feeling
- Mysore Ganjifa knowledge-world reading

Do not turn it into decorative circular art.

Do not turn it into printed mythology graphics.

Do not simply crop a normal image into a card shape.

Do not lose deck/system intelligence.
Do not let the frame stop behaving like Ganjifa.

V2 — Artisan Translation

Universal Hard Prompt

Create a **creative 2D + 3D image-world** rooted in the authentic logic of **traditional Ganjifa Cards of Mysore, Karnataka**. This version must remain source-rooted but may expand beyond literal card documentation into a richer visual system built from **bounded card fields, miniature symbolic image-making, deck-family order, fine contour structure, and Mysore court-pedagogic intelligence**.

The world must still feel generated from **Ganjifa grammar**, not from generic heritage fantasy. Keep card-boundary intelligence active. Keep symbolic compression stronger than realism. Keep theme/suit/family order structurally present. Let the frame grow richer, but still feel like it is being built by **painted system-card logic**.

Use real whole-world translation logic. The style must transform not only the painted surface but also:

- how shapes are compressed
- how contours hold meaning
- how fields are bounded
- how value is grouped
- how images belong to a family
- how space is controlled
- how the world repeats with variation
- how the object-support memory stays active

Allow the image to become more layered, more compositionally rich, and more spatially suggestive than a literal card study, but keep every visible form **Ganjifa-born**.

Do not make it generic round heritage fantasy.
Do not make it open mythological illustration.
Do not let deck-order disappear.
Do not let realism replace symbolic compression.
Do not let the style survive only as border and motif.

Reusable Variable Template

Create **[SUBJECT / OBJECT / SCENE / WORLD]** as a **creative 2D + 3D translation** rooted in authentic **Ganjifa Cards of Mysore, Karnataka**.

Treat the style as:

a painted card-system world,
a bounded miniature-symbolic field language,
a deck-family order system,
and a Mysore knowledge-world that can expand into a richer image-space without losing card-born discipline.

Preserve these style-core rules:

- card-system identity remains primary
- bounded field logic remains active
- miniature symbolic compression remains strong
- theme/suit/family order remains visible
- handcrafted support-object memory remains present
- full-frame coherence remains inside one Ganjifa world

Translate the image like this:

- **[MAIN SUBJECT]** becomes a Mysore Ganjifa-derived symbolic field-form built for system readability
- **[SECONDARY SUBJECTS]** also obey the same bounded miniature logic
- **[BORDERS / EMBLEMS / FIELD ZONES / ORDERING ELEMENTS]** become richer card-family structures rather than decorative trims
- **[ENVIRONMENT / CONTEXT / SUPPORT]** becomes a broader but still Ganjifa-governed world rather than ordinary realism

Let these become richer:

- field layering
- symbolic hierarchy
- family-order variation
- border-to-image relation
- miniature-world depth
- controlled 2D + 3D expansion
- full-frame Ganjifa coherence

Keep unchanged:

- deck-system memory
- bounded card logic
- miniature clarity
- symbolic compression
- handcrafted object dignity
- Mysore court-pedagogic grounding

Avoid:

- generic miniature fantasy
- round illustration with no system-order
- souvenir-product styling
- realism-first mythic world
- decorative border replacing card logic
- any major element leaving the Ganjifa system

Image-to-Image

Convert this source image into a **creative 2D + 3D Ganjifa translation** from Mysore, Karnataka.

Preserve the source image's main subject count, compositional hierarchy, field order, and readability, but reconstruct all visible elements through **Ganjifa card-system grammar**. Let the image become richer and more layered than a literal card study, but keep it fully rooted in **bounded painted fields, miniature symbolic compression, deck-family order, and handcrafted card-object logic**.

If the source image contains mythological, scriptural, cosmic, or courtly themes, convert them so they feel like true Ganjifa system-images rather than ordinary illustrations. If the source image includes borders, frames, emblems, or surrounding field space, reorganize them so the full frame behaves like a world generated by Ganjifa order rather than by generic design.

Retain:

- card-system memory
- bounded field logic
- miniature symbolic clarity
- deck-family order
- handcrafted support-object reading
- Mysore Ganjifa identity

Allow:

- richer layering
- broader field-world coherence
- controlled 2D + 3D expansion
- stronger symbolic hierarchy

Do not simply make the image round.

Do not turn it into decorative mythological circular art.

Do not let realism dominate the card-system.

Do not lose miniature compression.

Do not let the frame stop behaving like Ganjifa.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a **full 3D realistic dimensional world** generated from the authentic grammar of **traditional Ganjifa Cards of Mysore, Karnataka**. The image must feel believable, spatial, and materially convincing, but its realism must remain fully controlled by **card-system identity, bounded field discipline, miniature symbolic compression, suit/theme order, and handcrafted painted-object intelligence**.

Build the world from inside the craft system: the image must still feel like it comes from a **painted deck-world**, not from open realism. The field must still feel contained. The figures must still behave like symbolic miniature forms. The world must still preserve ordered family structure and card-born hierarchy even as it becomes dimensional.

Material logic is critical. The world must still remember **layered handmade card-object support**, not generic print graphics or poster surfaces. Do not turn Ganjifa into product-design realism or decorative collectible graphics.

Shape and space logic are critical. Forms must remain **bounded, compressed, and card-readable**. Space must grow from field organization, not replace it. Environment, support, background, and depth must still feel like extensions of Ganjifa's controlled card universe.

Light and value logic are critical. Lighting must strengthen **symbolic readability, field containment, contour clarity, and family-order hierarchy**, not dissolve them into generic scenic realism.

Do not make it a realistic mythological world with Ganjifa styling on top.

Do not make it decorative collectible realism.

Do not let field boundaries disappear into open space.

Do not let symbolic compression collapse into naturalism.

Do not allow any major element to belong to another visual language.

Reusable Variable Template

Create **[SUBJECT / OBJECT / SCENE / WORLD]** as a **full 3D realistic dimensional world** generated from authentic **Ganjifa Cards of Mysore, Karnataka**.

Treat the style as:

a painted card-system world,

a bounded miniature-symbolic field language,

a deck-family order structure,
and a believable reality whose shape, volume, light, and space are still controlled by Ganjifa card intelligence.

Style system that must remain unchanged:

- card-system identity
- bounded card-field logic
- miniature symbolic compression
- theme/suit/family order
- handcrafted support-object memory
- Mysore court-pedagogic grounding
- full-frame coherence inside one Ganjifa world

Translate the scene like this:

- **[MAIN SUBJECT]** becomes a fully dimensional Mysore Ganjifa-derived symbolic form structured by bounded field logic
- **[SECONDARY SUBJECTS]** become dimensional but still obey the same miniature card intelligence
- **[BORDERS / FIELD ZONES / ORDERING ELEMENTS / SUPPORTS]** become tactile Ganjifa-world elements
- **[ENVIRONMENT]** becomes a believable spatial field organized by containment, symbolic order, and painted-object hierarchy

Increase:

- believable volume
- support-object material presence
- spatial completion
- field-world integration
- full-frame coherence
- dimensional Ganjifa realism

Do not lose:

- deck-system memory
- bounded field control
- miniature compression
- symbolic hierarchy
- handcrafted card-object dignity
- Mysore identity

Avoid:

- generic mythological realism
- decorative circular art realism
- print-graphic product look
- open-scene painting logic

- collectible décor replacing system-order
- any non-Ganjifa system taking over the frame

Image-to-Image

Convert this source image into a **full 3D realistic Ganjifa world** from Mysore, Karnataka.

Preserve the source image's main subject count, object hierarchy, compositional structure, and readability, but rebuild the entire image through **Ganjifa card-system grammar**. Convert ordinary image-making into **bounded field intelligence**. Convert generic illustration into **miniature symbolic compression**. Convert isolated motifs into **deck-family order**. Convert generic support into a believable **handmade painted card-object world**.

If the source image contains mythological, epic, scriptural, astrological, or cosmological elements, transform them into Ganjifa-derived forms that still feel governed by card logic rather than open-scene realism. If the source image includes borders, framing, ordering zones, or surrounding field space, rebuild them so the full frame feels born from a coherent Ganjifa world rather than from normal illustration.

Retain:

- card-system identity
- bounded field memory
- miniature symbolic painting logic
- theme/suit/family order
- handcrafted support-object dignity
- Mysore Ganjifa knowledge-world grounding

Increase:

- dimensional realism
- material depth
- spatial completion
- field hierarchy
- full-frame Ganjifa integration

Do not simply crop a normal scene into a circle.

Do not turn it into decorative circular mythology art.

Do not let realism erase card-system intelligence.

Do not lose symbolic compression.

Do not allow one major element to remain outside the Ganjifa system.
