

Jhabua Adivasi Dolls - Madhya Pradesh

V1 — Authentic Style

Universal Hard Prompt

Create a full image-world in the authentic source-faithful grammar of **Jhabua Adivasi Dolls from Madhya Pradesh**. Do not make a realistic tribal scene with doll texture added later. Build the whole frame as if **tribal life itself has been re-authored through stuffed cloth doll logic**. Every figure must feel soft-bodied, hand-stuffed, slightly simplified, upright, and made rather than born. Faces must read as **earthy painted doll-faces**, not portraits. Dress, bead or silver-style ornament, baskets, instruments, and everyday accessories must carry role and social identity the way they do in the source dolls. The world must feel **staged, handmade, doll-scaled, and socially grouped**, with softened edges, padded volume, simplified posture, and a crafted object-presence across the whole frame. No ordinary realism, no realistic anatomy, no realistic skin, no generic rag-doll cuteness, no village realism with dolls inserted.

Reusable Variable Template

Create **[SCENE / SUBJECT / GROUP / EVENT]** in the authentic source-faithful grammar of **Jhabua Adivasi Dolls**. Translate the full image through: stuffed cloth body logic, painted earthy face logic, dressed tribal identity, ornament-coded silhouette, accessory-led role clarity, soft rounded volume, centered doll posture, and staged doll-world space.

Use this conversion map:

[MAIN FIGURES] become stuffed tribal dolls, not realistic people.

[FACES] become painted, simplified, earthy doll-faces.

[COSTUME / JEWELRY] become the main identity carriers.

[BASKETS / INSTRUMENTS / PROPS] become doll-world accessories, not realistic objects.

[BACKGROUND / GROUND / SURFACES / STRUCTURES] become handmade, softened, staged doll-space.

Keep the whole frame dollified. Avoid realism, portrait faces, hard anatomy, generic folk-craft mood, and cloth texture pasted over ordinary bodies.

Image-to-Image

Convert this source image into the authentic source-faithful world of **Jhabua Adivasi Dolls**. Preserve the source image's subject count, major action, and relationship clarity, but rebuild every visible element through **stuffed doll-body logic**. Replace realistic bodies with padded soft forms, replace portrait faces with earthy painted doll-faces, replace ordinary clothing with dressed tribal doll-costume logic, and replace realistic props with crafted accessories. Rebuild the environment as staged doll-space, not realistic village space. Do not merely add cloth texture or tribal costume. The full frame must feel like a handmade Jhabua doll-world.

V2 — Artisan Translation

Universal Hard Prompt

Create a full image-world in the **authentic handcrafted dimensional version** of **Jhabua Adivasi Dolls**. Keep the source doll grammar intact, but give it richer dimensional presence: fuller padded volume, clearer handmade seams and cloth-body transitions, stronger separation between face, costume, ornament, and accessory, and more tactile group staging. The world must still feel like a crafted stuffed-doll world, not realism. Faces remain painted doll-faces, bodies remain soft and simplified, and the whole environment must feel like a richer handcrafted doll-set built from the same logic.

Reusable Variable Template

Create **[SCENE / SUBJECT / GROUP / EVENT]** in the authentic handcrafted dimensional version of **Jhabua Adivasi Dolls**. Translate everything through stuffed doll construction, painted-face identity, dressed tribal coding, accessory-role clarity, and richer handmade depth.

Use this map:

[MAIN FIGURES] become more dimensional stuffed dolls, never realistic humans.

[FACES] gain clearer painted-object presence, never portrait realism.

[COSTUME / ORNAMENT] gain richer tactile layering.

[PROPS] become handcrafted doll accessories with more object-body presence.

[SPACE / BACKGROUND] becomes a dimensional doll-world stage with softened crafted depth.

Avoid realistic anatomy, plush-toy genericness, realism-first lighting, or decorative cloth texture on normal figures.

Image-to-Image

Convert this source image into the authentic handcrafted dimensional world of **Jhabua Adivasi Dolls**. Preserve the original scene logic, but rebuild the entire frame as a richer stuffed-doll environment with tactile padded forms, painted doll-faces, layered costume identity, accessory-coded role clarity, and handcrafted spatial staging. Add dimensionality to the doll-world, not realism to the people. No realistic tribal scene, no portrait faces, no soft texture pasted over ordinary bodies.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a **fully volumetric cinematic world** generated by the grammar of **Jhabua Adivasi Dolls**. This is not a realistic tribal village with dolls added. The whole world must obey doll-law: stuffed bodies, painted faces, softened object-space, crafted accessories, simplified

but expressive posture, and social grouping. Scale, surfaces, shadows, props, and architecture must all feel as though a Jhabua doll-world became a believable cinematic reality. Keep the world warm, soft, handmade, object-authored, and socially staged. No realistic skin, no naturalistic anatomy, no documentary realism.

Reusable Variable Template

Create **[SCENE / WORLD / EVENT]** as a fully volumetric cinematic version of **Jhabua Adivasi Dolls**.

Translate everything through: stuffed-body humanity, painted-face identity, dressed tribal coding, accessory-role worldbuilding, soft staged space, and handcrafted object-physics.

[FIGURES] become cinematic stuffed dolls.

[PROPS] become crafted accessory-objects.

[SURFACES / BUILDINGS / TREES / GROUND] become doll-world structures with softened made-ness.

[LIGHT / SHADOW / DEPTH] must support a believable doll-authored cinematic world, never ordinary realism.

Avoid realism with doll-like characters, village realism, or costume-only style survival.

Image-to-Image

Convert this source image into a fully volumetric cinematic world generated by **Jhabua Adivasi Doll grammar**. Preserve action and readability, but rebuild all figures as stuffed crafted presences, all faces as painted doll identities, all props as doll-world accessories, and all environments as staged handcrafted space. The result should feel like the world itself has become a cinematic Jhabua doll-set with believable depth and light, not a realistic scene wearing doll styling.
