

Pawndum - Mizoram

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic source-faithful visual logic of **Pawndum from Mizoram**. Treat this as a **dark, socially charged woven wrap-cloth system**, not as a generic Mizo textile, decorative ethnic stripe fabric, print design, fashion shawl, or festival cloth. Build the entire image as if it comes from a handwoven cloth tradition whose deepest identity is **dark-ground authority, bold warp-stripe order, two-piece panel construction, lower-body wrap behavior, and socially coded use across dormitory life, dance, marriage, relational exchange, and mourning**.

The cloth must feel structurally built, not decorated. Preserve the spirit of **two loom-width woven pieces joined into one cloth, a blue-black or black dominant body, and bold red warp stripes** that feel woven into the structure rather than placed on top. The cloth must behave like a **waist-wrapped lower-body garment**, covering the lower body with grounded, restrained, body-bound authority. It must not feel like a scarf, shoulder shawl, decorative stole, or loose fashion drape.

If figures appear, they must not remain generic realistic people wearing a traditional cloth. Their stance, silhouette, body-wrap relation, and lower-body massing must also be rebuilt through Pawndum logic: dark-wrap authority, stripe order, panel discipline, and socially coded seriousness. If props, architecture, or environment appear, they must belong to the same structural world and inherit the same woven restraint rather than staying generic.

Material behavior must preserve handwoven truth: dark woven body, structurally integrated stripe order, matte textile tactility, panel memory, and lower-body wrap gravity. The whole frame must feel born from Pawndum, not styled with Pawndum.

Do not make this generic Mizo handloom, decorative striped fabric, fashion wrap, printed black-red textile, festive heritage cloth, or a realistic scene with one traditional garment added afterward. Do not erase the two-piece construction. Do not soften the cloth into shawl behavior. Do not let black-red striping become generic patterning. Do not let the rest of the frame remain in another visual language.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** in the authentic source-faithful visual logic of **Pawndum from Mizoram**.

Treat the style as a **dark woven lower-body wrap-cloth system** built from:

- dark-ground authority
- bold warp-stripe order
- two-piece panel construction
- lower-body wrap behavior
- socially charged use-memory
- restrained woven seriousness

Preserve these non-negotiable rules:

- the cloth must feel dark and structurally grounded
- stripes must feel woven and ordered, not decorative or printed
- two-piece construction must remain active in spirit
- the cloth must behave like a waist-wrap lower-body garment
- the image must retain social seriousness, not soft festive decoration
- the whole frame must belong to one Pawndum world

Translate the subject like this:

- **[MAIN FIGURE / MAIN FORM]** becomes a Pawndum-governed presence shaped by dark-wrap logic and panel discipline
- **[SECONDARY FIGURES / SECONDARY FORMS]** also obey the same stripe order, lower-body authority, and woven restraint
- **[OBJECTS / PROPS / SUPPORTS]** become forms whose divisions and contrast hierarchy inherit Pawndum structure
- **[ENVIRONMENT / BACKGROUND / SPATIAL DIVISIONS]** become a world organized by dark-ground order, woven restraint, and socially coded cloth intelligence

Keep:

- dark-cloth identity
- panel construction memory
- warp-stripe structure
- lower-body wrap logic
- social / ritual seriousness
- woven restraint

Avoid:

- generic Mizo stripe cloth
- decorative shawl softness
- print logic
- fashion styling
- festive multicolor mood
- a generic world around one styled garment

Image-to-Image

Convert this source image into the authentic source-faithful visual logic of **Pawndum from Mizoram**.

Preserve the source image's subject count, main action, pose relationships, and core readability, but rebuild the entire image through **Pawndum cloth law**: dark dominant woven body, bold red warp-stripe order, two-piece construction memory, lower-body wrap behavior, and socially charged woven seriousness. The result must not look like a normal image wrapped in traditional cloth. It must feel like the whole image has been reconstructed by a dark, structured, socially coded wrap-cloth system.

If the source contains figures, rebuild their silhouette, stance, and lower-body mass through Pawndum logic rather than generic realism. If the source contains props, surfaces, boundaries, or environment, translate them into the same structural world so that panel order, stripe restraint, dark-ground hierarchy, and body-wrap intelligence extend across the full frame.

Do not simply add a Pawndum garment to a realistic scene. Do not convert it into a black-red stripe design. Do not make it shawl-like. Do not let the garment alone carry the style while the rest of the world remains generic.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in a **creative 2D + 3D translation rooted in the source grammar of Pawndum from Mizoram**. This is not literal artisan simulation and not generic handcrafted textile styling. It must remain deeply rooted in Pawndum's actual source system: **dark-cloth identity, bold warp-stripe order, two-piece panel construction, lower-body wrap behavior, and socially coded use across Zawlbuk life, Khuallam, marriage, gift relation, and mourning**. Then translate that grammar into a richer hybrid visual world where 2D structural clarity and 3D dimensional presence coexist.

The image should feel as if Pawndum's inner law has expanded beyond cloth into a broader image-system. Let the **dark field** become full-frame hierarchy. Let the **stripe order** become structural rhythm. Let the **two-piece construction** become compositional relation. Let the **lower-body wrap logic** become a wider massing rule. Let the **social seriousness** become world-behavior. The result should still feel woven-first and source-rooted, but it can become more image-powerful, more spatially articulate, and more structurally expressive.

If figures appear, they must become forms shaped by compact lower-body wrap intelligence and stripe-governed visual order rather than generic anatomy-first realism. If objects and environment appear, they must also inherit the same dark-cloth grammar so the frame feels

generated from Pawndum rather than merely decorated with it. The image may become more dimensional and more expressive, but it must stay branch-pure.

Material behavior should preserve woven density, matte textile tactility, stripe integration, panel memory, and lower-body cloth gravity while allowing richer hybrid dimensionality. The world must still feel restrained, dark-grounded, and socially charged, not festive, ornamental, or fashion-forward.

Do not make this generic ethnic illustration, decorative handcrafted stripe art, fashion render, or a normal dimensional image with Pawndum cloth added afterward. Do not turn V2 into just “more textile texture.” Do not lose the panel relation. Do not let the environment stay generic.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** as a creative 2D + 3D translation rooted in the source grammar of **Pawndum from Mizoram**.

Treat the style as a **dark socially coded wrap-cloth system** and preserve these core rules:

- dark-ground identity remains primary
- warp-stripe order stays structural
- two-piece panel logic stays active
- lower-body wrap behavior remains essential
- social and ritual use-memory remains present
- the whole frame must feel generated from Pawndum

Translate the image like this:

- **[MAIN FIGURE / MAIN FORM]** becomes a hybrid 2D + 3D presence built from dark-wrap logic and stripe discipline
- **[SECONDARY FIGURES / FORMS]** also follow the same panel relation, cloth restraint, and lower-body authority
- **[OBJECTS / PROPS / DIVISIONS]** inherit dark-ground hierarchy and woven stripe-order intelligence
- **[ENVIRONMENT / BACKGROUND / SPATIAL ORDER]** becomes a richer visual world organized by dark-field dominance, structured striping, panel relation, and socially charged cloth behavior

Let these become richer:

- stripe-to-field hierarchy
- panel-to-panel relation
- wrap-to-body integration
- dark-cloth spatial order
- hybrid 2D + 3D image-space power

- whole-frame woven coherence

Keep unchanged:

- source-rooted Pawndum grammar
- dark-wrap identity
- two-piece construction memory
- lower-body cloth law
- social seriousness
- woven restraint

Avoid:

- decorative stripe illustration
- generic handcrafted ethnic art
- fashion styling
- print logic
- festive cloth mood
- generic dimensional world around one styled garment

Image-to-Image

Convert this source image into a creative 2D + 3D translation rooted in the source grammar of **Pawndum from Mizoram**.

Preserve the source image's subject count, action, pose relationships, and scene readability, but rebuild all visible elements through **Pawndum structural law**. The image must no longer behave like ordinary realism or generic illustration. Reconstruct it through dark woven authority, warp-stripe order, two-piece panel relation, lower-body wrap behavior, and socially coded cloth seriousness.

Let the scene become more hybrid and more image-rich than a strict source-faithful cloth study, but keep the style rooted in Pawndum's actual grammar. Figures must become more grounded, lower-body structured, and cloth-governed. Props and boundaries must inherit stripe hierarchy and panel logic. Environment and space must stop being generic and become organized by dark-wrap order and socially charged woven restraint.

Do not place Pawndum on top of a normal image. Do not make it decorative black-red stripe art. Do not turn it into soft ethnic fashion. Do not let the style survive only in costume while the rest of the frame remains unchanged.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a **full 3D realistic dimensional world where the entire Pawndum style system becomes believable reality**. “Realistic” here does not mean replacing the style with generic realism. It means believable volume, material behavior, gravity, spatial depth, and environmental completion while **Pawndum still controls the world**.

Build the image as if **Pawndum from Mizoram truly exists as world-law**. Translate its full grammar into reality: **dark-cloth identity, two-piece woven construction, bold warp-stripe hierarchy, lower-body wrap behavior, and socially charged use-memory**. Every major element must adapt to that system. Figures must feel shaped by lower-body wrap authority and dark-field restraint. Objects must feel panel-conscious and stripe-governed. Environmental divisions must feel controlled by dark-ground hierarchy, woven order, and social seriousness. The whole world must feel restrained, grounded, and sign-bearing rather than ornamental.

The realism must remain style-faithful. The cloth cannot become ordinary heritage costume. The stripe order cannot become decorative patterning. The two-piece construction cannot vanish into realism. The lower-body wrap logic cannot collapse into generic drape. The dark field cannot become one color among many. The social seriousness cannot turn into festive cultural fashion. The scene must feel as though Pawndum has become a believable world, not as though a realistic world has borrowed Pawndum.

Material behavior should preserve woven body, matte textile tactility, stripe integration, panel memory, grounded cloth fall, and lower-body mass. Composition should remain controlled by dark-ground dominance, stripe restraint, panel relation, and socially coded cloth order rather than casual scene-flow.

Do not make this generic realism with Mizo clothing, festival scene realism, decorative black-red world-building, fashion-photography realism, or a normal environment with Pawndum cloth attached. Do not let realism become the main driver. Do not let one important element remain generic. Official Mizoram sources position Pawndum as a traditional black cloth made from two loom widths with bold blue-black and red warp stripes, used in lower-body wrapping and across dance, marriage, and mourning contexts.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** as a full 3D realistic dimensional world where the entire **Pawndum from Mizoram** style system becomes believable reality.

Treat the style as a **dark woven social-wrap world system** and preserve these non-negotiable rules:

- dark-cloth identity still drives the frame
- two-piece construction memory remains active
- warp-stripe order remains structural
- lower-body wrap logic remains essential
- social / ritual use-memory still matters
- realism remains subordinate to Pawndum structure
- the whole frame must belong to one Pawndum world

Translate the world like this:

- **[MAIN FIGURE / MAIN FORM]** becomes a believable volumetric form governed by dark-wrap logic and lower-body cloth authority
- **[SECONDARY FIGURES / FORMS]** become branch-consistent dimensional presences under the same stripe-and-panel law
- **[OBJECTS / PROPS / THRESHOLDS / DIVISIONS]** become structurally bounded forms shaped by dark-ground hierarchy and woven stripe order
- **[ENVIRONMENT / BACKGROUND / WORLD STRUCTURE]** becomes a full spatial system organized by restraint, panel relation, lower-body cloth intelligence, and socially charged woven seriousness

Increase:

- believable volume
- material-light interaction
- woven mass and gravity
- figure-ground separation
- environmental completion
- whole-frame world coherence

Do not lose:

- dark-wrap identity
- two-piece construction memory
- stripe structure
- lower-body wrap behavior
- social seriousness
- whole-frame rebuild rule

Avoid:

- generic realism with traditional costume
- decorative stripe world-building
- festive ethnic fashion realism
- soft drape behavior
- ordinary environment plus Pawndum cloth
- any important element remaining in another visual language

Image-to-Image

Convert this source image into a full 3D realistic dimensional world where the entire **Pawndum from Mizoram** style system becomes believable reality.

Preserve the source image's subject count, major action, pose logic, and core readability, but rebuild the whole frame through **Pawndum world-law**. Replace ordinary realism or ordinary stylization with dark woven authority, warp-stripe order, two-piece construction memory, lower-body wrap behavior, and socially coded cloth seriousness.

If the source contains figures, they must become believable volumetric presences shaped by lower-body wrap structure and dark-field restraint rather than generic costume realism. If the source contains props, architecture, boundaries, or environment, they must also be reconstructed through the same woven panel intelligence so the whole world feels built from Pawndum. The realism must remain subordinate to the style, not the other way around.

Do not simply add a Pawndum garment to a realistic scene. Do not turn the cloth into decorative stripe detail. Do not erase the two-piece structure into realism. Do not make the drape casual or shawl-like. Do not build a generic environment around a styled textile. The final image must feel like Pawndum itself became believable reality.
