

Sawantwadi Ganjifa - Maharashtra

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic visual grammar of the traditional Sawantwadi Ganjifa card tradition from Maharashtra. Do not treat this as generic folk painting, generic miniature painting, generic mythological illustration, tarot art, or normal playing-card design. Build the entire image as if it comes from a hand-painted circular card deck-world where compact icon clarity, circular containment, border-ring authority, rank readability, and deck-family logic control every decision.

The image must feel born from a traditional painted card system:

- circular card-face pressure shapes the composition from the inside
- figures are compact, typological, rank-bearing, and immediately readable
- the world is symbolic and shallow, not naturalistic and scenic
- the border is structural, not trim
- gold accents strengthen hierarchy, not glitter
- color supports role, category, and card identity
- the image must feel like one face within a larger mythological or royal deck

Translate the full world through this style, not just the surface:

- shape must become compact, enclosed, emblematic, and card-face readable
- form must become icon-based rather than realism-based
- space must become symbolic, contained, shallow, and medallion-like
- light must become clarifying and declarative, not atmospheric
- shadow must stay restrained and supportive, not cinematic
- value must remain clean, separated, and small-scale legible
- volume must stay compressed and iconic, not full naturalistic anatomy
- movement must become held, poised, and identity-bearing
- environment must become tokenized, courtly, mythic, or symbolic in the same card logic
- props, animals, architecture, trees, clouds, ground, throne forms, celestial forms, and ornaments must all belong to the same Ganjifa world

Material behavior should remember the painted card-object tradition:

layered handmade support, luminous painted front, darker back-memory, gold-highlighted borders and ornaments, finished varnished object presence. But do not let material become the whole style. The deeper engine is deck-born image logic.

Avoid:

generic round painting, generic miniature medallion, poster art inside a circle, realistic faces, cinematic world-light, deep perspective scenes, generic fantasy court scenes, heavy realism with folk costume, metallic overload, decorative border with generic interior, material-only conversion.

The final result must feel like a true Sawantwadi Ganjifa card-world: hand-painted, circular-pressure-driven, compact, symbolic, deck-aware, mythic or royal in type, and fully translated in shape, form, space, light, hierarchy, and environment.

Reusable Variable Template

Create [SUBJECT / SCENE] using the full visual grammar of the traditional Sawantwadi Ganjifa card tradition from Maharashtra.

Core style system to preserve:

- circular card-face containment as the main compositional force
- compact type-bearing figure construction
- deck-born role/theme clarity
- symbolic shallow space instead of open realism
- structural border-ring authority
- gold-highlighted hierarchy in ornaments and edges
- controlled color for category and readability
- whole-world translation into one painted card logic

Translate the scene like this:

- [MAIN FIGURE] becomes a compact emblematic card-face icon, not a realistic character
- [SECONDARY FIGURES] become rank-clear supporting card-world presences
- [PROPS / ANIMALS / OBJECTS] become symbolic, set-readable forms
- [ARCHITECTURE / LANDSCAPE / SKY / GROUND] become simplified mythic or courtly support-zones in the same compact grammar
- [MOVEMENT / ACTION] becomes poised, held, and identity-bearing instead of cinematic realism
- [LIGHT / SHADOW] becomes clarifying, restrained, and hierarchy-supporting
- [SPACE] becomes contained and shallow, not perspective-heavy

Keep:

compact shape language, icon clarity, circular pressure, border control, deck-family feel, gold as hierarchy support, symbolic environmental shorthand.

Avoid:

generic folk illustration, generic round medallion painting, tarot look, material-only swap, realistic anatomy, scenic realism, over-rendered depth, border-only stylization, poster composition cropped into a circle.

The final result must feel as if the entire world was invented by Sawantwadi Ganjifa logic.

Image-to-Image

Convert this source image into an authentic Sawantwadi Ganjifa visual world from Maharashtra.

Preserve the source image's subject count, main action, major relationships, and readability, but rebuild the entire image through traditional Ganjifa card-face logic. Do not simply apply round framing, folk colors, gold accents, or varnished texture. Reconstruct the whole world so that shape, form, space, light, shadow, value, volume, environment, and hierarchy all obey compact deck-born image logic.

The transformed image must become:

- circular-pressure-driven in composition
- compact and emblematic in figure design
- symbolic and shallow in space
- restrained and clarifying in light
- border-structured in containment
- mythic/royal and rank-readable in type
- unified as one card-world rather than a generic scene

Translate all visible elements:

figures, faces, costumes, props, animals, thrones, trees, architecture, clouds, celestial signs, terrain, ornament, and border systems must all become part of the same Sawantwadi Ganjifa world.

Keep gold and finish as supporting cues, but do not let texture become the main transformation. The real task is to rebuild the image-making logic itself so the final result feels like one authentic hand-painted card face from a larger Sawantwadi Ganjifa deck.

V2 — Artisan Translation

Universal Hard Prompt

Create a creative 2D + 3D visual world rooted in the traditional Sawantwadi Ganjifa card grammar of Maharashtra. This must not become generic fantasy illustration, generic stylized folk art, or decorative mythological card design. It should feel like the native Ganjifa system has expanded into a richer image-world while staying fully controlled by deck-born logic.

Keep the deep structure unchanged:

- circular containment remains the hidden organizing force
- figures remain typological, compact, and rank-clear
- composition remains card-face disciplined
- space remains symbolic-first, not naturalistic
- borders remain structural
- gold remains hierarchy-supporting
- color remains category-readable

- set identity remains stronger than stand-alone scene freedom

Now let the world become richer:

- hybrid flatness and depth can coexist
- figures can gain more compressed icon-volume
- environments can become more articulated, but still tokenized and emblematic
- props, animals, architecture, sky forms, and ground can extend the deck-world more strongly
- symbolic motion can become slightly more dynamic, but must remain held and readable
- light can articulate form more clearly, but must not become cinematic realism
- depth can increase, but the image must still feel born from a painted card system

Translate everything, not just the material:

shape, form, shadow, light, space, value, dimension, environment, movement, and hierarchy must all be rebuilt through Sawantwadi Ganjifa logic.

Avoid:

generic stylized fantasy, modern card-art graphics, free miniature scene painting, round frame decoration, texture-only transformation, deep perspective realism, cinematic mood takeover, metallic excess, generic collectible-card aesthetics.

The final result must feel like Sawantwadi Ganjifa evolving into a richer stylized world without losing deck identity, compactness, symbolic space, or card-face authority.

Reusable Variable Template

Create [SUBJECT / SCENE] as a creative 2D + 3D translation rooted in the traditional Sawantwadi Ganjifa visual grammar of Maharashtra.

Preserve these style-core rules:

- circular card-face logic remains primary
- compact emblematic figure construction remains intact
- symbolic shallow-space logic remains stronger than realism
- border-ring containment still organizes the frame
- rank/theme readability remains visible
- gold and color support hierarchy rather than decoration
- the entire world stays within one deck-born system

Translate the scene like this:

- [MAIN FIGURE] becomes a stylized card-world icon with compressed volume and strong role clarity
- [SECONDARY FIGURES] remain compact, distinct, and set-readable
- [OBJECTS / PROPS / ANIMALS] become emblematic supporting forms
- [ENVIRONMENT] becomes a richer but still symbolic and contained Ganjifa world
- [LIGHT / SHADOW] becomes more articulated but still graphic and controlled

- [SPACE / DEPTH] becomes slightly richer but must remain shallow and organized by card logic
- [MOVEMENT] becomes expressive only within held iconic readability

Keep:

deck-family identity, compact icon logic, symbolic environment shorthand, border authority, controlled dimensionality.

Avoid:

free fantasy illustration, generic 2D decorative folk art, realism with gold trim, material-only conversion, scenic perspective, collectible-card modernism.

The final result must feel like the world has been rebuilt by Sawantwadi Ganjifa, not merely styled with it.

Image-to-Image

Convert this source image into a creative 2D + 3D Sawantwadi Ganjifa world from Maharashtra.

Preserve the source image's subject count, main action, relationships, and readability, but rebuild the image through a richer expansion of Ganjifa logic. Do not stop at circular framing, gold accents, painted texture, or costume change. Transform the entire world so that shape, form, space, light, shadow, volume, environment, motion restraint, and hierarchy all behave like an expanded Ganjifa card universe.

The converted image must become:

- compact and deck-aware in figure logic
- circular-pressure-driven in composition
- symbolic and contained in space
- richer in stylized depth without becoming realistic
- fully unified in environment and object design
- border-structured and rank-readable in visual emphasis

Everything visible must belong to one system:

figures, animals, props, architecture, throne forms, celestial elements, trees, clouds, and terrain must all feel generated from the same Sawantwadi Ganjifa logic.

Avoid generic fantasy stylization, modern game-card design, or folk surface decoration on a normal scene. The final result must feel like Sawantwadi Ganjifa has expanded into a living stylized world.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a believable full 3D dimensional world generated from the traditional Sawantwadi Ganjifa card grammar of Maharashtra. This must not become ordinary realism with card ornament added later. It must feel like the entire world has become real while still obeying the deep laws of Ganjifa: compact typological figures, circular-pressure composition, symbolic hierarchy, border authority, controlled gold emphasis, and deck-family identity.

Translate the full style into dimensional reality:

- shape must remain compact, emblematic, and card-born
- form must remain type-clear and rank-bearing rather than fully naturalistic
- space must remain symbolic and contained even when volumetric
- light must clarify hierarchy rather than create cinematic atmosphere
- shadow must support form without taking over the image
- value must remain readable and category-strong
- volume must remain compressed and iconic, not ordinary anatomy
- movement must remain poised and held, not natural-action realism
- environment must become a believable but still emblematic Ganjifa world
- props, animals, architecture, terrain, sky forms, and symbols must all belong to the same reality-system

Keep the memory of the card-object world:

border-ring logic, gold-highlighted hierarchy, hand-painted ancestry, set-born image identity, and compact face readability must all survive inside the dimensional world.

The realism must be controlled realism:

believable material presence, believable spatial depth, believable object weight, believable light interaction — but never generic realism. The world should feel as if a painted Ganjifa deck became physically inhabitable.

Avoid:

normal mythological realism, cinematic fantasy courts, realistic portrait faces, generic environmental perspective, decorative gold overlays, texture-only card surface translation, modern card-game aesthetics, poster realism inside circular motifs.

The final result must feel like Sawantwadi Ganjifa logic itself became dimensional reality.

Reusable Variable Template

Create [SUBJECT / SCENE] as a full 3D realistic dimensional world generated from the traditional Sawantwadi Ganjifa visual system of Maharashtra.

Style system that must remain unchanged:

- deck-born image logic

- compact type-bearing figures
- circular containment pressure in composition
- symbolic space even within dimensionality
- border-ring authority
- gold as hierarchy support
- role/theme readability
- full-world consistency under one Ganjifa grammar

Translate the scene like this:

- [MAIN FIGURE] becomes a dimensional but still card-born typological presence
- [SECONDARY FIGURES] remain compact, rank-clear, and emblematic
- [PROPS / OBJECTS / ANIMALS] become believable but still symbolic Ganjifa-world forms
- [ARCHITECTURE / ENVIRONMENT / SKY / GROUND] become a dimensional world generated by Ganjifa containment and hierarchy
- [LIGHT / SHADOW] becomes more real but remains controlled and clarifying
- [SPACE / DEPTH] becomes believable without turning into generic scenic realism
- [MOVEMENT / PHYSICS] becomes convincing but still held and icon-readable

Increase:

material conviction, spatial depth, object presence, dimensional coherence, environmental completion.

Do not lose:

compact icon logic, deck-family identity, symbolic containment, border authority, hierarchy-first readability.

Avoid:

generic realism, realistic portrait psychology, cinematic fantasy mood, decorative card references on normal environments, texture swap without world rebuild.

The final result must feel like a real Sawantwadi Ganjifa world.

Image-to-Image

Convert this source image into a full 3D realistic Sawantwadi Ganjifa world from Maharashtra.

Preserve the source image's subject count, core action, key relationships, and readability, but rebuild the image so that the entire world becomes real under Ganjifa law. Do not merely apply card texture, gold border, or folk-paint surface treatment. Reconstruct shape, form, space, light, value, shadow, environment, dimensionality, and physics so that everything feels card-born even in realism.

The transformed image must become:

- compact and typological in figures

- symbolic and contained in spatial organization
- border-aware and hierarchy-driven in composition
- believable in object presence and material depth
- unified across figure, prop, animal, architecture, ground, sky, and ornament
- clearly part of a larger deck-family world

Keep realism under strict control. The result must not become a generic mythological or royal fantasy scene. It must feel as if the traditional Sawantwadi Ganjifa card world has become physically real while retaining its identity, containment, and rank clarity.
