

Shaphee Lanphee - Manipur

V1 — Authentic Style

Universal Hard Prompt

Create an image in the native visual logic of **traditional Shaphee Lanphee from Manipur**, treated not as ordinary textile styling but as a **ceremonial honour-cloth world**. Build the whole image as if it was generated by a prestige-bearing cloth system built from a **black woven ceremonial field, red border authority**, and a fixed world of **highly stylized hand-embroidered symbolic motifs** such as horse, elephant, fish, peacock, buffalo horn, spear, sun, moon, star, and ceremonial seat. The image must read first as a **Shaphee Lanphee-born symbolic field**, not as generic Manipuri embroidery, not as fashion textile design, not as black fabric with ethnic motifs, and not as realism decorated with ceremonial symbols. The GI record and public summaries describe Shaphee Lanphee exactly through this black-ground, red-border, hand-needle-worked symbolic system and its role as a cloth of honour.

Use real field logic. The black ground must behave as a **prestige-bearing visual authority**, not just a color choice. Use real border logic. The red border must behave as **containment, framing, and ceremonial edge control**, not as trim. Use real motif logic. All symbolic forms must remain **compressed, emblematic, heraldic, and stylized**, never naturalistic or illustrative. Use real construction memory. The world must remember that this style comes from **woven ground plus hand needle articulation**, not from print or machine embroidery.

Rebuild the full image through this grammar:

figures must become emblematic ceremonial presences rather than ordinary realistic humans,
animals must become stylized symbolic carriers rather than natural creatures,
objects must become rank-bearing sign-forms rather than descriptive props,
architecture and environment must become controlled ceremonial field-space rather than observational realism,
ground, sky, vegetation, distance layers, and spatial divisions must all feel generated by **field authority, border-like containment, symbolic placement, and prestige stillness**.

The whole frame must feel composed, ranked, and ceremonially held. The style must control **shape, line, form, contrast, spacing, symbolic hierarchy, and environment order** from the smallest detail to the largest spatial structure.

Do not make this a decorative shawl design.

Do not make it a luxurious ethnic black textile.

Do not make motifs naturalistic.

Do not make the environment realistic while the cloth alone carries the style.

Do not use generic embroidery beauty or fashion-editorial mood.

The final result must feel like **Shaphee Lanphee itself invented the world**.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** in the native visual logic of **traditional Shaphee Lanphee from Manipur**, treated as a **ceremonial honour-cloth system**, not as textile decoration.

Treat the style as:

a black prestige-field world,
a red-bordered ceremonial containment system,
a stylized emblem-language built from compressed symbolic forms,
and a woven-ground plus hand-needle articulation system where honour, rank, and symbolic order are more important than realism.

Core style system to preserve:

- black ceremonial field authority
- red border containment and edge discipline
- stylized symbolic motif logic
- woven base plus hand-needle completion memory
- court-honour dignity and prestige stillness
- emblematic compression instead of naturalistic description
- whole-frame consistency so every visible element belongs to the same symbolic field-world

Translate the image like this:

- **[MAIN FIGURE]** becomes a ranked ceremonial presence shaped by emblematic stillness, symbolic compression, and prestige-bearing field logic
- **[SECONDARY FIGURES]** also obey the same heraldic and sign-based world logic rather than casual realism
- **[ANIMALS / OBJECTS / PROPS]** become compressed symbolic carriers rather than descriptive natural forms
- **[ARCHITECTURE / LANDSCAPE / GROUND / SKY / VEGETATION]** become a Shaphee Lanphee-generated ceremonial environment organized through field authority, red-edge containment logic, symbolic spacing, and ordered contrast

Shape logic:

keep forms compressed, formalized, sign-bearing, and contrast-clear rather than descriptive or naturalistic

Line logic:

keep edges deliberate, disciplined, needle-aware, and emblem-supporting rather than sketchy or painterly

Color logic:

keep black-field dominance and red border authority as the main structural color forces, with all other color use subordinated to ceremonial hierarchy

Space logic:

keep the image organized as a prestige-field world with ranked placement, symbolic spacing, and controlled order rather than realism-first observational space

Keep:

- emblem-world logic
- prestige stillness
- symbolic compression
- black/red authority structure
- woven-plus-needle dual memory
- whole-frame ceremonial ownership

Avoid:

- decorative textile styling
- black luxury fabric mood
- generic folk embroidery
- naturalistic animals or figures
- realism with symbolic motifs pasted later
- one Shaphee-coded cloth inside a generic world

Image-to-Image

Convert this source image into the native visual world of **traditional Shaphee Lanphee from Manipur**.

Preserve the source image's main subject count, core action, major spatial readability, and relational hierarchy, but rebuild the entire image through **Shaphee Lanphee ceremonial field grammar**. Replace ordinary scene logic with a **black prestige-field world, red containment structure, stylized symbolic sign logic, and woven-ground plus hand-needle articulation memory**. Replace descriptive figures with **emblematic ceremonial presences**. Replace ordinary animals and objects with **compressed symbolic carriers**. Replace naturalistic environment with a **ranked, still, prestige-bearing field-space**.

If the source image contains clothing, figures, props, landscape, or architecture, all of them must be reconstructed through the same honour-cloth intelligence. The result must not feel like a normal scene wearing Shaphee Lanphee. It must feel like a **Shaphee Lanphee world that absorbed the source scene into itself**.

Do not simply add motifs onto black fabric.
Do not simply add a red border to the frame.
Do not keep the original realism underneath.
Do not naturalize the symbolic motifs.
Do not let any major element remain outside the Shaphee Lanphee system.

V2 — Artisan Translation

Universal Hard Prompt

Create a **dimensional handcrafted image-world** rooted in the authentic visual logic of **traditional Shaphee Lanphee from Manipur**. This version must remain source-faithful in structure, but it may expand beyond strict textile-object reading into a broader world built from **black-field authority, red edge control, emblematic symbolic forms, ceremonial spacing, and prestige-bearing stillness**. The world must still read as if it was generated by a **royal honour-cloth system**, not by realism with decorative references.

Keep the source grammar active:

- the black ground must still dominate as a field of authority,
- the red border must still act as containment and structural edge control,
- the motif system must still remain compressed, stylized, and emblematic,
- the world must still remember woven base plus hand-needle articulation,
- and the full image must still feel ceremonially ranked rather than casually observed.

Now translate that grammar into a richer dimensional image-world. Let forms gain volume, but only as **symbolic forms becoming spatial**, not as realism taking over. Let figures gain presence, but only as **court-sign presences**, not as ordinary acted humans. Let animals, props, and environment gain fuller dimensional staging, but keep them governed by **field authority, contrast hierarchy, and emblematic order**. Let environment become larger, but do not let it become generic landscape or generic interior realism. The world should feel like an **expanded ceremonial emblem-universe**.

Use dimensional depth to strengthen:

- symbolic hierarchy,
- ranked placement,
- prestige stillness,
- figure-to-environment relation,
- and field-to-edge containment.

Do not make this a generic “royal ethnic” scene.
Do not make it a decorative artisan textile fantasy.
Do not let dimensionality erase symbolic compression.

Do not let the environment become ordinary while only costume stays stylized.
Do not treat Shaphee Lanphee as material only; treat it as a **world-order system**.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** as an **authentic dimensional translation** rooted in **traditional Shaphee Lanphee from Manipur**.

Treat the style as:

a ceremonial black-field world,
a red-edged prestige containment system,
a symbolic emblem-language,
and a woven-plus-needle honour-cloth grammar that can expand into dimensional image-space without losing ceremonial order.

Preserve these style-core rules:

- black prestige-field authority remains primary
- red border logic remains structural
- symbolic motifs remain compressed and stylized
- woven-ground plus needle-work memory remains active
- ceremonial dignity and rank-bearing stillness remain dominant
- whole-frame ownership remains intact so all visible elements belong to one Shaphee world

Translate the image like this:

- **[MAIN FIGURE]** becomes a dimensional ceremonial presence shaped by emblem-field logic rather than realism-first anatomy
- **[SECONDARY FIGURES]** become supporting ranked presences inside the same symbolic order
- **[ANIMALS / OBJECTS / PROPS]** become dimensional sign-forms rather than descriptive things
- **[ENVIRONMENT / LANDSCAPE / ARCHITECTURE]** becomes a broader but still Shaphee-governed prestige field organized by containment, symbolic spacing, black/red hierarchy, and ceremonial order

Let these become richer:

- dimensional emblem-presence
- spatial layering
- figure-environment relation
- field-to-edge hierarchy
- full-scene symbolic integration

Keep unchanged:

- honour-cloth authority
- symbolic compression
- ceremonial stillness
- black/red structural discipline
- woven-plus-needle memory
- whole-frame style control

Avoid:

- realism-first staging
- generic royal fantasy
- textile-fashion styling
- embroidery as surface beauty only
- naturalistic animals or props
- generic environment with Shaphee-coded wardrobe

Image-to-Image

Convert this source image into an **authentic dimensional Shaphee Lanphee translation** from Manipur.

Preserve the source image's main subject count, primary action, scene readability, and major relational staging, but reconstruct the full image through **Shaphee Lanphee ceremonial world-logic**. Turn the scene into a dimensional honour-field built from **black-ground authority, red edge containment, emblematic symbolic form, compressed sign logic, and prestige-bearing compositional order**. Let figures, objects, animals, and environment all become dimensional, but keep their dimensionality governed by **symbolic rank and field logic**, not ordinary realism.

If the source image contains realistic people, do not simply dress them in Shaphee Lanphee. Rebuild their presence through **symbolic ceremonial compression**. If the source image contains natural environment, do not paste motifs onto it. Reorganize the whole environment so it feels generated by a **prestige emblem-system** rather than by observation.

Do not convert only fabric.

Do not keep realism underneath.

Do not turn symbols into decorative accents.

Do not lose black-field authority and red-edge structure.

Do not allow the dimensional world to escape the Shaphee Lanphee grammar.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a **premium, fully orchestrated, depth-rich cinematic image-world** generated from the authentic visual grammar of **traditional Shaphee Lanphee from Manipur**. The image must feel highly finished, highly readable, compositionally strong, and visually complete, but it must still remain fully controlled by **black-field prestige authority, red border containment logic, symbolic motif compression, ceremonial rank order, and woven-plus-needle honour-cloth intelligence**. This is not a realistic scene with Shaphee references. This is a premium final-image world that still feels as if **Shaphee Lanphee itself generated everything**.

Use premium orchestration without losing source truth:

- strong focal hierarchy,
- controlled figure-ground separation,
- clear symbolic center of gravity,
- disciplined contrast structure,
- highly intentional spacing,
- environment designed as ceremonial field-space,
- objects and animals translated into prestige-bearing symbolic forms,
- and human presence rebuilt as emblematic, ranked, sign-like character presence rather than realism-first acting.

Let the image become richer in:

- composition control,
- depth staging,
- surface articulation,
- environment completion,
- and dramatic clarity — but only through the style's own grammar.

Every part of the frame must remain under Shaphee Lanphee control:

faces, bodies, garments, animals, objects, architecture, terrain, vegetation, sky, depth layers, and atmosphere. The environment must not behave like normal cinema space. It must behave like **ceremonial field-space expanded into premium cinematic image form**.

Do not turn this into luxury ethnic fantasy.

Do not turn it into costume-led realism.

Do not let “premium” become glossy or generic.

Do not allow symbolism to weaken as scene richness increases.

Do not let one single visual zone drift into another language. The final image must feel like a **prestige emblem-cloth world raised to a premium cinematic image-state**.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** as a **premium orchestrated cinematic translation** generated from the authentic grammar of **traditional Shaphee Lanphee from Manipur**.

Treat the style as:

a ceremonial honour-field system,
a black-ground prestige world,
a red-edged containment structure,
a compressed symbolic emblem-language,
and a woven-plus-needle style intelligence translated into a premium full-frame final image.

Style system that must remain unchanged:

- black prestige-field authority
- red structural edge containment
- stylized symbolic motif logic
- ceremonial stillness and rank order
- woven-ground plus hand-needle completion memory
- full-frame ownership by one Shaphee Lanphee world

Translate the image like this:

- **[MAIN FIGURE]** becomes a premium, highly readable ceremonial presence shaped by symbolic hierarchy and prestige-bearing stillness
- **[SECONDARY FIGURES]** become supporting ranked presences inside the same emblem-world
- **[ANIMALS / PROPS / OBJECTS]** become highly controlled symbolic carriers rather than descriptive realism
- **[ENVIRONMENT / LANDSCAPE / ARCHITECTURE / ATMOSPHERE]** becomes a complete cinematic field-space still governed by black/red authority, emblem compression, ceremonial composition, and Shaphee Lanphee world-order

Increase:

- focal hierarchy
- composition control
- depth staging
- figure-ground separation
- full-frame completion
- premium finish under style control

Do not lose:

- symbolic compression
- prestige stillness
- ceremonial order
- black/red field structure
- woven-plus-needle dual memory
- whole-frame style integrity

Avoid:

- luxury ethnic décor
- generic royal fantasy
- realism-led cinematic space
- textile style limited to costume only
- decorative embroidery beauty replacing style-core
- any non-Shaphee visual logic entering the frame

Image-to-Image

Convert this source image into a **premium cinematic Shaphee Lanphee world** from Manipur.

Preserve the source image's main subject count, core action, dominant staging relationships, and narrative readability, but rebuild the full frame through **Shaphee Lanphee ceremonial emblem-logic**. Turn the image into a highly orchestrated prestige-field world built from **black authority, red containment, stylized symbolic sign-forms, ceremonial stillness, and compressed rank-bearing visual order**. Expand the scene into a premium finished image, but keep every visible element under the same style control.

Translate all visible image components:

human presence becomes ceremonial and sign-bearing,
animals become stylized carriers of symbolic force,
objects become emblematic rather than descriptive,
architecture and terrain become prestige field-structures,
environment and depth layers become ceremonially ordered rather than observationally real.

Do not merely upscale the cloth logic.

Do not merely costume-swap the source.

Do not let realism survive underneath.

Do not turn premium finish into generic gloss or spectacle.

Do not allow any important element to remain outside the Shaphee Lanphee world.
