

Sheer,Poised Field - manipur

V1 — Authentic Style

Universal Hard Prompt

Create an image built from the native visual logic of a **Manipuri sheer upper-wrap cloth world**, where the governing force is **soft field presence, semi-transparent poise, gentle drape, restrained spacing, social composure, and light cloth-borne dignity**. Do not treat this as generic translucent fabric, bridal veil styling, luxury scarf design, or fashion softness. Build the entire image as if it comes from a cloth system that organizes reality through **lightness, filtered presence, softened boundaries, quiet tonal control, and poised social order**.

Use a visual system where figures are shaped by a soft, breathable, semi-transparent cloth intelligence rather than realism-first anatomy. Faces must feel softened by field-poise rather than sharply individualized. Bodies must feel composed, held, and dignified rather than dramatic or aggressive. Objects, props, trees, leaves, ground, architecture, and distance layers must all inherit the same softened field logic: quiet edges, restrained contrast, gentle spacing, filtered depth, and calm cloth-aware atmosphere. The image must feel like a **poised textile-field world** generated the full scene.

No bridal-fashion veil mood, no editorial fabric glamour, no generic soft-focus beauty styling, no realism-first environment with one translucent garment added later, no decorative textile-only translation.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** using the native visual logic of a **Manipuri sheer upper-wrap field system**.

Core style system to preserve:

- soft poised field presence
- semi-transparent or veil-like cloth intelligence
- restrained spacing and quiet social composure
- gentle edge behavior
- filtered depth and softened transitions
- cloth-aware figure design
- whole-frame consistency so every visible element belongs to one sheer-field world

Translate the scene like this:

- **[MAIN FIGURE]** becomes a poised cloth-aware presence shaped by softness, restraint, and filtered field logic
- **[SECONDARY FIGURES]** also obey the same gentle social composure
- **[OBJECTS / PROPS]** become softened, light, field-aware forms
- **[TREES / GROUND / ARCHITECTURE / ENVIRONMENT]** become quiet, breathable, softly layered elements organized by sheer cloth-space intelligence
- **[ATMOSPHERE / DEPTH]** becomes filtered, delicate, and restraint-led rather than dramatic

Keep:

- softness with structure
- semi-transparent poise
- upper-wrap dignity
- quiet field control
- whole-frame softness logic

Avoid:

- bridal styling
- fashion-editorial translucency
- decorative scarf mood
- realism with one delicate cloth overlay
- sharp hard-edged generic environment

Image-to-Image

Convert this source image into a **native Manipuri sheer-field world** built from soft upper-wrap cloth logic.

Preserve the source image's subject count, basic action, pose relationships, and scene readability, but rebuild the entire image through **semi-transparent poised field intelligence**. Replace realism-first forms with softened, cloth-aware presences. Replace hard edges with gentle filtered boundaries. Replace normal atmosphere with breathable layered softness. Replace ordinary environment with a world shaped by quiet drape logic, social composure, restrained spacing, and light cloth-borne depth.

Do not only put a delicate translucent wrap on the figure. Do not keep realistic faces, realistic bodies, realistic trees, realistic ground, and realistic air underneath. Rebuild the whole frame so it feels born from a soft poised field system, not decorated by one.

V2 — Artisan Translation

Universal Hard Prompt

Create a dimensional image-world rooted in the authentic logic of a **Manipuri sheer upper-wrap field system**, where softness, filtered presence, and social poise remain primary, but the image gains richer spatial layering and fuller handcrafted dimensionality. This must not become generic realism, dreamy fashion atmosphere, or luxury translucency. It must still feel like **cloth-space intelligence** is generating the whole world.

Keep the branch source-rooted: the field must remain light, soft, breathable, and gently filtering. Figures must remain poised, not dramatic. Faces must remain socially composed, not psychologically realism-first. Space must expand through gentle layered cloth-logic, not cinematic spectacle. Trees, architecture, props, and terrain must all inherit the same softened structural behavior: calm edges, filtered separation, airy depth, and dignified restraint. Let the world become richer and more dimensional, but keep it **sheer-field first**.

No bridal fantasy, no dreamy editorial softness, no cinematic haze replacing cloth logic, no realism-first environment with translucent costume styling.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** as an authentic dimensional translation rooted in a **Manipuri sheer upper-wrap field system**.

Preserve these style-core rules:

- soft field presence remains primary
- semi-transparent intelligence remains active
- restraint remains stronger than ornament
- figures remain poised and cloth-aware
- environment remains filtered and quiet
- whole-frame branch purity remains intact

Translate the image like this:

- **[MAIN FIGURE]** becomes a dimensional but still softened cloth-shaped presence
- **[SECONDARY FIGURES]** become supporting poised forms inside the same gentle field logic
- **[OBJECTS / PROPS]** become quiet, lightly articulated cloth-aware forms
- **[ENVIRONMENT]** becomes a broader but still filtered and breathable world shaped by soft field transitions and calm spatial layering
- **[ATMOSPHERE]** becomes gentle and structured, not dreamy or decorative

Let these become richer:

- spatial layering
- field depth
- figure-environment relation
- cloth-borne atmosphere
- full-scene softness control

Keep unchanged:

- poise
- restraint
- filtered presence
- social composure
- whole-frame softness logic

Avoid:

- bridal luxury
- fashion softness
- vague dreamy realism
- cloth only on costume
- generic world under a delicate overlay

Image-to-Image

Convert this source image into an authentic dimensional **Manipuri sheer-field translation**.

Preserve the source image's subject count, action, and readable staging, but reconstruct all visible elements through a **soft filtered cloth-space logic**. Figures must become poised presences. Space must become breathable and layered. Edges must become gentle and restraint-led. Trees, props, architecture, and atmospheric depth must all belong to the same softened field system. The image may become richer and more dimensional, but it must still feel built by sheer cloth intelligence rather than by realism with styling.

Do not only make the garment translucent. Do not keep the environment generic. Do not replace field logic with cinematic haze. Rebuild the whole image as if a soft poised upper-wrap world generated it.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a premium, fully orchestrated, depth-rich image-world generated from the authentic grammar of a **Manipuri sheer upper-wrap field system**. The result must feel highly finished, highly readable, and spatially complete, but still fully governed by **soft poised field presence, semi-transparent cloth intelligence, restraint, gentle composure, and filtered atmosphere**. Premium here must not become glamour, luxury, or bridal beauty. It must remain cloth-born, socially poised, and whole-frame consistent.

Use strong focal hierarchy, elegant figure-ground separation, controlled layered depth, and complete environment orchestration, but keep every visual zone under the same sheer-field logic. Faces must remain composed and softened. Bodies must remain cloth-aware. Trees, props, architecture, horizon, sky, and atmosphere must all feel shaped by filtered softness and calm edge behavior. The world must feel like a **premium final image built by a poised textile-space system**, not a cinematic realism scene with delicate garments.

No editorial luxury fabric mood, no bridal image language, no glamour translucency, no generic cinematic softness, no costume-only translation.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** as a premium orchestrated cinematic translation of a **Manipuri sheer upper-wrap field system**.

Style system that must remain unchanged:

- soft poised field authority
- semi-transparent or filtered presence
- social composure and restraint
- cloth-aware body logic
- softened edge behavior
- quiet layered atmosphere
- whole-frame branch ownership

Translate the scene like this:

- **[MAIN FIGURE]** becomes a premium, highly readable, poised cloth-shaped presence
- **[SECONDARY FIGURES]** become supporting calm forms inside the same softened system
- **[OBJECTS / PROPS]** become refined, field-aware elements
- **[ENVIRONMENT / LANDSCAPE / ARCHITECTURE / SKY]** becomes a complete but still filtered and restraint-led world
- **[DEPTH / ATMOSPHERE]** becomes layered, elegant, and soft without turning dreamy or decorative

Increase:

- focal hierarchy
- full-frame cohesion
- figure-ground separation
- refined layered depth
- premium finish under branch control

Do not lose:

- poise
- restraint
- gentle field authority
- cloth-space logic
- whole-frame softness

Avoid:

- bridal glamour
- luxury editorial softness
- generic realism with translucent costume
- vague haze
- any hard-edged generic zone

Image-to-Image

Convert this source image into a premium cinematic **Manipuri sheer-field world**.

Preserve the source image's main action, staging, and subject relationships, but rebuild the entire frame through **soft poised cloth-space intelligence**. Turn figures into calm, cloth-aware presences. Turn environment into filtered, layered, restraint-led field space. Turn props, animals, trees, ground, and atmosphere into elements controlled by the same gentle softened grammar. The result should feel premium and complete, but it must still feel born from an upper-wrap field system rather than from realism with elegant fabric added.

Do not only beautify the cloth. Do not upscale generic realism. Do not let premium finish erase the branch. Rebuild the whole world as if it were generated by soft poised sheer-field logic.
