

Tawlhlohpuan - Mizoram

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic source-faithful visual logic of **Tawlhlohpuan from Mizoram**. Treat this as a **warrior-signifying woven cloth system**, not as a generic Mizo textile, decorative ethnic shawl, striped fabric design, print pattern, or fashion wrap. Build the entire image as if it comes from a compact handwoven cloth tradition whose deepest identity is **firmness, courage, no-retreat resolve, two-piece joined construction, red-white joining discipline, finished edge control, dark indigo-black woven ground, and declarative warrior drape**.

The cloth must feel structurally built, not decorated. Preserve **two separately woven panels joined into one cloth**, with the spirit of **alternating red-white joining stitches**, visible or strongly implied **edge-finish discipline**, and a **dark, weight-bearing woven body** rather than a soft ornamental surface. The image must feel cloth-first and structure-first. The drape must not feel casual or fashionable. It must feel held, public, compact, and sign-bearing, as if the cloth itself declares bravery and standing one's ground.

If figures appear, they must not remain generic realistic people wearing a traditional cloth. Their stance, silhouette, massing, and body-wrap relationship must also be rebuilt through Tawlhlohpuan logic: compactness, firmness, seam-awareness, edge containment, dark-ground authority, and warrior-signifying drape. If props, objects, architecture, or environment appear, they must belong to the same structural world and inherit the same joined-cloth intelligence rather than staying generic.

Material behavior must preserve handwoven truth: dense woven body, matte textile tactility, joined-panel memory, disciplined edges, and restrained red-white accent against a dark indigo-black or blue-black ground. The whole frame must feel born from Tawlhlohpuan, not styled with Tawlhlohpuan.

Do not make this generic Mizo handloom, a soft decorative shawl, a stripe-first cloth, a printed textile, a fashion editorial wrap, a casual festive scarf, or a realistic scene with one traditional cloth added afterward. Do not erase the two-piece join. Do not turn red-white accents into random ornament. Do not let the drape become soft, elegant, or decorative. Do not let the environment remain in another visual language.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** in the authentic source-faithful visual logic of **Tawlhlohpuan from Mizoram**.

Treat the style as a **warrior-authored handwoven cloth system** built from:

- compact woven cloth-body authority
- two-piece joined construction
- red-white seam discipline
- finished edge containment
- dark indigo-black woven ground
- declarative bravery-signifying drape
- no-retreat symbolic force

Preserve these non-negotiable rules:

- the cloth must feel structurally joined, not seamless
- the woven body must feel compact, medium-heavy, and held
- the dark ground must dominate over accent
- red-white accents must behave like join logic, not decorative stripes
- edges must feel finished and disciplined
- drape must feel public, steady, and sign-bearing rather than soft or casual
- the whole frame must belong to one Tawlhlohpuan world

Translate the subject like this:

- **[MAIN FIGURE / MAIN FORM]** becomes a Tawlhlohpuan-governed presence shaped by compact joined-cloth logic
- **[SECONDARY FIGURES / SECONDARY FORMS]** also obey the same seam, edge, and drape discipline
- **[OBJECTS / PROPS / SUPPORTS]** become forms whose divisions, boundaries, and contrast behavior inherit Tawlhlohpuan structure
- **[ENVIRONMENT / BACKGROUND / SPATIAL DIVISIONS]** become a world organized by firmness, boundary control, compact woven rhythm, and dark-ground hierarchy

Keep:

- bravery-cloth identity
- joined-panel memory
- edge discipline
- compact woven authority
- dark-ground structural dominance
- declarative drape force

Avoid:

- generic Mizo textile mood
- decorative shawl softness
- fashion styling

- printed stripes
- seamless fabric simplification
- random red-white ornament
- a generic world around one styled garment

Image-to-Image

Convert this source image into the authentic source-faithful visual logic of **Tawlhlohpuan from Mizoram**.

Preserve the source image's subject count, main action, pose relationships, and core readability, but rebuild the entire image through **Tawlhlohpuan cloth law**: compact handwoven body, two-piece joined construction, red-white seam discipline, finished edge control, dark indigo-black structural ground, and declarative warrior drape. The result must not look like a normal image wrapped in traditional cloth. It must feel like the whole image has been reconstructed by a bravery-signifying woven system.

If the source contains figures, rebuild their silhouette, stance, body-wrap relation, and visual weight through Tawlhlohpuan logic rather than generic realism. If the source contains props, architecture, surfaces, or background, translate them into the same structural world so that seam logic, edge containment, dark-ground hierarchy, and firmness-based drape intelligence extend across the full frame.

Do not simply add a Tawlhlohpuan textile to a realistic scene. Do not convert it into a stripe-pattern design. Do not turn the join into decorative trim. Do not soften the cloth into fashion drape. Do not let the garment alone carry the style while the rest of the world remains generic.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in a **creative 2D + 3D translation rooted in the source grammar of Tawlhlohpuan from Mizoram**. This is not literal artisan simulation and not generic handcrafted styling. It must remain deeply rooted in Tawlhlohpuan's source system: **bravery-cloth identity, two-piece joined construction, red-white seam discipline, edge-finished containment, dark-ground woven authority, and declarative warrior drape**. Then translate that grammar into a richer hybrid visual world where 2D structural clarity and 3D dimensional presence coexist.

The image should feel as if Tawlhlohpuan's inner law has expanded beyond cloth into a full visual system. Let the **joined-panel logic** become a broader compositional principle. Let the **seam** become a structural transition rule. Let the **edge discipline** become boundary logic across the image. Let the **dark ground versus controlled accent** become full-frame hierarchy. Let the **warrior-signifying drape** become a body-language and world-behavior system. The result should still feel handwoven-first and source-rooted, but it can become more imaginative, more spatially articulate, and more image-powerful.

If figures appear, they must become forms shaped by compact cloth intelligence, held silhouettes, and structured drape rather than naturalistic anatomy. If objects and environment appear, they must also inherit the same joined-cloth grammar so the frame feels generated from Tawlhlohpuan rather than merely decorated with it. The image may become more dimensional and more expressive, but it must stay branch-pure.

Material behavior should preserve woven density, matte textile tactility, seam-memory, and edge-completion, while allowing richer hybrid dimensionality. The world must still feel compact, sign-bearing, and courage-driven, not soft, ornamental, or fashion-forward.

Do not make this generic ethnic illustration, decorative handcrafted art, folk-design fantasy, fashion render, or a normal dimensional image wearing Tawlhlohpuan motifs. Do not turn V2 into "the same cloth with more texture." Do not lose the join. Do not spread the style as stripes only. Do not let the environment stay generic.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** as a creative 2D + 3D translation rooted in the source grammar of **Tawlhlohpuan from Mizoram**.

Treat the style as a **warrior-signifying joined-cloth system** and preserve these core rules:

- bravery / no-retreat identity remains primary
- two-piece panel logic remains active
- red-white seam logic stays structural
- edge completion remains important
- dark-ground woven authority remains dominant
- drape remains declarative, compact, and sign-bearing
- the whole frame must feel generated from Tawlhlohpuan

Translate the image like this:

- **[MAIN FIGURE / MAIN FORM]** becomes a hybrid 2D + 3D presence built from compact joined-cloth intelligence
- **[SECONDARY FIGURES / FORMS]** also follow the same seam, edge, and drape logic
- **[OBJECTS / PROPS / DIVISIONS]** inherit panel logic, contrast hierarchy, and structural boundary discipline

- **[ENVIRONMENT / BACKGROUND / SPATIAL ORDER]** becomes a richer visual world organized by dark-ground authority, controlled accent, joined transitions, and firmness-based drape behavior

Let these become richer:

- panel-to-panel relation
- seam as visual transition
- edge as compositional control
- cloth mass and dimensionality
- structural drape across the full frame
- hybrid 2D + 3D image-space power

Keep unchanged:

- source-rooted Tawlhlohpuan grammar
- bravery-cloth meaning
- joined construction memory
- edge discipline
- compact woven authority
- whole-frame consistency

Avoid:

- generic ethnic craft illustration
- fashion-world styling
- decorative surface stripes
- printed or graphic pattern logic
- literal museum simulation only
- generic dimensional world around one styled cloth

Image-to-Image

Convert this source image into a creative 2D + 3D translation rooted in the source grammar of **Tawlhlohpuan from Mizoram**.

Preserve the source image's subject count, action, pose relationships, and scene readability, but rebuild all visible elements through **Tawlhlohpuan structural law**. The image must no longer behave like ordinary realism or generic illustration. Reconstruct it through compact woven authority, two-piece panel relation, red-white seam intelligence, finished edge containment, dark-ground hierarchy, and declarative courage-signifying drape.

Let the scene become more hybrid and more image-rich than a strictly source-faithful cloth study, but keep the style rooted in Tawlhlohpuan's actual grammar. Figures must become more compact, held, and structurally wrapped. Props and objects must inherit seam logic

and edge discipline. Environment and space must stop being generic and become organized by joined-cloth intelligence and firmness-based visual order.

Do not place Tawlhlohpuan on top of a normal image. Do not make it a decorative handcrafted re-skin. Do not turn V2 into generic folk-art depth. Do not soften the cloth into festival elegance. Do not let the style survive only in costume while the rest of the frame remains unchanged

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a **full 3D realistic dimensional world where the entire Tawlhlohpuan style system becomes believable reality**. “Realistic” here does not mean replacing the style with generic realism. It means believable volume, material behavior, spatial separation, gravity, light on form, and environmental completion while **Tawlhlohpuan still controls the world**.

Build the image as if **Tawlhlohpuan from Mizoram truly existed as world-law**. Translate its full grammar into reality: **bravery-signifying cloth identity, compact woven authority, two-piece joined construction, red-white seam discipline, finished edge containment, dark indigo-black structural ground, and declarative warrior drape**. Every major element must adapt to that system. Figures must feel shaped by compact joined-cloth mass and no-retreat bodily logic. Objects must feel bounded, panel-conscious, and seam-aware. Spatial divisions and environmental structures must feel controlled by edge discipline and dark-ground hierarchy. The whole world must feel firm, held, and sign-bearing rather than ornamental.

The realism must remain style-faithful. The cloth cannot become normal fabric with heritage value. The join cannot vanish into realism. The seam cannot become mere costume stitching. The edge cannot soften into generic drape. The dark ground cannot flatten into ordinary color design. The warrior-signifying force cannot turn into soft cultural fashion. The scene must feel as though Tawlhlohpuan has become a believable world, not as though a realistic world has borrowed Tawlhlohpuan.

Material behavior should preserve medium-heavy woven body, compact drape, matte cloth tactility, seam-memory, controlled accent, and structural edge finish. Composition should remain controlled by firmness, boundaries, contrast hierarchy, and held drape rather than casual scene-flow.

Do not make this generic realism with Mizo clothing, festival or warrior costume drama, fashion-photography realism, decorative ethnic world-building, or a normal environment with Tawlhlohpuan cloth attached. Do not let realism become the main driver. Do not let one important element remain generic.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** as a full 3D realistic dimensional world where the entire **Tawlhlohpuan from Mizoram** style system becomes believable reality.

Treat the style as a **warrior-authored woven world system** and preserve these non-negotiable rules:

- bravery / no-retreat identity still drives the frame
- compact woven authority remains primary
- two-piece joined construction memory remains active
- red-white seam logic remains structural
- edges remain finished and disciplined
- dark indigo-black ground remains visually dominant
- drape remains declarative, held, and sign-bearing
- the whole frame must belong to one Tawlhlohpuan world

Translate the world like this:

- **[MAIN FIGURE / MAIN FORM]** becomes a believable volumetric form governed by compact joined-cloth logic
- **[SECONDARY FIGURES / FORMS]** become branch-consistent dimensional presences under the same seam-and-edge law
- **[OBJECTS / PROPS / THRESHOLDS / DIVISIONS]** become structurally bounded forms shaped by panel relation, seam intelligence, and dark-ground hierarchy
- **[ENVIRONMENT / BACKGROUND / WORLD STRUCTURE]** becomes a full spatial system organized by firmness, edge discipline, compact mass, and declarative drape behavior

Increase:

- believable volume
- material-light interaction
- cloth mass and gravity
- figure-ground separation
- environmental completion
- whole-frame world coherence

Do not lose:

- bravery-cloth identity
- joined construction memory
- seam and edge logic
- dark-ground structural dominance
- compact woven authority
- whole-frame rebuild rule

Avoid:

- generic realism with traditional costume
- fashion-led drape
- decorative stripe world-building
- soft cinematic elegance
- ordinary environment plus Mizo cloth
- any important element remaining in another visual language

Image-to-Image

Convert this source image into a full 3D realistic dimensional world where the entire **Tawlhlohpuan from Mizoram** style system becomes believable reality.

Preserve the source image's subject count, major action, pose logic, and core readability, but rebuild the whole frame through **Tawlhlohpuan world-law**. Replace ordinary realism or ordinary stylization with compact woven authority, two-piece joined construction memory, red-white seam discipline, finished edge behavior, dark-ground structural hierarchy, and declarative courage-signifying drape.

If the source contains figures, they must become believable volumetric presences shaped by held cloth logic rather than generic anatomy-first realism. If the source contains objects, props, boundaries, architecture, or environment, they must also be reconstructed through the same joined-cloth intelligence so the whole world feels built from Tawlhlohpuan. The realism must remain subordinate to the style, not the other way around.

Do not simply add Tawlhlohpuan garments to a realistic scene. Do not turn the cloth into costume detail. Do not erase the join into realism. Do not make the drape casual. Do not build a generic environment around a styled textile. The final image must feel like Tawlhlohpuan itself became believable reality.
