

Basohli - Jammu

V1 — Authentic Style

Universal Hard Prompt

Create an image in pure authentic source-truth Basohli painting from Jammu.

Treat this as a true Basohli–Kathua Pahari miniature tradition, not as generic Indian miniature, not as Mughal naturalism, not as soft Kangra lyricism, not as mural painting, and not as decorative folk illustration.

Build the image from the true grammar of Basohli:
prepared wasli or Sialkoti paper identity,
burnished miniature surface,
bold black outline authority,
bright primary-color force,
large expressive eyes,
stylized deep-set facial formula,
imposing compressed figures,
red border framing,
decorative high-horizon symbolic space,
courtly-devotional-literary narrative charge,
and whole-image Basohli coherence.

The image must feel like it genuinely belongs inside the original Basohli tradition.

Keep the whole frame inside one miniature-authored visual language.

The image itself must be source-born:
miniature first,
paper first,
controlled staged composition first,
not naturalistic realism,
not scenic illustration,
not textile-like pattern spread.

Face logic must remain source-faithful:
Basohli facial construction,
large dominant eyes,
stylized nose and forehead and chin relation,
deep-set face pattern,
emotionally charged expression,
not soft naturalistic portraiture,
not generic Pahari face,
not Mughal observational realism.

Line logic must remain source-faithful:

bold black outlines,
shape-locking contours,
clear figure separation,
strong contour discipline,
not soft painterly edges,
not atmospheric blur,
not loose sketch softness.

Color logic must remain source-faithful:

strong red and yellow and blue and green with emotionally forceful contrast,
frontal color presence,
not pastel,
not smoky tonalism,
not lyrical soft transitions,
not naturalistic light modeling.

Space logic must remain source-faithful:

compressed miniature staging,
high horizon,
narrow sky,
decorative symbolic landscape,
coded water and trees and weather,
controlled background fields,
not deep optical perspective,
not naturalistic environment rendering.

Ornament logic must remain source-faithful:

courtly costume,
gold and silver refinement where relevant,
embossed pearl-like details where relevant,
precious miniature richness,
always supporting Basohli figure-and-composition force,
never luxury decoration replacing structure.

Narrative logic must remain source-faithful:

devotional and literary and courtly charge,
Krishna / epic / Ragamala / Rasmanjari / poetic miniature intensity where relevant,
not casual pretty scene painting,
not generic romantic illustration.

Do not add:

Kangra softness,
Mughal realism,
generic Rajput miniature language,
modern fantasy miniature styling,
soft atmospheric painterliness,

or any second painting language stronger than Basohli.

The final result must feel like true Basohli miniature painting at source-truth level, not a modern image merely styled with bright colors and large eyes.

Reusable Variable Template

Create [SUBJECT / MINIATURE SCENE / DEVOTIONAL OR LITERARY IMAGE / COURTLY PICTORIAL WORLD] using the authentic source-truth grammar of Basohli painting from Jammu.

Core style system to preserve:

prepared wasli or Sialkoti paper identity,
bold black outline authority,
bright primary-color force,
large expressive eyes,
stylized deep-set facial formula,
compressed dramatic figure structure,
red border framing,
decorative high-horizon symbolic space,
courtly-devotional-literary miniature coherence.

Translate the image like this:

[MAIN FIGURE / MAIN SUBJECT / MAIN ACTION] becomes a Basohli-born miniature presence built through stylized facial structure, eye dominance, and compressed dramatic pictorial intensity.

[SECONDARY FIGURES / SUPPORTING ELEMENTS] become supporting Basohli presences obeying the same facial, contour, and color grammar.

[BACKGROUND / LANDSCAPE / ARCHITECTURE / WORLD] becomes a Basohli-authored symbolic miniature environment rather than neutral realism or generic Pahari scenery.

Keep:

miniature-paper identity,
bold contour,
face stylization,
eye authority,
primary-color intensity,
red-border discipline,
symbolic high-horizon space,
Basohli coherence.

Avoid:

soft Kangra lyricism,
Mughal realism,
naturalistic depth,
pastel miniature styling,

decorative folk painting drift,
or a realistic world with Basohli added afterward.

The final image must feel like the Basohli tradition itself authored the full miniature world.

Image-to-Image

Convert this source image into an authentic source-truth Basohli world from Jammu.

Preserve the source image's core subject count, structural readability, and main visual organization, but rebuild the entire image through true Basohli grammar.

Replace ordinary image logic with:
prepared miniature-paper identity,
bold black contour,
bright primary-color force,
large expressive eyes,
stylized deep-set face grammar,
compressed dramatic figuration,
red border framing,
decorative high-horizon symbolic space,
and full Basohli coherence.

Do not simply make the colors brighter.
Do not merely enlarge the eyes.
Do not turn the source into generic Indian miniature styling.

If the source contains figures, objects, architecture, landscape, or background, rebuild them through Basohli miniature logic:
face-first stylization,
contour authority,
miniature compression,
symbolic decorative space,
courtly-devotional-literary intensity,
and Basohli-authored coherence.

Do not leave the environment as naturalistic realism.
Do not make it behave like Mughal painting, Kangra painting, or modern stylized illustration.

The final image must feel like a genuine Basohli miniature world from Jammu, not a modern image decorated with bright color and stylized eyes.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Basohli painting from Jammu.

This is not a literal paper-texture mockup.

This is not embossed miniature decor.

This is not the same painting with richer shading only.

This is not Kangra-softened Basohli.

This is not Mughal-naturalistic refinement.

Preserve the same deep Basohli grammar unchanged:

prepared miniature-paper identity,

bold black outline authority,

bright primary-color force,

large expressive eyes,

stylized deep-set facial formula,

compressed dramatic figures,

red border framing,

decorative high-horizon symbolic space,

courtly-devotional-literary intensity,

and whole-image Basohli coherence.

Now re-author that same grammar into a richer, more inventive, more dimensional 2D + 3D hybrid image-form.

The added dimensionality must come from Basohli's own logic:

facial planes becoming more structurally legible,

eyes becoming more spatially commanding,

figures gaining crafted volume without losing stylization,

ornament gaining tactile miniature richness,

space gaining layered symbolic depth without becoming optical realism,

landscape elements becoming more materially present while staying coded and decorative,

and the entire image remaining fully Basohli-born.

Do not only improve texture.

Do not only increase realism.

Do not only add shadow.

Transform the full image logic:

form,

construction,

grouping,

silhouette,

objects,

environment,
spatial organization,
and full-frame visual language.

If figures appear, they must not remain generic realistic humans painted in miniature colors.
They must become Basohli-born presences:
face logic shaped by Basohli facial grammar,
body logic shaped by compressed miniature structure,
silhouettes built through contour and costume rhythm rather than realism,
objects and props translated into the same Basohli symbolic system.

If environment appears, it must not remain neutral realism.
It must already begin to feel re-authored by Basohli:
symbolic-space logic,
high-horizon staging,
decorative tree-and-water-and-sky coding,
miniature emotional compression,
not just normal scenery with Basohli styling somewhere inside it.

Believable depth must come from Basohli itself,
not from default realism,
not from later Pahari softness,
not from generic 3D painting habits.

Keep:
source-rooted Basohli identity,
face authority,
eye dominance,
contour force,
creative artisan translation,
miniature symbolic-space control,
full-frame style control.

Do not allow:
soft lyrical drift,
Mughal realism,
paper-mockup behavior,
decorative embossed-miniature styling,
generic Indian miniature blending,
or a normal image underneath with Basohli decoration added later.

The final result must feel like Basohli miniature painting itself has creatively re-authored the image into a richer, more dimensional, more inventive miniature world while still remaining fully Basohli-born.

Reusable Variable Template

Create [SUBJECT / SCENE / MINIATURE WORLD / DEVOTIONAL OR LITERARY IMAGE]
in V2 = authentic handcrafted dimensional translation of Basohli painting from Jammu.

Preserve these unchanged deep style-core rules:

prepared wasli or Sialkoti paper identity,
bold black outline authority,
bright primary-color force,
large expressive eyes,
stylized deep-set facial formula,
compressed dramatic figure structure,
red border framing,
decorative high-horizon symbolic space,
courtly-devotional-literary miniature coherence.

Translate the image like this:

[MAIN FIGURE / MAIN SUBJECT / MAIN ACTION] becomes a Basohli-born dimensional presence built through stylized facial planes, eye hierarchy, and compressed miniature drama.

[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become supporting Basohli presences governed by the same contour, color, and face grammar.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a creatively re-authored Basohli space where grouping, depth, and symbolic rhythm come from Basohli miniature logic rather than neutral realism.

Increase:

dimensional presence,
face-to-eye relation,
figure compression clarity,
ornament tactility,
symbolic-space layering,
primary-color force,
inventive Basohli world-building.

Do not lose:

miniature-paper identity,
bold contour,
face stylization,
eye authority,
red-border discipline,
high-horizon symbolic space,
whole-image Basohli control.

Avoid:

Kangra softness,
Mughal realism,
paper-mockup logic,

generic miniature blending,
decorative folk drift,
or a realistic world with Basohli added afterward.

The final image must feel like the same Basohli grammar has been creatively translated into a richer, more dimensional, more scene-capable visual form.

Image-to-Image

Convert this source image into a V2 authentic handcrafted dimensional Basohli world from Jammu.

Preserve the source image's main action, subject count, pose relations, and overall readability, but rebuild the entire image through Basohli grammar translated into a richer, more dimensional, more inventive hybrid image-form.

Replace ordinary image logic with:
prepared miniature-paper identity,
bold contour,
bright primary-color force,
large expressive eyes,
stylized deep-set facial structure,
compressed dramatic figures,
red border framing,
decorative high-horizon symbolic space,
and full Basohli coherence.

Do not simply sharpen outlines.
Do not just enrich paper grain.
Do not make it a prettier miniature illustration.

Rebuild the image so that:
forms are organized through Basohli's own face-and-contour logic,
depth comes from figure compression and symbolic-space layering,
objects and environments begin to behave like a Basohli-authored world,
and the whole frame feels generated by Basohli itself rather than realism with miniature styling added on top.

If figures appear, rebuild them as Basohli-born presences rather than realistic people in traditional costume.

If environments appear, rebuild them through Basohli visual ontology rather than neutral realism.

The final image must feel like a true creative artisan translation of Basohli into a richer dimensional miniature world, not a normal image with Pahari miniature styling.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of Basohli painting from Jammu while keeping the same source grammar unchanged.

This is not realism replacing style.
This is not Mughal-naturalistic realism.
This is not Kangra lyricism.
This is not live-action costume realism.
This is not a normal world with Basohli styling added afterward.

Preserve the same deep Basohli grammar unchanged:
prepared miniature-paper identity,
bold black outline authority,
bright primary-color force,
large expressive eyes,
stylized deep-set facial formula,
compressed dramatic figures,
red border framing,
decorative high-horizon symbolic space,
courtly-devotional-literary intensity,
and whole-image Basohli coherence.

Now push that same grammar into its most complete, most fully embodied, most fully resolved, most fully inhabitable dimensional world state.

The entire visible world must be generated by Basohli logic.

That means the transformation must affect everything:
faces,
bodies,
hands,
feet,
hair,
posture,
gesture,
props,
objects,
ground,
architecture,
plants,
sky treatment,
empty space,

environment rhythm,
foreground,
midground,
background,
and the full-frame visual language.

Nothing important may remain generic realism.

Basohli must control reality through its own logic:
stylized face construction,
eye-centered emotional intensity,
bold contour authority,
primary-color organization,
miniature compositional compression,
red-border frame discipline,
decorative symbolic landscape coding,
courtly-devotional-literary pictorial ontology.

Believable here must mean:
believable volume,
believable spatial relation,
believable material embodiment,
believable environmental completion,
believable inhabitable world logic.

It must not mean:
optical realism,
portrait realism,
cinematic period-drama realism,
naturalistic scenery,
Mughal refinement,
or realism-first image making.

If figures appear, they must be fully Basohli-born:
face construction shaped by Basohli facial formula,
body logic shaped by compressed miniature structure,
silhouette logic shaped by contour and costume rhythm,
gesture and posture integrated into the same Basohli world system.

If environment appears, it must also be fully Basohli-born:
ground, structures, objects, space, and atmosphere must all belong to one uninterrupted
Basohli world,
not a normal realistic environment underneath.

If you remove decorative cues, the image should still feel Basohli through:
form construction,
body logic,
object logic,

environment logic,
spatial organization,
face-and-contour miniature grammar,
and full-world visual ontology.

Keep:

same deep Basohli grammar,
full world embodiment,
full environmental completion,
stronger figure-ground hierarchy,
stronger spatial separation,
stronger material presence,
stronger total-frame style control.

Do not allow:

Mughal realism,
Kangra softness,
cinematic historical realism,
generic miniature fantasy language,
decorative folk drift,
or any second painting language stronger than Basohli.

The final result must feel like Basohli painting itself has taken over the whole visible world and fully generated reality through Jammu Pahari miniature logic, not like realism with Basohli decoration.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V3 = fully resolved believable real-world 3D translation of Basohli painting from Jammu.

Keep these unchanged deep style-core rules:

prepared wasli or Sialkoti paper identity,
bold black outline authority,
bright primary-color force,
large expressive eyes,
stylized deep-set facial formula,
compressed dramatic figure structure,
red border framing,
decorative high-horizon symbolic space,
courtly-devotional-literary miniature coherence.

Translate the image like this:

[MAIN FIGURE / MAIN SUBJECT / MAIN ACTION] becomes a fully embodied Basohli-born presence generated through face authority, eye intensity, contour force, and full miniature-world control.

[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become equally style-born Basohli presences.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a complete inhabitable Basohli world where spatial structure, environmental rhythm, and full-scene organization are all controlled by the same Jammu Pahari miniature grammar.

Increase:

full world embodiment,
full environmental translation,
stronger spatial relation,
stronger figure-ground separation,
stronger material presence,
stronger world coherence,
stronger full-frame Basohli control.

Do not lose:

miniature-paper identity,
bold contour,
face stylization,
eye authority,
primary-color force,
red-border discipline,
whole-world Basohli ontology.

Avoid:

Mughal realism,
Kangra softness,
naturalistic scene painting,
period-drama realism,
generic miniature styling,
or a normal world with Basohli added afterward.

The final image must feel like the same deep Basohli grammar has fully generated an entire believable world.

Image-to-Image

Convert this source image into a V3 fully resolved believable real-world Basohli world from Jammu.

Preserve the source image's main action, subject count, pose relations, and readable structure, but rebuild all visible forms through fully embodied Basohli grammar.

Replace ordinary realism with:

prepared miniature-paper identity,
bold contour,

bright primary-color force,
large expressive eyes,
stylized deep-set face grammar,
compressed dramatic figuration,
red border framing,
decorative high-horizon symbolic space,
and full-world Basohli coherence.

Do not simply place Basohli faces into the image.
Do not just intensify the colors.
Do not leave the environment generic.

Rebuild the full image so that:
faces, bodies, objects, props, and environment all belong to the same Basohli miniature ontology,
depth comes from Basohli's own figure compression, contour logic, and symbolic-space order,
space is organized through miniature emotional intensity,
the world becomes fully inhabitable but remains completely Basohli-born,
not realism-first.

If any part of the frame remains normal realism underneath, the conversion has failed.

The final image must feel like Basohli painting itself has fully generated the entire visible world, not like a normal image decorated with Jammu Pahari miniature cues.
