

Dhaniakhali - West Bengal

V1 — Authentic Style

Universal Hard Prompt

Create an image in the **pure authentic source-truth visual logic of Dhaniakhali handloom sari tradition from West Bengal**.

Treat this as a true **Hooghly-rooted cotton sari system** built from:

firm cotton handloom body,
border-led sari identity,
historical kora or natural-grey ground memory,
red or black border ancestry,
khejur chori pallu distinction,
dobby-generated woven development,
bamboo-reed structural weave behavior,
and practical Bengali sari clarity.

Do not treat this as generic Bengal cotton sari styling.

Do not treat this as simple handloom minimalism.

Do not treat this as printed cotton fashion.

Do not treat this as jamdani-like figured ornament.

Build the image through real Dhaniakhali grammar:

the sari must read first as a structurally woven cotton sari,
the border must act as a major identity zone,
the pallu must carry real khejur chori force,
the cloth must feel handloom-authored and firm rather than soft luxury,
the woven order must remain clearer than decoration,
and the whole frame must feel governed by sari structure rather than by generic realism.

If figures appear, they must not be generic fashion figures wearing a handloom sari.

Their drape, pleats, pallu fall, border visibility, body-cloth relation, and visual posture must all feel authored by Dhaniakhali logic.

If the frame includes objects, furniture, domestic space, street space, architecture, or environment, they must not overpower the sari grammar.

Everything must support:

cotton clarity,
border structure,
pallu distinction,
and restrained handloom order.

Do not make:

generic Bengal cotton sari,
soft premium cotton realism,
printed border design,
generic decorative pallu,
motif-heavy handloom styling,
or one Dhaniakhali-looking sari inside a generic image-world.

The final image must feel like **authentic Dhaniakhali sari intelligence itself generated the whole frame**.

Reusable Variable Template

Create **[SUBJECT / FIGURE / SCENE / WORLD]** in the **pure authentic source-truth visual logic of Dhaniakhali handloom sari tradition from West Bengal**.

Treat the style as a **Hooghly cotton sari system** built from:

firm cotton handloom body,
border-led structure,
khejur chori pallu identity,
historical kora-ground memory,
red or black border ancestry,
dobby-based woven development,
bamboo-reed structural weave behavior,
and practical Bengali sari clarity.

Core style system to preserve:

the sari must remain cotton-first,
the border must remain a structural identity-carrier,
the pallu must remain branch-specific,
woven design must remain loom-authored,
the cloth must feel firm and practical rather than soft luxury,
and the whole frame must stay Dhaniakhali-born rather than Bengal-generic.

Translate the image like this:

[MAIN FIGURE] must become Dhaniakhali-governed through sari structure, border visibility, pallu distinction, and firm cotton drape behavior.

[SECONDARY FIGURES] must also follow the same woven sari logic rather than generic realism.

[OBJECTS / PROPS] must support the same structural order and visual restraint.

[ENVIRONMENT / BACKGROUND] must feel organized by cotton sari clarity and woven discipline, not by decorative mood.

Keep:

cotton sari structure,
border-led identity,
khejur chori pallu force,
dobby-authored woven order,
firm handloom clarity,
and whole-frame restraint.

Avoid:

generic Bengal cotton sari,
print-like border logic,
decorative pallu without structure,
jamdani-style figured drift,
soft fashion cotton,
or one source-aware sari inside a generic world.

The final result must feel like **true Dhaniakhali handloom logic itself generated the image.**

Image-to-Image

Convert this source image into the **pure authentic source-truth visual logic of Dhaniakhali handloom sari tradition from West Bengal.**

Preserve the source image's subject count, core action, pose logic, and readability, but rebuild the entire image through **Dhaniakhali cotton sari grammar.**

Replace generic fabric logic with:

firm cotton handloom structure,
border-led sari identity,
khejur chori pallu distinction,
historical kora-ground memory where relevant,
dobby-based woven order,
and bamboo-reed structural cloth character.

Do not merely add a simple border.

Do not merely make the cloth look handloom.

Do not merely turn the pallu decorative.

Do not keep generic fashion or lifestyle realism underneath.

Rebuild:

the sari body,
the border,
the pallu,
the pleat logic,
the cloth stiffness-versus-fall balance,

the figure-cloth relation,
and the wider image hierarchy
so the whole frame feels authored by Dhaniakhali rather than decorated with Dhaniakhali cues.

The final result must feel like the source image has been completely re-authored through **authentic Dhaniakhali sari logic**.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in **V2 = authentic handcrafted dimensional translation of Dhaniakhali handloom sari tradition from West Bengal**.

Preserve the same deep Dhaniakhali grammar:

firm cotton handloom body,
border-led structural identity,
khejur chori pallu distinction,
historical kora-ground memory,
dobby-based woven development,
bamboo-reed weave character,
and practical Bengali sari clarity.

Now translate that same grammar into believable handcrafted dimensional form.

This must not become generic textile realism.

This must not become premium handloom fashion.

This must not become soft Bengali cotton lifestyle styling.

Dimensionality must come from Dhaniakhali itself:

stronger cotton-body presence,
clearer border authority,
clearer khejur chori pallu readability,
more tactile loom-authored surface,
more believable pleat and fold structure,
stronger sari-zone separation,
and stronger figure-cloth-environment coherence.

Let the image gain:

moderate dimensional presence,
better drape-readability,

clearer cloth structure,
more tactile cotton weave presence,
and fuller sari-world embodiment.

But keep unchanged:

cotton-first identity,
border structure,
pallu distinction,
woven-not-applied order,
firm handloom clarity,
and restrained Bengali practicality.

Do not allow:

soft premium cotton glamour,
generic decorative pallu,
print-like or surface-applied design,
generic Bengal handloom prettiness,
or realism where only the sari edge looks Dhaniakhali.

The whole image must feel like **Dhaniakhali sari logic translated into handcrafted woven-structure embodiment.**

Reusable Variable Template

Create **[SUBJECT / FIGURE / SCENE / WORLD]** in **V2 = authentic handcrafted dimensional translation of Dhaniakhali handloom sari tradition from West Bengal.**

Preserve the unchanged deep source core:

firm cotton sari body,
border-led structure,
khejur chori pallu identity,
dobby-authored woven order,
bamboo-reed structural memory,
and practical handloom clarity.

Translate the image into handcrafted dimensional form by increasing:

cotton-body presence,
border-pallu authority,
woven tactility,
cloth firmness,
pleat readability,
figure-ground separation,
and whole-frame sari coherence.

Build the image like this:

[MAIN FIGURE] becomes a dimensional Dhaniakhali-bearing figure whose sari still reads through border structure, pallu signature, cotton firmness, and woven clarity.

[SECONDARY FIGURES] must remain subordinate to the same Dhaniakhali order.

[PROPS / OBJECTS] must feel compatible with structural handloom restraint, not generic décor.

[ENVIRONMENT / BACKGROUND] must become calmer, clearer, and more structure-led so the sari grammar remains primary.

Keep:

cotton structure,
border force,
khejur chori pallu,
woven order,
firm practical clarity,
and Dhaniakhali-born hierarchy.

Avoid:

generic Bengal cotton realism,
soft textile glamour,
pallu beautification without branch identity,
printed-looking design,
or one source-aware sari inside a generic world.

The final image must feel like **authentic Dhaniakhali handloom logic translated into handcrafted dimensional presence**.

Image-to-Image

Convert this source image into **V2 = authentic handcrafted dimensional translation of Dhaniakhali handloom sari tradition from West Bengal**.

Keep the source image's subject count, core action, and scene readability,
but rebuild the entire image through Dhaniakhali grammar translated into woven-structure embodiment.

The image must no longer behave like generic cotton textile realism.

Replace that with:

firm cotton handloom body,
border-led sari identity,
khejur chori pallu distinction,
dobby-generated woven order,

bamboo-reed structural memory,
and practical Bengali drape clarity.

Add:

more tactile cotton presence,
clearer border-pallu contrast,
more believable sari structure,
better fold and pleat logic,
and stronger whole-frame coherence.

But do not let dimensionality come from soft luxury realism.
Do not keep generic Bengali lifestyle image logic under a Dhaniakhali surface.
Do not turn the result into a tasteful simple handloom photo.

Rebuild all visible elements so they feel born from **Dhaniakhali cotton sari dimensional logic**.

The result must feel like the source image has entered the handcrafted dimensional state of the same Dhaniakhali system.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in **V3 = fully resolved believable dimensional world of Dhaniakhali handloom sari tradition from West Bengal**.

Preserve the same unchanged deep style-core:

firm cotton handloom body,
border-led sari identity,
khejur chori pallu distinction,
historical kora-ground memory,
dobby-generated woven development,
bamboo-reed structural weave character,
and practical Bengali sari clarity.

Now push that same grammar into its most believable, fully embodied dimensional world.

Believable here means:

believable cotton-material presence,
believable border-pallu relation,
believable sari drape and pleat behavior,
believable figure-ground separation,

believable full-frame completion,
and believable same-style world coherence.

It does NOT mean:

premium Bengali handloom fashion,
soft lifestyle realism,
generic simple cotton-sari beauty,
printed-border prettiness,
or realism with Dhaniakhali cues layered on later.

The same Dhaniakhali logic must still govern:

cotton body,
border hierarchy,
pallu distinction,
woven structure,
cloth firmness,
and whole-frame order.

Increase:

full sari-world completion,
material clarity,
figure-cloth-environment integration,
spatial coherence,
and total Dhaniakhali readability.

But do not introduce another style layer.

Do not let beauty replace branch identity.

Do not let realism become stronger than weave structure.

Do not let the environment become more generic than the sari.

Do not let Dhaniakhali survive only as a border and simple pallu.

The final image must feel like **Dhaniakhali handloom intelligence itself has become a believable dimensional world.**

Reusable Variable Template

Create **[SUBJECT / FIGURE / SCENE / WORLD]** in **V3 = fully resolved believable dimensional world of Dhaniakhali handloom sari tradition from West Bengal.**

Keep the same unchanged deep style-core:

cotton sari-first identity,
border-led structure,
khejur chori pallu distinction,

dobby-authored woven order,
bamboo-reed structure memory,
and firm practical handloom clarity.

Now fully embody that style into a believable dimensional world.

Increase:

cotton-material believability,
border and pallu authority,
cloth-body integration,
spatial separation,
environmental completion,
whole-frame coherence,
and Dhaniakhali-world readability.

Build the image like this:

[MAIN FIGURE] must be fully Dhaniakhali-born, not a generic realistic figure wearing a simple Bengal cotton sari.

[SECONDARY FIGURES] must also inherit the same structural sari order.

[PROPS / OBJECTS] must support the same practical woven clarity and restraint.

[ENVIRONMENT / BACKGROUND] must become a complete world that still behaves like Dhaniakhali, not ordinary Bengali lifestyle realism.

Keep unchanged:

cotton sari structure,
border force,
khejur chori pallu,
woven firmness,
practical Bengali handloom clarity,
and same-style whole-frame control.

Avoid:

generic Bengal cotton realism,
premium heritage-fashion styling,
decorative pallu glamour,
printed-border drift,
jamdani-like figured softness,
or any second visual language overpowering Dhaniakhali.

The final image must feel like **the same Dhaniakhali sari system has become fully embodied as a believable world.**

Image-to-Image

Convert this source image into **V3 = fully resolved believable dimensional world of Dhaniakhali handloom sari tradition from West Bengal.**

Preserve the source image's subject count, core action, scene purpose, and main readability,
but rebuild every visible element through **Dhaniakhali sari grammar fully embodied as a world.**

Replace ordinary realism with:

firm cotton sari structure,
border-led identity,
khejur chori pallu distinction,
dobby-based woven order,
bamboo-reed structural clarity,
and practical Bengali handloom composure.

Expand the source into:

fully embodied Dhaniakhali-governed figures,
believable border-pallu authority,
clear cloth structure,
strong material presence,
full environmental completion under Dhaniakhali logic,
and total same-style coherence.

But keep the same source grammar intact.

Do not let realism replace the branch.

Do not add Dhaniakhali only as a simple border and pallu.

Do not let the background become generic Bengali realism.

Do not let V3 turn into premium Bengal handloom imagery.

Do not let the image become a nicer but less specific version of V1.

Rebuild the entire frame so it feels like **authentic Dhaniakhali sari logic itself has become a fully resolved dimensional world.**

If the result feels like reality coated with simple Bengal sari styling, it has failed.

If it feels like Dhaniakhali itself has become a whole world, it is correct.
