

Himalayan sacred-image / thangka - Ladakh

V1 — Authentic Style

Universal Hard Prompt

Create an image in the pure authentic source-truth visual logic of Himalayan sacred-image / thangka-related tradition from Ladakh.

Treat this as a real sacred-image system, not as generic Buddhist decoration, not as fantasy mysticism, not as scenic monastery realism, and not as a beautiful spiritual painting without iconographic discipline.

Build the entire image as if it comes from true Ladakh-rooted western Himalayan sacred-image intelligence:

- iconographic correctness,
- iconometric proportion discipline,
- deity- or sacred-concept-centered hierarchy,
- symbolic placement,
- sacred compositional order,
- prepared painted-cloth / mural-derived sacred surface logic,
- mineral-pigment and gold-based image behavior,
- halo / aureole / lotus / throne / cloud / flame framing intelligence,
- devotional and meditative image status,
- and same-language extension into shrine, mural, monastery, and sacred architectural worlds.

The style must control the whole frame:

- face logic,
- body logic,
- gesture logic,
- mudra clarity,
- posture logic,
- attribute logic,
- halo logic,
- throne and support logic,
- ornament logic,
- symbolic object logic,
- ground logic,
- architectural logic,
- retinue logic,
- spatial layering,
- negative space,
- and sacred-image hierarchy.

If figures appear, do not build them as normal realistic people first.
Build them as source-born sacred presences:
iconographic,
hieratic,
canon-bound,
non-photoreal in logic,
devotionally ordered,
and shaped by sacred-image grammar rather than by realism-first anatomy.

Do not treat the branch like generic Tibetan art.
Do not reduce it to mandala décor.
Do not turn it into fantasy-Buddhist mysticism.
Do not make it a scenic Himalayan painting with sacred props.
Do not let generic realism sit underneath the style.

The image must still feel like a Ladakh / western Himalayan sacred image:
reverential,
ordered,
devotional,
symbolically charged,
sacred-surface-born,
and capable of temple / mural / shrine-world extension.

Preserve true branch identity:
sacred-image-first,
iconographic-first,
iconometric-first,
deity-hierarchy-first,
symbolic-color-first,
ritual-image-first,
same-language-world-first.

Do not make it:
generic Buddhist art,
mandala wallpaper,
spiritual fantasy concept art,
mystical mountain poster art,
realistic humans with sacred accessories,
or realism with Buddhist symbols added later.

The final image must feel like the original Ladakh sacred-image system itself made this image.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in the pure authentic source-truth visual logic of Himalayan sacred-image / thangka-related tradition from Ladakh.

Treat the style as a sacred-image system built from:

- iconographic correctness,
- iconometric proportion discipline,
- deity- or sacred-concept-centered hierarchy,
- symbolic placement,
- sacred compositional order,
- painted sacred-surface logic,
- mineral/gold image behavior,
- ritual-image status,
- and western Himalayan monastic same-language extension.

Core style system to preserve:

- sacred-image identity,
- iconographic face and body grammar,
- mudra and posture discipline,
- symbolic hierarchy,
- ritual object logic,
- same-language shrine-world intelligence,
- whole-frame consistency.

Translate the image like this:

[MAIN FIGURES] must become source-born sacred presences, not normal realistic bodies.

[FACES] must become canon-bound, hieratic, spiritually stable, and non-photoreal in construction.

[BODIES / POSTURES / GESTURES] must obey iconometric proportion, mudra clarity, attribute discipline, and sacred stillness.

[OBJECTS / ATTRIBUTES / SUPPORTS] must feel identity-bearing and ritual, not decorative.

[ENVIRONMENT / BACKGROUND] must also inherit sacred layered order, not generic scenic realism.

[SPATIAL STRUCTURE] must feel symbolic, hierarchical, and devotionally organized.

Keep:

- sacred-image identity,
- measured proportion,
- iconographic discipline,
- symbolic placement,
- hieratic order,
- ritual-image attitude,
- same-language world logic.

Avoid:

- generic Tibetan spiritual art,
- fantasy Buddhist concept art,
- mandala décor,

poster deity illustration,
realism-first Himalayan scenery,
decorative Buddhism,
or one sacred figure inside an unstylized world.

The final result must feel like true Ladakh sacred-image logic itself generated the whole image.

Image-to-Image

Convert this source image into the pure authentic source-truth visual logic of Himalayan sacred-image / thangka-related tradition from Ladakh.

Preserve the source image's subject count, main action, pose relationships, and scene readability,
but rebuild the entire image through true western Himalayan sacred-image intelligence.

Replace normal realism with:
iconographic correctness,
iconometric proportion discipline,
deity- or sacred-concept hierarchy,
symbolic placement,
sacred compositional order,
painted sacred-surface logic,
mineral/gold visual behavior,
halo / lotus / throne / aura / cloud / flame structuring,
and ritual-image presence.

Do not merely place Buddhist ornaments on the image.

Do not merely add a halo, lotus, brocade border, or mandala background.

Do not turn the result into generic Tibetan spiritual illustration.

Do not keep realistic anatomy and realistic space while only the sacred accessories change.

Rebuild:

faces as sacred-image faces,
bodies as iconometric presences,
gestures as mudra-bearing forms,
attributes as identity-bearing sacred objects,
environment as symbolic sacred world-order,
and the whole frame as one Ladakh-authored sacred visual language.

The final result must feel like the source image has been completely re-authored through authentic Ladakh sacred-image grammar.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Himalayan sacred-image / thangka-related tradition from Ladakh.

Preserve the same deep source grammar of the branch:

- iconographic correctness,
- iconometric proportion discipline,
- deity-centered or sacred-concept-centered hierarchy,
- symbolic placement,
- sacred compositional order,
- painted sacred-surface intelligence,
- mineral/gold visual memory,
- ritual-image status,
- and western Himalayan monastic same-language extension.

Now translate that same grammar into believable handcrafted dimensional form.

This must not become generic realism.

This must not become fantasy spiritual concept art.

This must not become normal 3D bodies with sacred decoration added later.

Dimensionality must come from the branch itself:

- through sacred body presence,
- through halo / lotus / throne / support object depth,
- through retinue layering,
- through symbolic zone separation,
- through painted-material tactility,
- through sacred-object presence,
- through controlled foreground / middle / background hierarchy,
- and through iconographic ordering becoming spatially inhabitable without becoming realism-first.

Allow:

- moderate dimensional presence,
- tactile sacred objecthood,
- clearer separation of figure / support / retinue / background,
- more believable lotus-throne-body relation,
- richer aura and support structures,
- more readable sacred environment order,
- and stronger sacred-world coherence.

Figures must remain style-born:

- faces must remain hieratic and canon-bound,
- bodies must remain iconometric,

mudras must remain clear,
postures must remain prescribed,
attributes must remain identity-bearing,
and no major form may drift into generic realism.

Do not let ornament stay sacred while the body becomes generic.

Do not let space become scenic realism.

Do not let the environment become ordinary mountains / sky / architecture.

Do not let the image become realism wearing Buddhist symbols.

The whole image must feel like Ladakh sacred-image logic has entered handcrafted dimensional embodiment.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V2 = authentic handcrafted dimensional translation of Himalayan sacred-image / thangka-related tradition from Ladakh.

Preserve the unchanged deep source core:

iconographic correctness,
iconometric proportion,
sacred hierarchy,
symbolic placement,
ritual-image logic,
painted sacred-surface memory,
and western Himalayan sacred-image identity.

Translate the image into handcrafted dimensional form by increasing:

volume,
objecthood,
material tactility,
symbolic depth layering,
retinue separation,
support-structure presence,
sacred figure-ground articulation,
and iconographic environment coherence.

Build the image like this:

[MAIN FIGURES] become sacred-dimensional presences still governed fully by iconography and iconometry.

[FACES] remain canon-bound, calm, and non-photoreal, never ordinary realism.

[BODIES / POSTURES / GESTURES] gain tactile presence and dimensional articulation, but still read as sacred prescribed forms.

[ATTRIBUTES / OBJECTS / SUPPORTS] gain dimensional clarity through sacred logic, not realism-first rendering.

[ENVIRONMENT / BACKGROUND] gains symbolic layered order and sacred coherence, not generic cinematic depth.

Keep:

- sacred-image ontology,
- iconometric structure,
- iconographic discipline,
- ritual-image attitude,
- symbolic space,
- same-language world coherence.

Avoid:

- generic 3D realism,
- normal realistic humans with sacred clothing,
- fantasy deity concept art,
- cinematic spiritual staging,
- realistic scenic Himalaya,
- ornament pasted onto realism,
- or one sacred figure inside an ordinary environment.

The final image must feel like authentic Ladakh sacred-image logic translated into handcrafted dimensional presence.

Image-to-Image

Convert this source image into V2 = authentic handcrafted dimensional translation of Himalayan sacred-image / thangka-related tradition from Ladakh.

Keep the source image's subject count, core action, and readability, but rebuild the entire image through Ladakh sacred-image grammar translated into handcrafted dimensional form.

The image must no longer behave like normal realism.

Replace that with:

- iconographic correctness,
- iconometric body structure,
- sacred hierarchy,
- symbolic placement,
- ritual-image logic,
- painted-material sacred memory,
- halo / aura / lotus / throne / attribute structure,
- and layered sacred spatial order.

Add:

- moderate dimensional presence,

tactile sacred objecthood,
clear figure-support-background separation,
believable aura and support depth,
and handcrafted sacred-world coherence.

But do not let dimensionality come from generic realism.
Do not keep realistic anatomy under sacred decoration.
Do not build normal scenic depth and then decorate it with Buddhist elements.
Do not let the image become concept-art spirituality.

Rebuild all visible elements so they feel born from Ladakh sacred-image dimensional logic.

The result must feel like the source image has entered the handcrafted dimensional state of the same sacred-image system.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable dimensional world of Himalayan sacred-image / thangka-related tradition from Ladakh.

Preserve the same unchanged deep style-core:
iconographic correctness,
iconometric proportion discipline,
deity- or sacred-concept-centered hierarchy,
symbolic placement,
sacred compositional order,
painted sacred-surface intelligence,
mineral/gold visual memory,
ritual-image authority,
and western Himalayan monastic same-language world logic.

Now push that same grammar into its most believable, fully embodied dimensional world.

Believable here means:
believable volume,
believable material behavior,
believable sacred object presence,
believable figure-ground separation,
believable world completion,
believable spatial coherence,
and believable full-frame readability.

It does NOT mean:

generic realism,
cinematic spiritual makeover,
epic fantasy deity art,
concept-art polish,
or realism with sacred motifs added later.

The same style must still govern:

face logic,
body logic,
mudra logic,
posture logic,
attribute logic,
halo / lotus / throne / aura logic,
retinue logic,
sacred architecture logic,
background ordering,
and the full symbolic environment.

Increase:

full volumetric embodiment,
material clarity,
support structure presence,
environmental completion,
retinue/world coherence,
foreground / midground / background resolution,
attention control,
whole-frame sacred readability,
and total world consistency.

But do not introduce a second style language.

Do not let the world become more realistic than the sacred grammar.

Do not let the figures become fantasy-realistic.

Do not let the environment become ordinary scenic Ladakh.

Do not let V3 become a premium spectacle version.

It must remain the same Ladakh sacred-image grammar, fully embodied.

The final image must feel like Ladakh sacred-image logic itself has become a believable dimensional world.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V3 = fully resolved believable dimensional world of Himalayan sacred-image / thangka-related tradition from Ladakh.

Keep the same unchanged deep style-core:
iconographic correctness,
iconometric proportion,
sacred hierarchy,
symbolic placement,
ritual-image logic,
painted sacred-surface memory,
and western Himalayan sacred-image world order.

Now fully embody that style into a believable dimensional world.

Increase:
full volumetric depth,
material-light interaction for form readability,
sacred object presence,
environment completion,
figure-ground separation,
focal clarity,
retinue/world coherence,
and whole-scene completion.

Build the image like this:

[MAIN FIGURES] must be fully style-born and fully embodied, never generic realism.
[FACES] must remain canon-bound, hieratic, and non-photoreal in construction.
[BODIES / POSTURES / GESTURES] must feel fully present in space, but still governed by iconometric and iconographic rules.
[ATTRIBUTES / OBJECTS / SUPPORTS] must become fully believable through sacred-image logic, not realism-first rendering.
[ENVIRONMENT / BACKGROUND] must become a complete world that still behaves like symbolic sacred order, not ordinary optical landscape.

Keep unchanged:
sacred-image ontology,
iconometric structure,
iconographic discipline,
symbolic hierarchy,
ritual-image attitude,
same-language world consistency,
single visual language across the frame.

Avoid:
generic cinematic illustration,
fantasy-spiritual concept art,
luxury sacred realism,
poster-deity spectacle,
realistic scenic Himalaya with sacred props,
style only in halo/lotus/ornament,
or any second visual language overpowering the source grammar.

The final image must feel like the same Ladakh sacred-image system has become fully embodied as a believable world.

Image-to-Image

Convert this source image into V3 = fully resolved believable dimensional world of Himalayan sacred-image / thangka-related tradition from Ladakh.

Preserve the source image's subject count, core action, scene purpose, and main readability,
but rebuild every visible element through Ladakh sacred-image grammar fully embodied as a world.

Replace ordinary realism with:
iconographic correctness,
iconometric proportion discipline,
sacred hierarchy,
symbolic placement,
ritual-image logic,
painted sacred-surface memory,
halo / aura / lotus / throne / attribute / retinue structure,
and sacred-environment world ordering.

Expand the source into:
fully embodied sacred figures,
believable material presence,
clear spatial separation,
full environmental completion,
strong sacred object presence,
retinue and symbolic world coherence,
and a complete dimensional sacred-image world.

But keep the same source grammar intact.
Do not let realism replace the style.
Do not add sacred symbols only as decoration.
Do not let the background become ordinary scenic realism.
Do not let V3 turn into fantasy-cinematic spectacle.
Do not let the central figure become generic premium deity art.

Rebuild the entire frame so it feels like authentic Ladakh sacred-image logic itself has become a fully resolved dimensional world.

If the result feels like reality coated with Buddhist sacred styling, it has failed.
If it feels like Ladakh sacred-image grammar embodied as a whole world, it is correct.
